In addition, demand is likely to be driven by the growing use of epoxy in the electronics and electrical industries as an insulator and to protect components from dust, short circuiting and moisture. The rising demand for convenience and processed food and beverages is increasing the demand for packaging in both developed and emerging countries. Resins are used in internal coatings of cans to enhance the shelf life of canned food and beverages products. They are also used to protect and preserve the taste, texture and colour of food and beverage products while preventing corrosion. Moreover, the increasing use of glass packaging is significantly contributing to the market growth as it uses resin to prevent corrosion in jars and bottles. The introduction of various stringent policies regarding food safety by several governments is increasing the use of epoxy resin, further fuelling the market growth. The book covers a variety of topics related to starting a Resin Business. It also includes images of the equipment and facility structure as well as information on machinery suppliers.
