Drug Use, Smoking and Drinking Among Young People in England in 2001 Sarah Blenkinsop, 2002 The main purpose of this survey is to monitor smoking drinking and drug use amongst secondary school children aged 11–15 years Information has been obtained from more than 9 000 pupils in 285 schools throughout England and the 2001 survey focuses on drug use Due to changes in question format the estimates of drugs taking are not compatible with those of previous surveys Key findings include that 29 per cent of the overall sample had ever tried one or more drugs 20 per cent had taken drugs in the last year and 12 per cent had done so within the last month with boys slightly more likely than girls to have taken drugs Figures rise as pupils get older with 48 per cent of 15 year olds having tried drugs and 29 per cent having taken them in the last year Cannabis was the most widely taken drug Reported levels of misuse of volatile substances such as glue sniffing were much higher than in previous surveys although this may be due to change in question format Women and Smoking, 2001 The second report from the U S Surgeon General devoted to women and smoking Includes executive summary chapter conclusions full text chapters and references Drugs and Popular Culture Paul Manning, 2013-01-11 The use of illegal drugs is so common that a number of commentators now refer to the normalisation of drug consumption It is surprising then that to date very little academic work has explored drug use as part of contemporary popular culture This collection of readings will apply an innovative multi disciplinary approach to this theme combining some of the most recent research on the normalisation thesis with fresh work on the relationship between drug use and popular culture In drawing upon

A range of 50 chapters integrates current research scholarship and practice on the risks and protective factors that influence women's health and well-being across the life span. Within a biopsychosocial framework, the Handbook explores mind and body risks and resilience research and interventions, cultural diversity, and public policy. This Handbook underscores the importance of gender in the lives of girls and women developmentally across significant phases of the life span. Considering the importance of cultural context, this book illustrates how gender socialization in female development and behavior affects self-evaluation, identity processes, and the social roles that girls and women adopt. Its chapters illustrate how externally induced risks such as poverty, discrimination, and violence present challenges to healthy development. Significantly, the chapters also draw attention to long-overlooked and compelling strengths and capacities that provide a firm basis for growth and health.

Illicit Drugs Adrian Barton, 2003-09-02. Illicit drugs and their use are now more than ever a dominant concern of politicians, policy makers, and the general public. Often our understandings of the drug problem tend to be uni-dimensional and based around particular areas of risk: drug-related crime, dependency, and ill health. This book moves beyond this single-issue approach and locates illicit drug use in its wider context, with chapters on the history of illicit drug use, measuring the problem, legal and medical responses to illicit drug use, the illicit drugs market, drugs, crime, and trends in drug policy. Drawing information from wide-ranging sources, Adrian Barton illuminates the complex nature and broad impact illicit drug use carries in its wake and provides an overview of the contemporary state of the drug scene. This book will be essential reading for students and researchers working in the area of drugs and society.
