Municipalities and Community Participation Janelle Plummer, 2013-12-16 Among all the literature on participation this is the first book I know that focuses on municipal authorities It also has particular importance both for higher levels of government at national or provincial state level and for international agencies Firstly it is a reminder of the importance of well functioning municipal governments for reducing poverty Secondly it is a rich source of case studies and analysis about how municipal authorities can incorporate one central component of good governance a permanent participatory engagement with their citizens From the Foreword by David Satterthwaite Director Human Settlements Programme International Institute for Environment and Development Increasingly governments and donors are advocating the participation of poor communities in the delivery of urban services and infrastructure Yet local authorities responsible for implementing participatory policies often do not have the skills organisations or resources needed or an adequate idea of the capacity required This sourcebook provides invaluable practical guidance for municipal officials and others working in urban development and poverty reduction on the range of issues to be addressed in planning and managing cities with community participation It explains the key elements of participation identifies common constraints and opportunities describes the vehicles for moving participation forward and outlines the capacity building needed for a municipality to achieve participatory goals **Situation Analysis of informal settlements in Kisumu** Kenya Slum Upgrading Programme, 2005
