Contemporary Economists in the West Isaak Ilyich Rubin, 2024-08-26 Isaak I Rubin author of numerous works in Marxist theory explains the failure of the Austrian School's attempt to reduce political economy to individual psychology Emphasising the sociological dimension of Marx's work Rubin welcomes a new social direction in the writings of Rudolf Stolzmann Alfred Amonn and Franz Petry These economists rejected Austrian individualism but their works were often influenced by the ethical idealism of Kant and Hegel resulting in detachment of the economy's social form from the material process of production Rubin critically explores methodological differences between Marx and early twentieth century critics and proponents of marginalist economic theory

What's Left Malcolm Harris, 2025-04-15 A vital guide for collective political action against the climate apocalypse from bestselling progressive intellectual Malcolm Harris a brilliant thinker and writer capable of making the intricacies of economic conditions supremely readable Vulture Climate change is the unifying crisis of our time But the scale of the problem can be paralyzing especially when corporations are actively staving off changes that could save the planet but which might threaten their bottom lines To quote Greta Thunberg despite very clear science and very real devastation the adults at the table are still saying blah blah blah Something has to change but what and how In What's Left Malcolm Harris cuts through the noise and gets real about

Theories of Surplus Value Karl Marx, 2020-10-04

Theories of Surplus Value is a book that unlike Marx actually needs an introduction *Theories* was intended to be collected and published as the fourth volume to Marx s *Capital* but after Engels had successfully collected and published volumes two and three after Marx s death Engels died before he could publish it *Theories* has had a long history of being in and out of publication and particularly in and out of being an actually accessible publication In 1905 the infamously hated by Lenin Karl Kautsky published the first edition of the manuscript in three volumes separated and rearranged by Adam Smith in volume one to David Ricardo in the other two volumes with the breakup of the Ricardian school as the third volume Kautsky s version circulated in print and was translated to many languages over the decades remaining the sole version of *Theories* until The Institute of Marxism Leninism published a new German version This arrangement while still relatively close to Kautsky s narrative arrangement of tracing surplus value from Smith to the Ricardian split into vulgar economics annotated the manuscript with different topic headings This version was then translated into English by Progress Publishers and this is the version of the book which circulates today and is considered to be the most accurate version to Marx s notebooks This Radical Reprint by Pattern Books is made to be accessible and as close to only manufacturing cost as possible This third volume of *Theories of Surplus Value* covers the confusion between the concepts of commodity and capital constant and variable capital and over production the problem of the relativizing the categories of value and equivalence John Stuart Mill s reduction of Ricardian s economic theories and the reductions of surplus value into profit theory and as Marx continually says its descent into being vulgar political economy These three volumes in totality are to show how the classical theories of value led to a theory stuck within the market paradigm and caught in the loop of capitalist circularity For Marx the current ontology of political economy only ruled within the scope of pragmatism within the market system and these programs no longer offered any integrated theory of capitalism
