The Language

Alex Broadhead

The Language:

The Language Web Jean Aitchison, 1997 Language is like a vast spider's web. In this volume Jean Aitchison explores the different facets of this web. She begins with the cobweb of false worries which surrounds language. She then discusses how language evolved in the human species, how children acquire it, and how educated English speakers remember 50 000 or more words. Finally, she argues that people are right to be concerned about language, though not in the ways traditionally assumed. This is the text of the 1996 BBC Reith lectures, slightly revised for publication, with illustrations and full references, and an afterword which looks at the reception of the lectures.

The Language System of English Vulf Plotkin, 2006. A description of the English language as a dynamic system in the evolutionary process of radical typological restructuring, which has deeply affected its constituent subsystems: grammatical, lexical, and phonetic.

The Language of Outsourced Call Centers Eric Friginal, 2009. The Language of Outsourced Call Centers is the first book to explore a large-scale corpus representing the typical kinds of interactions and communicative tasks in outsourced call centers located in the Philippines and serving American customers. The specific goals of this book are to conduct a corpus-based register comparison between outsourced call center interactions face-to-face American conversations and spontaneous telephone exchanges, and to study the dynamics of cross-cultural communication between Filipino call center agents and American callers, as well as other demographic groups of participants in outsourced call center transactions, e.g. gender of speakers, agents' experience and performance, and types of transactional tasks. The research design relies on a number of analytical approaches, including corpus linguistics and discourse analysis, and combines quantitative and qualitative examination of linguistic data in the investigation of the frequency distribution and functional characteristics of a range of lexico-syntactic features of outsourced call center discourse.

The Languages of Africa and the Diaspora Jo Anne Kleifgen, George C. Bond, 2009. This book takes a fresh look at subordinated vernacular languages in the context of African, Caribbean, and US educational landscapes, highlighting the social cost of linguistic exceptionalism for speakers of these languages. Chapters describe contravening movements toward various forms of linguistic diversity and offer a comprehensive approach to language awareness in educative settings.

The Language of Robert Burns Alex Broadhead, 2013-11-22. This monograph offers a radical reconceptualization of the relationship between the poetics and practice of Robert Burns, and reevaluates the nature of his role in the history of Scots. By drawing on ideas from twenty-first-century sociolinguistic theory, it seeks to transform the debate surrounding Burns's language. Through a series of readings that explore the way in which Burns used and commented on the styles associated with different places, groups, and genres, it demonstrates how languages, places, and the identities associated with both are in Burns's writing, subject to continual

reinvention In this respect the study breaks with existing accounts of the subject insofar as it presents Scots English and the other languages used by Burns not as fixed empirically observable entities but as ideas that were revised and remade through the poet's work Focusing on Burns's poems songs letters prefaces and glossaries the book pays special attention to the complex ways in which the author engaged with such issues as phonology grammar and the naming of languages The Burns who emerges from this book is not the marginal figure of traditional accounts an under educated poet alienated from the philological mainstream but rather a well informed thinker who more than any other contemporary writer embodies the creative linguistic spirit of the eighteenth century

The Languages of Diaspora and Return Bernard Spolsky, 2017-01-05 Until quite recently the term Diaspora usually with the capital meant the dispersion of the Jews in many parts of the world Now it is recognized that many other groups have built communities distant from their homeland such as Overseas Chinese South Asians Romani Armenians Syrian and Palestinian Arabs To explore the effect of exile of language repertoires the

article traces the sociolinguistic development of the many Jewish Diasporas starting with the community exiled to Babylon and following through exiles in Muslim and Christian countries in the Middle Ages and later. It presents the changes that occurred linguistically after Jews were granted full citizenship. It then goes into details about the phenomenon and problem of the Jewish return to the homeland, the revitalization and revernacularization of the Hebrew that had been a sacred and literary language and the rediasporization that accounts for the cases of maintenance of Diaspora varieties. *Historical View of the Languages and Literature of the Slavic Nations* Talvj, 1850
