Runciman, 2017-10-31 Why democracies believe they can survive any crisis and why that belief is so dangerous Why do democracies keep lurching from success to failure The current financial crisis is just the latest example of how things continue to go wrong just when it looked like they were going right In this wide ranging original and compelling book David Runciman tells the story of modern democracy through the history of moments of crisis from the First World War to the economic crash of 2008 A global history with a special focus on the United States The Confidence Trap examines how democracy survived threats ranging from the Great Depression to the Cuban missile crisis and from Watergate to the collapse of Lehman Brothers It also looks at the confusion and uncertainty created by unexpected victories from the defeat of German autocracy in 1918 to the defeat of communism in 1989 Throughout the book pays close attention to the politicians and thinkers who grappled with these crises from Woodrow Wilson Nehru and Adenauer to Fukuyama and Obama In The Confidence Trap David Runciman shows that democracies are good at recovering from emergencies but bad at avoiding them The lesson democracies tend to learn from their mistakes is that they can survive them and that no crisis is as bad as it seems Breeding complacency rather than wisdom crises lead to the dangerous belief that democracies can muddle through anything a confidence trap that may lead to a crisis that is just too big to escape if it hasn t already The most serious challenges confronting democracy today are debt the war on terror the rise of China and climate change If democracy is to survive them it must figure out a way to break the confidence trap

How to Trade with Confidence and Zero Fear Richard Rond, Trading is challenging for most people because they simply don t have the information tools or confidence to become successful This book is important for beginners because it tells it like it is and gives an inside look at trading the financial markets giving you the reality on what the live market is really like the way they are really run and tells you who runs them and what you need to do as a self directed beginner to survive in them Let's face it it's a well known fact that 97% of brand new self directed investors and traders fail and lose all of their money why does this happen It happens because brand new self directed traders enter into this business with a bunch of misguided grandiose ideas of making a million dollars from trading and while you can surely make millions of dollars from trading you would need to be using hundreds of millions of dollars of capital to do so no joke As a brand new self directed trader you have no idea of the brutality and volatility that goes on in the live markets on a daily basis and that there are people in the live markets who will walk over dead bodies to get paid so make no mistake as a beginner and think you can go in the live market and beat them you can t What you can do though is properly prepare yourself to trade with confidence and zero fear going up against the best traders in the world and be paid right along with them instead of paying them Once you have completed reading this entire book you will have a chance at competing with the best professional traders on the planet The information in this book will put you on the fast track to being able to make an unlimited income for yourself and becoming consistently profitable enough from trading the financial markets to perhaps even making a living from doing it isn t that the type of business you would like to
