Social Anthropology in the Arab World Abdullah Alajmi, Daniele Cantini, Irene Maffi, Imed Melliti, 2025-08-01 There are ongoing efforts in anthropology to decolonise its history and give fairer space to marginalised traditions This book examines the history and institutionalisation of anthropology in the Maghreb the Mashreq and the Gulf in an open and

collaborative manner and from various perspectives Its primary focus is two fold first to reorient the anthropological focus towards studies conducted in the region particularly on the conditions conducive to the institutionalisation of anthropological knowledge second to shed light on anthropological studies in languages other than English offering different theoretical and epistemological perspectives **An Introduction to Social Anthropology** Clark Wissler,1929 Reason and Morality

Wortham,Betsy Rymes,2003 Over the years

linguistic anthropological research has shown how classrooms are socializing institutions and how language functions as one medium through which this socialization is accomplished Early work in the field has captured the immediacy of social practice and language use in educational contexts and has created useful characterizations of variations in communicative competence The present work builds on the strengths of prior work showing how new theoretical concepts and empirical methods developed in linguistic anthropology over the last decade can further illuminate educational settings The authors introduce an updated Linguistic Anthropology of Education which recognizes that in the rapidly changing field of cultural production within which children and teachers operate today the exploration of multiple pre existing forms of communicative competence is not enough This volume elaborates theory and illustrates the tools and practices of the Linguistic Anthropology of Education to account for today s research context in which the multiplicity of identity and the multiple ways language can be used to represent it have important ramifications for how learning and social reproduction emerge within educational contexts **Towards a Social Grammar of Language** Mathew C.
