Ireland have to offer Its easy to use season by season format and six themes History and Heritage Wildlife and Landscape Cities Towns and Villages Outdoor Activities Family Getaways and Festivals and Events make planning your time on these beautiful isles easier than ever     North Wales and Snowdonia Colin Macdonald,2007-05 Featuring numerous detailed walks and written by a knowledgeable local resident this guide provides comprehensive information on north Wales and Snowdonia It contains full colour illustrations and detailed maps     *The Rough Guide to Wales* Mike Parker,Paul Whitfield,2003 This guide covers everything from Wales pumping nightlife and rural cosmopolitanism to its crags and castles Critical reviews are given on accommodation and restaurants suiting all pockets from budget to luxury There are detailed descriptions of numerous walks from gentle lakeside strolls to serious mountain scrambles and water sports including surfing and the locally pioneered sport of coasteering     **Caledonian Structures in Britain** J.E. Treagus,2012-12-06 This volume deals with those sites selected as part of the Geological Conservation Review GCR within the southern British part of the Caledonides that is the paratectonic Caledonides a Caledonian terrane without strong and pervasive deformation and metamorphism such as occurred further north This orogenic belt formed by long and complex processes of earth movements between 500 and 380 million years before the present late Cambrian to mid Devonian times and has been classic ground for geologists for two hundred years It is perhaps no accident that James Hutton in 1795 chose to illustrate his geostrophic cycle and unconformity with three visually explicit examples of the deformation wrought on Lower Palaeozoic rocks by Caledonian events The former Caledonian mountain chain which can be seen today in fragmented pieces in Scandinavia Britain and Ireland and North America was ultimately the result of the collision of two continental plates and the closure of a former ocean Iapetus Some of these fragments including those in Scandinavia southern Britain and the Republic of Ireland and the Maritime Provinces of Canada are thought to have lain on the south side of the ocean before collision the rest of North America northern Ireland and Scotland are thought to have lain north of the former Iapetus     *Walk Snowdonia and North Wales* David Perrott,Laurence Main,1988     *Volcanic Successions Modern and Ancient* R. Cas,J. Wright,2012-12-06 One of our aims in the book is to provide geologists with a sound basis for making their own well founded interpretations For that reason we cover not only concepts about processes and the nature of the products but also methods and approaches that may be useful in analysing both modern and ancient successions Most importantly we treat the diversity of products in volcanic terrains as facies and we use the method of facies analysis and interpretation as a means of constructing facies models for different volcanic settings These models will we hope be useful as norms for comparison for workers in ancient terrains The idea for this book came into being between 1981 and 1982 when J V W came to Monash University to take up a Monash Postdoctoral Fellowship During this period a short course on facies analysis in modern and ancient successions was put together integrating J V W s extensive volcanological experience in numerous modern volcanic terrains with R A F C s extensive sedimentological and volcanological experience in older volcanic and associated sedimentary successions in the

Palaeozoic and Precambrian of Australia The enthusiastic response from the participants to the first short course taught in May 1982 and to subsequent annual re runs encouraged us to develop the short course notes into this book The idea for both the short course and the book arose because we felt that there was no single source available that comprehensively attempted to address the problems of analysing interpreting and understanding the complexity of processes products and stratigraphy in volcanic terrains
