The Situation in Flushing Edmund G. Love, 1965 Memoir of the author's boyhood in the early 1900s in a small village in southwestern Michigan

Water Quality in Drinking Water Distribution Systems Mirjam Blokker, Joost Van Summeren, Vanessa Speight, 2020-12-02 Safe drinking water is paramount for the health and wellbeing of all human populations. Water is extracted from surface and groundwater sources and treated to comply with drinking water standards. The water is then circulated through the drinking water distribution system (DWDS). Within the DWDS, water quality can deteriorate due to microbiological growth, chemical reactions, interactions with ageing and deteriorating infrastructure, and through maintenance and repair activities. Some DWDS actions may serve to improve water quality; however, these can adversely impact the drinking water system and cause instances of poor water quality or disease outbreaks. We invited papers covering examinations of DWDS design and operational practices and their impact on water quality. We received papers based on practical research in real DWDS and laboratory test facilities. We also received papers on novel modelling approaches. A wide range of water quality aspects was gathered, including temperature, disinfection, bacterial communities, and biofilm, fecal contamination, and QMRA, and the effects of flushing and intermittent supply.

Agency and Change Raymond Caldwell, 2006-04-27 This excellent book remaps the limits and possibilities of change, clearly shifting the focus from outmoded debates on agency and structure to new practice-based discourses on agency and change. Offering readers a selective and critical review of key literature and empirical research, it will help students contextualize this complex subject area and independently evaluate future prospects for effective change agent roles in organizations. Presenting an interdisciplinary exploration of competing discourses, the book uses two overarching conceptual continua: centred agency and decentred agency, and systems processes, thereby allowing a more intensive focus on agency and change. Well-written with challenging content, this book is essential reading for those interested in the origins, development, and future prospects for change agency in an organizational world characterized by increasing complexity, risk, and uncertainty.

Demolition Means Progress Andrew R. Highsmith, 2015-07-06 Tracks the fall of Flint, Michigan, once one of the nation's greatest industrial towns, now one of its poorest cities. Compelling and powerful. Kevin Boyle, National Book Award-winning author of *Arc of Justice*. In 1997, after General Motors shuttered a massive complex of factories in the gritty industrial city of Flint, Michigan, signs were placed around the empty facility reading "Demolition Means Progress," suggesting that the struggling metropolis could not move forward to greatness until the old plants met the wrecking ball. Much more than a trite corporate slogan, the phrase encapsulates the operating ethos of the nation's metropolitan leadership from at least the 1930s to the present. Again and again, the leaders of Flint and other municipalities tried to revitalize their communities by demolishing outdated and inefficient structures and institutions and overseeing numerous urban renewal campaigns, many of which yielded only more impoverished and more divided metropolises. After decades of these efforts, the

dawn of the twenty first century found Flint one of the most racially segregated and economically polarized metropolitan areas in the nation In one of the most comprehensive works yet written on the history of inequality and metropolitan development in modern America Andrew R Highsmith uses the case of Flint to explain how the perennial quest for urban renewal even more than white flight corporate abandonment and other forces contributed to mass suburbanization racial and economic division deindustrialization and political fragmentation Challenging much of the conventional wisdom about structural inequality and the roots of the nation s urban crisis *Demolition Means Progress* shows in vivid detail how public policies and programs designed to revitalize the Flint area ultimately led to the hardening of social divisions Brilliantly narrates the entire arc of 20th century American industrialization at the scale of a single city Flint Michigan and its suburbs a remarkable book Robert Self author of *American Babylon Race and the Struggle for Postwar Oakland*

Research Advances in Alcohol and Drug Problems Reginald G. Smart, Howard D. Cappell, Frederick B Glaser, Yedy Israel, Harold Kalant, Robert E. Popham, Wolfgang Schmidt, Edward M. Sellers, 2013-03-13 This volume is the eighth in the Research Advances Series and the fifth published by Plenum Press The purpose of the series is to review new work in rapidly changing fields We do not expect reviews to cover the whole field of work on alcoholism and addiction Nor do we expect that they will be like annual reviews covering all work in a delimited field Our reviews are designed to explore only the most exciting parts of the total field and to focus on conclusions that can be made about them The series publishes one volume each year Volume 8 is an omnibus rather than a theme volume in that a wide range of topics is covered including research on alcohol opiates and tobacco As usual the greater emphasis is on alcohol research reflecting the importance of the problem and the volume of work to be reviewed With Volume 8 come some changes in the Editorial Board It will be the last volume in the series for Robert E Popham who has resigned from the Board He has been with the series since its inception and has contributed a great deal to its development The members of the Board are grateful for his help We are adding two new members Dr Howard Cappell whose field is experimental psychology and Dr Edward M Sellers in clinical medicine and pharmacology
