Patrick Williams, Kaylan C. Schwarz, 2020-08-03 As identity and authenticity discourses increasingly saturate everyday life so too have these concepts spread across the humanities and social sciences literatures Many scholars may be interested in identity and authenticity but lack knowledge of paradigmatic or disciplinary approaches to these concepts This volume offers readers insight into social constructionist approaches to identity and authenticity It focuses on the processes of identification and authentication rather than on subjective experiences of selfhood There are no attempts to settle what authentic identities are On the contrary contributors demonstrate that neither identities nor their authenticity have a single or fixed meaning Chapters provide exemplars of contemporary research on identity and authenticity with significant diversity among them in terms of the identities cultural milieu geographic settings disciplinary traditions and methodological approaches considered Contributors introduce readers to a number of established and emerging identity groups from sites around the world from yogis and punks to fire dancers and social media influencers Their conceptual work stretches from the micro analytic to the ethno national as authors employ a variety of qualitative methods including ethnographic fieldwork interviewing and the collection and analysis of naturally occurring interactions Several of the chapters look directly at identification and authentication while others focus on the social and cultural backdrops that structure these practices what unites them is the adoption of social constructionist sensibilities This book will appeal to anyone interested in understanding identity and authenticity Reader's Guide to the Social Sciences Jonathan Michie, 2014-02-03 This 2 volume work includes approximately 1 200 entries in A Z order critically reviewing the literature on specific topics from abortion to world systems theory In addition nine major entries cover each of the major disciplines political economy management and business human geography politics sociology law psychology organizational behavior and the history and development of the social sciences in a broader sense **Handbook of Constructionist Research** James A. Bearden-White,2015-10-08 A textbook reader for Dr Roy Bearden White's English 1302 classes at South Plains College My original goal in assembling this project was to create a textbook specifically designed for use in English 1302 at South Plains College that was first and foremost affordable for the limited budget of college students With the ever escalating costs of higher education in general and textbooks in particular the final objective seemed abundantly clear The path towards that goal however involved other considerations such as a text's cultural relevancy to modern students the tension between popular traditions and the literary canon freshmen accessibility of analytical challenges and finally reading enjoyment

Kaufer, Kathleen M. Carley, 2012-10-12 This book bridges an important gap between two major approaches to mass communication historical and social scientific To do so it employs a theory of communication that unifies social cultural and technological concerns into a systematic and formal framework that is then used to examine the impact of print within the larger socio cultural context and across multiple historical contexts The authors integrate historical studies and more abstract formal representations achieving a set of logically coherent and well delimited hypotheses that invite further exploration both historically and experimentally A second gap that the book addresses is in the area of formal models of communication and diffusion Such models typically assume a homogeneous population and a communication whose message is abstracted from the complexities of language processing In contrast the model presented in this book treats the population as heterogeneous and communications as potentially variable in their content as they move across speakers or readers Written to address and overcome many of the disciplinary divisions that have prevented the study of print from being approached from the perspective of a unified theory this book employs a focused interdisciplinary position that encompasses several domains It shows the underlying compatibility between cognitive and social theory between the study of language and cognition and the study of technology between the postmodern interest in the instability of meaning and the social science interest in the diffusion of information between the effects of technology and issues of cultural homogeneity and heterogeneity Overall this book reveals how small relatively non interactive disciplinary specific conversations about print are usefully conceived of as part of a larger interdisciplinary inquiry

*Toni Morrison's Secret Drive* David S. Goldstein, Shawnre D. Campbell, 2020-12-25 The late Toni Morrison was the first African American to win the Nobel Prize for Literature. A powerful writer, she wove stories depicting the largely overlooked Black experience in America and exploring the intersection of gender and race through the lives of Black women. Morrison's writing continues to move people and push readers to reassess their beliefs about what it means to be Black in America. Synthesizing some 250 scholarly works about Morrison's writing, this book examines eight novels as well as the short story *Recitatif*. They are analyzed for techniques used to deepen meaning and emotional weight and reveal Morrison's mastery over prose.

*Literary Intention, Literary Interpretations, and Readers* John Maynard, 2009-04-17 This accessible personal and provocative study returns to the major subject in literary discussion before and during the relatively recent flourishing of literary theory: that of literary intention. Does the author's personal intention or historical site determine a correct interpretation of a literary work? Probing the entire range of issues connected with this many-faceted and knotty concept, this book engages with interpretation on both theoretical and practical levels. It argues that the hard questions about interpretation connected to issues of intention cannot be sidestepped or ignored. It does not argue for conservative concepts of literature itself nor against the major historical engagements of critics in our time. But in addressing those who continue to read or teach literature, it does insist on a level of sophistication in issues of literary interpretation that cannot be assured by historical research and knowledge of the social and cultural connections to literary works. The overall aim of the work is to recall readers to the great complexity, pleasure and interest of literary interpretation.

*Women Readers and the Ideology of Gender in Old French Verse Romance* Roberta L. Krueger, 2005-02-17 This study challenges the view that all courtly literature promoted the social status of women. Unlike previous books which focused on

knights it starts from the perspective of the woman reader listener Using reader response theory feminist criticism and recent historical studies it suggests that romances taught gender roles often inviting readers to criticise and resist them
