Atlas of Physiology and Anatomy of the Human Body Alfred Mason Amadon, 1917 Chromolithographed plates contain layered superimposed flaps The first plate is a full length anatomical representation of a man Bent just above the knees when unfolded he extends to nearly twice the length of the volume The second plate covers the head with a further double sided plate of the brain tipped onto the recto of the plate

Plate number III is in three parts depicting the larynx the tooth and the stomach and liver whilst plate number IV similarly depicts the ear the nose and the eye The number of flaps on the plates vary from just one extra double sided layer on the ear to sixteen different layers and flaps on the full body The audience at which this book was directed can be easily confirmed as schoolchildren by the fact that although the body is full length and obviously male the genito urinary system is plainly incomplete Antiquarian bookseller s description *The Human body* Henry Newell Martin,1898 The Human Body and Its Health William Thayer Smith,1884 *The Human Body* John Berry Haycroft,1902
