Controversies in Political Economy Russell Lewis, 2025-06-30 First published in 1992 Recent Controversies in Political Economy presents a collection of articles on political economy and economic policy taken from Economic Affairs the Institute's magazine Put together they constitute a sustained commentary on what is widely known as the Thatcher era For more than a decade successive Conservative governments introduced reforms which have been widely held to be a revolution in economic policy Generally these have tended to give a greater role to markets The Institute of Economic Affairs takes markets as its central concern where they work where they fail and how they are impeded It thus has a unique interest in this policy revolution In areas as diverse as taxation education housing and the environment the volume offers a series of challenging alternatives In some cases ideas proposed have subsequently been taken up but there are other examples where the proposals run contrary to those of any of the major parties or read as an implicit criticism of policies which were actually adopted This book is an important historical reference work for students and scholars of political economy economic policy and economics in general

The Big Business of Small Enterprises World Bank, 2015-02-13 The World Bank Group promotes small and medium enterprise SME growth through both systemic and targeted interventions Targeting means focusing benefits on one size class of firms to the exclusion of others Targeted support for SMEs is a big business for the World Bank Group averaging around 3 billion a year in commitments expenditures and gross exposure over the 2006 12 period In the context of broader reforms such targeted support can be a powerful tool Targeting SMEs is not an end in itself but a means to create economies that can employ more people and create more opportunity for citizens to achieve prosperity A thriving and growing SME sector is associated with rapidly growing economies A central challenge is to level the economic playing field by ensuring dynamic markets strengthening market support institutions and removing constraints to participation IEG found that financial sector development can have both a pro growth and pro poor impact by alleviating SMEs financing constraints enabling new entry of firms and entrepreneurs and better resource allocation Layered on top of this are targeted forms of assistance these interventions may build on a foundation of more systemic reforms may come in tandem with them or may in fact be a means to build systemic reforms from the bottom up Any credible justification of targeted support to SMEs must be focused on establishing well functioning markets and institutions not simply providing a temporary supply of benefits to a small group of firms during a project's lifespan Thus targeted interventions need to leverage resources to produce broader benefits for institutions and markets To make targeted support for SMEs more effective the World Bank Group needs to do several things Clarify its approach to targeted support to SMEs Enhance the support's relevance and additionality Institute a tailored research agenda Strengthen guidance and quality control for such support Reform MIGA's Small Investment Program
