Technological Change, Economic Development and Space Cristoforo S. Bertuglia, Manfred M. Fischer, Giorgio Preto, 2012-12-06 The pressures of global competition are affecting regions throughout the world and making it increasingly necessary to understand the complex underlying mechanisms and the potential for innovation offered by new technology Success in economic restructuring depends not only on the technology itself but the professional and entrepreneurial skills available and the support of provided by institutions and information networks The very local nature these phenomena which are critical to the innovative propensity of firms operating within the region introduces an inevitable spatial dimension The time therefore seems ripe to bring together contributions from scholars working in different but related disciplines with the aim of investigating the triangular relationship between technological change economic development and space The present volume offers a compact review of current theoretical developments and valuable insights deriving from recent empirical studies carried out both within Europe and elsewhere All those contributing to this volume are actively involved in research in the field Without their intellectual contribution and willingness to participate in this joint project the book would not have been

possible We should like in addition to thank Angela Spence for her capable assistance in coordinating the various stages of preparation of the book as well as her translation work and careful linguistic editing Thanks also go to Paola Stasi for her meticulous copy editing and help in preparing the indices Their work has been invaluable in moulding together in a single volume contributions from so many different sources

Small, Gritty, and Green Catherine Tumber, 2011-11-10 How small to midsize Rust Belt cities can play a crucial role in a low carbon sustainable and relocalized future America's once vibrant small to midsize cities Syracuse Worcester Akron Flint Rockford and others increasingly resemble urban wastelands Gutted by deindustrialization outsourcing and middle class flight disproportionately devastated by metro freeway systems that laid waste to the urban fabric and displaced the working poor small industrial cities seem to be part of America's past not its future And yet Catherine Tumber argues in this provocative book America's gritty Rust Belt cities could play a central role in a greener low carbon relocalized future As we wean ourselves from fossil fuels and realize the environmental costs of suburban sprawl we will see that small cities offer many assets for sustainable living not shared by their big city or small town counterparts including population density and nearby fertile farmland available for new environmentally friendly uses Tumber traveled to twenty five cities in the Northeast and Midwest from Buffalo to Peoria to Detroit to Rochester interviewing planners city officials and activists and weaving their stories into this exploration of small scale urbanism Smaller cities can be a critical part of a sustainable future and a productive green economy Small Gritty and Green will help us develop the moral and political imagination we need to realize this

The Framework for Innovation Frank Voehl, H. James Harrington, Rick Fernandez, Brett Trusko, 2018-12-14 The innovation infrastructure and master plan described in this book offers a detailed and comprehensive approach to one of the most difficult and challenging problems facing entrepreneurs involved in innovation at any scale enterprise the problem of how to govern your organization's innovation initiatives in the middle of turbulent change Progress in any field requires the development of a framework a structure that organizes the accumulating knowledge enables people to master it and unifies the key discoveries into a set of principles that makes them understandable and actionable For starters successful innovation requires an integrated design process beginning with integration in the design of the enterprise the design of the product along with the design and implementation of new technologies Such an integrated design effort requires good collaboration and management of the design framework and should be supported by efficient knowledge management techniques and tools If innovation is to help a business grow and improve its competitiveness it is also important to plan the innovation carefully This book provides a holistic multidisciplinary framework that will enable your organization and its leaders to take a strategic approach to innovation The framework combines non traditional creative approaches to business innovation with conventional strategy development models The framework model brings together perspectives from many complementary disciplines the non traditional approaches to innovation found in the business creativity movement multiple source strategy
