calls barriers to collaboration for rivals These ideas are developed and illustrated through original case studies of alliances among U S Japanese and European firms in electronics and computers including Xerox IBM and Fujitsu as well as other small and large companies The book should be of interest to business academics managers and general readers concerned with contemporary capitalism Invention and the Rise of Technocapitalism Luis Suarez-Villa,2000 In the context of the historic evolution of capitalism Suarez Villa social ecology U of California Irvine explores the advent of a form of market capitalism rooted in invention and the development of new technologies He examines the infrastructure that supports invention and the relationship of techno capitalism with science corporate business and government Annotation copyrighted by Book News Inc Portland OR
