The Deadly Innocents Portraits Of Children Who Kill:

The Deadly Innocents Muriel GARDINER, 1985 **Handbook of Psychological Approaches with Violent Offenders** Vincent B. Van Hasselt, Michel Hersen, 2013-11-11

The past quarter century has witnessed a dramatic upsurge of violent crime in the United States and abroad. In this country the rise in violent criminal activity has been consistently documented in such published accounts as the Uniform Crime Reports and the Statistical Handbook on Violence in America published by the FBI and the Violence Research Group respectively. Further, social scientists, particularly those working in the fields of sociology and psychology, have provided a convergence of findings attesting to the magnitude of one of today's most significant social problems: domestic violence, e.g., spouse, child, and elder abuse. Such efforts have served as the impetus for heightened clinical and investigative activity in the area of violent behavior. Indeed, a wide range of mental health experts, such as psychologists, psychiatrists, social workers, counselors, and rehabilitation specialists, have endeavored to focus on strategies and issues in research and treatment for violent individuals and their victims. The purpose of this book is to provide a comprehensive and timely examination of current psychological approaches with violent criminal offenders. Despite the fact that we continue to have much to learn about perpetrators of violent acts, in recent years an increasingly large body of empirical data have been adduced about this year's issue. However, these data generally have appeared in disparate journals and books. That being the case, it is our belief that such a handbook now is warranted.

The Routledge International Handbook of Juvenile Homicide Kathleen M. Heide, 2023-12-22

The Routledge International Handbook of Juvenile Homicide is the definitive work on juvenile homicide. This volume provides an up-to-date, comprehensive and in-depth exploration of what is known about juveniles involved in murder. Taking an interdisciplinary approach to juvenile homicide, this handbook brings together the leading experts in social sciences, mental health, and law from many countries. The volume covers the phenomenon of juvenile homicide from beginning to end by addressing the questions: why do kids kill, all the way to how does society stop them from killing. The tough issues involved in sentencing youths who take the lives of others, often deliberately and in horrific ways, are confronted through chapters addressing the legal issues, child development factors, risk assessment, public attitudes, and ethical concerns. The volume brings together research specifically conducted for this volume, in addition to summaries and discussions of clinical and empirical findings. Each chapter ends with key takeaway points. Contributors include psychologists, psychiatrists, criminologists, sociologists, lawyers, economists, biologists, epidemiologists, and public health and public policy experts. Uniquely, they examine murder by juveniles across the globe. The volume includes research pertaining to the causes, correlates, and theoretical explanations of juvenile homicide offending. Moving beyond discussions of juvenile homicide offenders (JHOs) as a homogenous group, the volume includes research on specific types of JHOs and research investigating age and gender differences among JHOs. In addition, it draws attention to the empirical factors associated with juvenile homicide offending, effective treatment of JHOs, recidivism, and prevention of violent behavior. The

volume also makes recommendations for policy and practice including how to shift government policy from punishing lawbreakers to saving lives This volume is essential reading for scholars and students researching youth violence juvenile homicide across a variety of disciplines including criminology criminal justice law psychology psychiatry sociology social work public health and education It is also an invaluable reference for mental health professionals practitioners in the juvenile and criminal justice systems policymakers and government leaders *Young Killers* Kathleen M.  A tragic portrait of adolescents who kill their parents is revealed in this volume these young people almost always kill out of
 desperation as they are almost always victims of severe child abuse neglect and dysfunctional parenting Drawing upon her
 experience as a clinician expert witness and scholar the author asserts that a combination of interconnected problems
 creates the conditions for parricide including severe sexual physical and or verbal abuse of the child escalating violence in
 the family and increasing vulnerability of the child to stressors in the home This sensitive volume includes an examination of
 interventions that are effective in treating such children Heide concludes that ado *Library Book Catalog* United States.

 tried and true staples of horror films But none can match the visceral dread evoked by a child with an innocent face and a
 diabolical stare Cinema s evil children attack our cherished ideas of innocence and our innocent bystander status as the
 audience A good horror film is a scary ride a devil child movie is a guilt trip This book examines 24 international films with
 discussions of another 100 that in effect indict viewers for crimes of child abuse and abandonment greed social and

Jerath,Paul E. Larson,Jesse F. Lewis,1982 Myth of Evil Phillip Cole,2006-06-12 A philosophical history of the concept of evil in western culture Evil is something to be feared and historically we shall see it is the enemy within who has been seen as representing the most intense evil of all the enemy who looks just like us talks like us and is just like us The Myth of Evil explores a contradiction the belief that human beings cannot commit acts of pure evil that they cannot inflict harm for its own sake and the evidence that pure evil truly is a human capacity Acts of horror are committed not by inhuman monsters but by ordinary human beings This contradiction is clearest in the apparently extreme acts of war criminals terrorists serial murderers sex offenders and children who kill Phillip Cole delves deep into our two cosily established approaches to evil There is the traditional approach where evil is a force which creates monsters in human shape And there is the enlightened perspective where evil is the consequence of the actions of misguided or mentally deranged agents Cole rejects both

approaches Satan may have played a role in its evolution but evil is really a myth we have created about ourselves And to understand it fully we must acknowledge this Drawing on the philosophical ideas of Nietzsche Arendt Kant Mary Midgley and others as well as theology psychoanalysis fictional representations and contemporary political events such as the global war on terror Cole presents an account of evil that is thorough and thought provoking and which more fundamentally compels us to reassess our understanding of human nature
