Faye, 2000-04-13 This comprehensive reference source is a state of the art guide to the scientific clinical rehabilitative and policy aspects of vision impairment and blindness More than 100 original contributions from physicians therapists rehabilitation specialists and policy makers cover everything from the basic science of vision and its diseases to assistive technologies treatment and care **Current Catalog** National Library of Medicine (U.S.), First multi year cumulation covers six years 1965 70 *Bulletin of Prosthetics Research*, 1980 **Journal of Rehabilitation Research and Development**, 1985 *Journal of Rehabilitation Research & Development*, 1985 **The Blind Population of the United States, 1920** United States. Bureau of the Census, 1928 **MMWR.**, 1996 *Focus on Eye Research* O. R. Ioseliani, 2005 The consequences of ageing populations combined with the strain to the human eye caused by computers and widespread poor nutritional practices has resulted in an upsurge of research dealing with vision This new book presents leading edge research in this field *Pervasive Health* Andreas Holzinger, Martina Ziefle, Carsten Röcker, 2014-04-15 Providing a comprehensive introduction into an overview of the field of pervasive healthcare applications this volume incorporates a variety of timely topics ranging from medical sensors and

hardware infrastructures to software platforms and applications and addresses issues of user experience and technology acceptance The recent developments in the area of information and communication technologies have laid the groundwork for new patient centred healthcare solutions While the majority of computer supported healthcare tools designed in the last decades focused mainly on supporting care givers and medical personnel this trend changed with the introduction of pervasive healthcare technologies which provide supportive and adaptive services for a broad variety and diverse set of end users With contributions from key researchers the book integrates the various aspects of pervasive healthcare systems including application design hardware development system implementation hardware and software infrastructures as well as end user aspects providing an excellent overview of this important and evolving field [Ambassadors of Social Progress](#)

Maria Cristina Galmarini,2024-02-15 [Ambassadors of Social Progress](#) examines the ways in which blind activists from the Soviet Union and Eastern Europe entered the postwar international disability movement and shaped its content and its course Maria Cristina Galmarini shows that the international work of socialist blind activists was defined by the larger politics of the Cold War and in many respects represented a field of competition with the West in which the East could shine Yet her study also reveals that socialist blind politics went beyond propaganda When socialist activists joined the international blind movement they initiated an exchange of experiences that profoundly impacted everyone involved Not only did the international blind movement turn global disability welfare from philanthropy to self advocacy but it also gave East European and Soviet activists a new set of ideas and technologies to improve their own national movements By analyzing the intersection of disability and politics [Ambassadors of Social Progress](#) enables a deeper bottom up understanding of cultural relations during the Cold War Galmarini significantly contributes to the little studied history of disability in socialist Europe and ultimately shows that disability activism did not start as an import from the West in the post 1989 period but rather had a long and meaningful tradition that was rooted in the socialist system of welfare and needed to be reinvented when this system fell apart **Global Population Health: A Primer**
