Journal of Island and Coastal Archaeology **Frozen Frontiers** Jasper Quincy, AI, 2025-03-20 Frozen Frontiers explores the captivating history of Earth's polar regions examining how exploration, scientific discovery and geopolitics have shaped our understanding of the Arctic and Antarctic. The book reveals that these icy realms often perceived as isolated have been central to human ambition and scientific progress. For example, early expeditions though perilous sought new trade routes and resources while later scientific endeavors uncovered unique ecosystems and critical climate data. The book examines the evolution of polar exploration from early voyages to technologically advanced expeditions. It also highlights significant scientific discoveries and the strategic importance of these regions especially concerning climate change and international relations. Frozen Frontiers traces the historical context from early exploration through the scientific era finally addressing the contemporary geopolitical landscape marked by competing territorial claims. The book's approach is historical, geographical and geopolitical drawing upon expedition logs, scientific reports and diplomatic documents. It progresses through three major sections: geographical characteristics, the history of polar exploration and the geopolitical and scientific implications of climate change. Ultimately, Frozen Frontiers emphasizes the vital role of the polar regions in the global ecosystem urging consideration of their future in an era of unprecedented environmental change. *Frontiers of Cultural Heritage Law* James A.R. Nafziger, 2021-10-18 Winner of the ABILA American Branch of the International Law Association Book of the Year Award for a Book on Practical or Technical Subject. In this book, James Nafziger covers emerging topics of cultural heritage law, a relatively new landmark in the field of both national and international law. His primary focus is on the frontiers identified and developed by the numerous work products of the International Law Association's Committee on Cultural Heritage Law, expanded and updated by some of his own writings. The construction of cultural heritage law is a good example of transnationalism at work, combining national initiatives with diplomacy, UNESCO and other intergovernmental agreements, international custom and non-governmental initiatives such as the ILA committee's own contributions. These have included published studies, annotated principles and resolutions, draft treaties and a book focused on national practices in the international trade of cultural material. This volume concludes by briefly exploring current and future frontiers of a burgeoning range of topics that are central to many people's daily experiences and interests. This book was awarded the ABILA American Branch of the International Law Association Book of the Year Award for a Book on a Practical or Technical Subject in 2022. **The Machine in Neptune's Garden** Helen M.
