Robert Westwood, Stewart Clegg

Social Analysis A Marxist Critique And Alternative:

Social Analysis Victor Leonard Allen,1975 This book extends the current increasing arguments about the ability of Western sociology to explain the contradictions and crises in Western capitalism It argues for the rejection of Western sociology and presents an alternative body of analysis to it It contends that the purpose of social theory must be clarify and explain the complexities of social reality as they are experienced by ordinary people that Western sociology fails to do this because it rests on an assumption which grossly distorts that reality The first part of the book presents the general case for the rejection of Western sociology The second part shows that the dominant models in sociology particularly as they are used in the study of organizations are based on a misrepresentation of social reality through their assumption that societies are relatively static basically unchanging phenomena It illustrates that this misrepresentation has led to a concentration on trivia and a diversion from any substantial issues which might result in unsettling questions being asked It emphasizes that Western sociology has the important political consequence of making it appear that the source of all social problems lies in the trivia and not in the structure of society itself The third part takes the book further than most contemporary criticisms of Western sociology by presenting Marxism as a dynamic logically sound theory which could displace Western sociology at every level of analysis *Social Analysis* Vernon L. Allen,Victor Leonard Allen,1975

Social analysis Victor Leonard Allen,1975 **Sociological Paradigms and Organisational Analysis** Gibson Burrell,Gareth Morgan,2017-03-02 The authors argue in this book that social theory can usefully be conceived in terms of four broad paradigms based upon different sets of meta theoretical assumptions with regard to the nature of social science and the nature of society The four paradigms Functionalist Interpretive Radical Humanist and Radical Structuralist derive from quite distinct intellectual traditions and present four mutually exclusive views of the social work Each stands in its own right and generates its own distinctive approach to the analysis of social life The authors provide extensive reviews of the four paradigms tracing the evolution and inter relationships between the various sociological schools of thought within each They then proceed to relate theories of organisation to this wider background This book covers a great range of intellectual territory It makes a number of important contributions to our understanding of sociology and organisational analysis and will prove an invaluable guide to theorists researchers and students in a variety of social science disciplines It stands as a discourse in social theory drawing upon the general area of organisation studies industrial sociology organisation theory organisational psychology and industrial relations as a means of illustrating more general sociological themes In addition to reviewing and evaluating existing work it provides a framework for appraising future developments in the area of organisational analysis and suggests the form which some of these developments are likely to take Sociology and Organization Theory John Hassard,1995-04-06 It has been claimed that organization theory is in a state of crisis This book traces the history of the orthodox systems theory paradigm in organization studies from its foundations to its recent deconstruction by postmodernists The analysis offers general support

for the sociology in crisis thesis but takes issue with one of its main propositions that paradigms are incommensurable It is argued that paradigms are porous rather than hermetic phenomena a fact that has profound implications for the theory building process *The Oxford Handbook of Organization Theory* Haridimos Tsoukas,Christian Knudsen,2005 2 How has organization theory developed over time and what structure has the field taken What assumptions does knowledge produced in organization theory incorporate and what forms do its knowledge claims take as they are put forward for public adoption 3 How have certain well known controversies in organization theory such as for example the structure agency dilemma the study of organizational culture the different modes of explanation the micro macro controversy and the different explanations produced by organizational economists and sociologists been dealt with 4 How and in what ways is knowledge generated in organization theory related to action What features must organization theory knowledge have in order to be actionable and of relevance to the world out there How have ethical concerns been taken into account in organization theory 5 What is the future of organization theory What direction should the field take What must change in the way research is conducted and key theoretical terms are conceptualized so that organization theory enhances its capacity to generate valid and relevant knowledge **Sociological Dilemmas** Piotr Sztompka,2013-09-11 Sociological Dilemmas Toward a Dialectic Paradigm aims to build a new paradigm in sociological theory by using the method of dialectical critique patterned on the approach utilized by Karl Marx The book explores the sociological heritage with the theoretical works of Karl Marx as the primary basis of exposition and analysis Chapters are devoted to the discussion of the theoretical crisis of sociology the division of sociology between two opposing methodologies dissociation of sociology from the prescientific traditions of social thought and the conclusion reached by the author after an extensive analysis of sociological theories presented in the book The book will be of value to sociologists teachers and students of the social sciences **Rethinking Development** Peter Preston,2012-07-26 First published in 1987 this volume stresses the importance of development studies for sociology as P W Preston argues that this field of study is emerging from the technical social scientific ghetto back into the mainstream of the classical tradition of social theorizing represented by Marx Weber and Durkheim Preston discusses the position of development studies in relation to the wider group of the social sciences in general and to sociology in particular Using examples mainly from the study of Southeast Asia he looks at the diversity of available modes of social theoretic engagement and considers the work of the colonial administrator scholar the humanist academic scholar and the scholar who theorises on behalf of the planners discusses the mode of political writing and Marxian analyses of development and considers the particular problems surrounding the elites of post colonial nation states *The Third Way and beyond* Sarah Hale,Will Leggett,Luke Martell,2018-07-30 This electronic version has been made available under a Creative Commons BY NC ND open access license This collection brings together expert contributions to dissect the key political concept of the Third Way in theory and practice assessing its development and legacy and suggesting criticisms and alternatives **Society in**

Action Piotr Sztompka, 1991-08-27 In *Society in Action* Piotr Sztompka sets forth a highly topical contribution to central theoretical debates of contemporary sociology Taking the idea and practice of collective mobilization as his theme Sztompka argues that modern institutions particularly of late are characterized by an increasing awareness of collective empowerment The most obvious concrete expression of this phenomenon as Sztompka makes clear is the rise of a diversity of active social movements such as those which dramatically transformed Europe in the 1980s from the birth of Solidarity in 1980 to the 1989 Autumn of Nations Sztompka connects the interpretations of such collective activity to a wider grasp of the nature of social action The result is a comprehensive and original theory of social change which focuses on the self transforming influence on society of its members striving for freedom autonomy and self fulfillment He develops his theory by means of a general concept of social becoming the roots of which he traces to the early romantic and humanist work of Karl Marx and his followers and to two influential sociological schools of today the theory of agency and historical sociology Sztompka situates his theory midway between the rigid determinism of social totalities and the unbridled voluntarism of free individuals Social change he demonstrates can be understood neither as the outcome of individual actions taken alone nor as structurally determined actions Instead he confers upon social organizations and movements a self transcending quality they express human agency yet by virtue of their active character are quite often able to achieve unpredictable outcomes Throughout his analysis of social movements and revolutions in history Sztompka emphasizes the dynamics of spontaneous social change generated from below a theoretical testimony to the rapid and fundamental social change in Eastern Europe in recent history Against the fashions of postmodernist malaise boredom and disenchantment his theory of social becoming expresses the possibility of emancipation of change leading to positive gains His work registers a belief in progress not inevitably gained but its attainment fully dependent upon the creativity and optimism of an active citizenry Debating Organization Robert Westwood, Stewart Clegg, 2009-02-04 This volume introduces readers to the central debates of organization studies through a series of point and counterpoint debates by major figures in the field Introduces readers to the central tensions and debates of organization studies Celebrates the productive heterogeneity of the field by placing competing perspectives side by side Includes contributions from major figures in the field Structured in an innovative point and counterpoint format **Theories of Development** Peter Preston, 2012-12-06 Dr Preston's book first published in 1982 presents a critical history of development studies since the Second World War linking the recent neo Marxist debate with the whole tradition in the field going back to the work of economists like Arthur Lewis He identifies a series of schools and evaluates their contribution supplying in each case a careful analysis informed by the sociology of knowledge of the work of its leading theorists His final assessment draws on the critical theory of Habermas arguing that social theorising is essentially practical a matter of the construction criticism and comparative ranking of ideologies and that theorists should therefore consider what it makes sense for them to do or say given their circumstances and the problems they address

Faces of Precarity Joseph Choonara, Annalisa Murgia, Renato Miguel Carmo, 2022-08-08 The words precarity and precariousness are widely used when discussing work social conditions and experiences However there is no consensus on their meaning or how best to use them to explore social changes This book shows how scholars have mapped out these notions offering substantive analyses of issues such as the relationships between precariousness debt migration health and workers mobilizations and how these relationships have changed in the context of COVID 19 Bringing together an international group of authors from diverse fields this book offers a distinctive critical perspective on the processes of precarization focusing in particular on the European context The Introduction Chapters 3 and 8 and the Afterword are available Open Access via OAPEN under CC BY NC ND licence

Power, Ideology, and Control John C. Oliga, 2007-08-20 One of the great challenges we face today is coming to grips with forces of power in both theoretical and methodological terms in a way that prepares us for action action that is not totally subject to existing forces The literature has some excellent theoretical accounts of power but these say little about what we should do Most often they are abstract and out of reach of all but a select few In this book however we have a clear cut account of power ideology and control that paves the way for practicum minded people to make a genuine attempt at tackling issues of power on both organizational and societal levels John C Oliga suggests a division between what he calls objectivist subjectivist and relational perspectives With objectivism he refers to theories that focus on power as capacities located in social structures These tend to be either synergistic e g Parsonian collective or conflictual e g Marxian conflictual view theoretical orientations With subjectivism he discusses theories that focus on power possessed by agents With relational approaches he places theories that conceive power as a property of interaction among social forces
