The Demography Of The Semai Senoi:

The Demography of the Semai Senoi Alan G. Fix, 1977-01-01 During 1968 and 1969 Alan G Fix conducted an anthropological and genetic study among the Semai Senoi of Malaysia His goal was to measure the amount of genetic exchange between local populations and document the effects of that exchange This work combines results from that study with data from a 1965 census of aborigines and an expanded analysis *Current Developments in Anthropological Genetics* Michael H. Crawford, James H. Mielke, 2012-12-06 This volume examines the interrelationship of ecology subsistence patterns and the observed genetic variation in human populations Hence the book is divided conceptually into the following categories nonhuman primates hunters and gatherers nomads swidden agriculturalists peasants and farmers religious isolates and modern and urban aggregates While many of these populations have experienced and are experiencing acculturation as a result of contact with technologically more advanced groups the genetic structures described in this volume attempt to reconstruct the traditional patterns as well as genetic changes because of contact Most chapters also integrate biological genetic social and demographic data within an ecological frame thus presenting a holistic view of the population structures of ecologically distinct groups The first chapter examines the body of early nonhuman primate literature that emphasized ecological determinism in effecting the population structure of our primate ancestors relatives It also examines more recent literature since 1970 in which it became apparent that greater flexibility exists in primate social structure within specific environmental frameworks Thus it appears that our nonhuman primate evolutionary heritage is not one of ecological determinism in social organization but one of flexibility and rapid change suggesting the evolutionary success of our species is based upon a system of flexibility and that social adaptations can be accomplished in a number of diverse ways

Population Change in Southeast Asia Wilfredo F. Arce, Gabriel C. Alvarez, 1983 A collection of selected and condensed reports on the broad subject of Population Change in Southeast Asia this book represents the work of young Southeast Asian social scientists Their research has helped to cast more light on the problems associated with rapid population growth more specifically the areas of fertility population mobility family planning the evaluation of family planning programs and the environmental influence of demographic behaviour Tribal Communities in the Malay World Geoffrey Benjamin, 2003-08-01 The Malay World Alam Melayu spanning the Malay Peninsula much of Sumatra and parts of Borneo has long contained within it a variety of populations Most of the Malays have been organized into the different kingdoms kerajaan Melayu from which they have derived their identity But the territories of those kingdoms have also included tribal peoples both Malay and non Malay who have held themselves apart from those kingdoms in varying degrees In the last three decades research on these tribal societies has aroused increasing interest This book explores the ways in which the character of these societies relates to the Malay kingdoms that have held power in the region for many centuries past as well as to the modern nation states of the region It brings together researchers committed to comparative analysis of the tribal groups

living on either side of the Malacca Straits in Indonesia Malaysia Thailand and Singapore New theoretical and descriptive approaches are presented for the study of the social and cultural continuities and discontinuities manifested by tribal life in the region

Demography and Evolutionary Ecology of Hadza Hunter-Gatherers Nicholas Blurton Jones, 2016-01-21 The Hadza an ethnic group indigenous to northern Tanzania are one of the few remaining hunter gatherer populations Archaeology shows 130 000 years of hunting and gathering in their land but Hadza are rapidly losing areas vital to their way of life This book offers a unique opportunity to capture a disappearing lifestyle Blurton Jones interweaves data from ecology demography and evolutionary ecology to present a comprehensive analysis of the Hadza foragers Discussion centres on expansion of the adaptationist perspective beyond topics customarily studied in human behavioural ecology to interpret a wider range of anthropological concepts Analysing behavioural aspects with a specific focus on relationships and their wider impact on the population this book reports the demographic consequences of different patterns of marriage and the availability of helpers such as husbands children and grandmothers Essential for researchers and graduate students alike this book will challenge preconceptions of human sociobiology

Prehistory of the Indo-Malaysian Archipelago Peter Bellwood, 2007-03-01 Since its publication in 1985 Peter Bellwood's Prehistory of the Indo Malaysian Archipelago has been hailed as the sole authoritative work on the subject by the leading expert in the field Now that work has been fully revised and includes a complete up to date summary of the archaeology of the region and relevant neighboring areas of China and Oceania as well as a comprehensive discussion of new and important issues such as the Eve Garden of Eden hypothesis and its relevance to the Indo Malaysian region and recent advances in macrofamily linguistic classification Moving north to south from northern Peninsular Malaysia to Timor and west to east from Sumatra to the Moluccas Bellwood describes human prehistory from initial hominid settlement more than one million years ago to the eve of historical Hindu Buddhist and Islamic cultures of the region The archaeological record provides the central focus but chapters also incorporate essential information from the paleoenvironmental sciences biological anthropology linguistics and social anthropology Bellwood approaches questions about past cultural and biological developments in the region from a multidisciplinary perspective Historical issues given extended treatment include the significance of the Homo erectus populations of Java the dispersal of the present Austronesian speaking peoples of the region within the past 4 000 years and the spread of metallurgy since 500 B C Bellwood also discusses relationships between the prehistoric populations of the archipelago and those of neighboring regions such as Australia New Guinea and mainland Asia

Migration and Colonization in Human Microevolution Alan G. Fix, 1999-09-09 An integrative approach linking the causes of migration to genetic consequences for human evolution

Natural Human Fertility Peter Diggory, 1988-06-18 Migration and Mobility A.J. Boyce, 2022-11-16 Migration and Mobility 1984 examines the biological aspects of population movement including genetic anthropometric and psychological aspects Other contributions deal with geographical and demographic features of human migration Specific studies are

described and the theoretical framework used to describe population mobility is presented

Population Structure and Human Variation G. A. Harrison, 1977-08-11 This volume is a collection of eleven studies conducted during the International Biological Programme on the biological structure of human populations

Biological Aspects of Human Migration C. G. Nicholas Mascie-Taylor, Gabriel W. Lasker, 1988-01-29 An examination of migration as an important cause of change in the genetic and demographic structure of human populations

Current Developments in Anthropological Genetics James H. Mielke, Michael H. Crawford, 1982 This volume examines the interrelationship of ecology subsistence patterns and the observed genetic variation in human populations Hence the book is divided conceptually into the following categories nonhuman primates hunters and gatherers nomads swidden agriculturalists peasants and farmers religious isolates and modern and urban aggregates While many of these populations have experienced and are experiencing acculturation as a result of contact with technologically more advanced groups the genetic structures described in this volume attempt to reconstruct the traditional patterns as well as genetic changes because of contact Most chapters also integrate biological genetic social and demographic data within an ecological frame thus presenting a holistic view of the population structures of ecologically distinct groups The first chapter examines the body of early nonhuman primate literature that emphasized ecological determinism in effecting the population structure of our primate ancestors relatives It also examines more recent literature since 1970 in which it became apparent that greater flexibility exists in primate social structure within specific environmental frameworks Thus it appears that our nonhuman primate evolutionary heritage is not one of ecological determinism in social organization but one of flexibility and rapid change suggesting the evolutionary success of our species is based upon a system of flexibility and that social adaptations can be accomplished in a number of diverse ways

Research Strategies in Human Biology Gabriel Ward Lasker, C. G. Nicholas Mascie-Taylor, 1993-11-04 This book is about the process of doing research not about the results obtained A number of researchers with experience working on problems including environmental stresses population genetics parasitic vectors and vital records describe obstacles encountered and successful strategies employed in their own studies and in those of others One learns to do research by trial and error but accounts such as these can supplement what one learns from mentors and fellow students
