The Health Effects of Low-Level Radiation American Council on Science and Health,1988 Low-Level Radiation and Immune System Damage Joseph J. Mangano,2018-01-31 Atomic weapons and nuclear power plants they promised to ensure world peace and provide efficient energy to Americans during the 1940s and 1950s Meanwhile the post war prosperity led to the most dramatic population explosion ever witnessed in the United States the baby boomer generation Times and politics may change but many baby boomers as well as their descendants now live with an unforeseen result of the nuclear age Rates of immune related diseases have risen steadily throughout the past few decades from allergies to cancer While advances in medical care have kept death rates relatively low the increased prevalence of certain diseases cannot be ignored Low Level Radiation and Immune System Damage An Atomic Era Legacy establishes an undeniable connection between the nuclear build up of the past and the widespread health problems seen today While baby boomers were growing up in the 40s and 50s above ground atomic bomb tests and start ups of civilian nuclear power plants were carried out without fear of public exposure to radioactive emissions Although the consequences of low level radiation are still hotly debated Mangano s research findings emphasize a direct link between nuclear exposure and immune system deficiency In addition to substantial data on immune disease trends among Americans born between the mid 1940s and mid 1960s Mangano also examines similar issues concerning baby boomer children and grandchildren Health professionals environmentalists historians and students alike will find much to learn from these pages As America and the world come to terms with the post Cold War era there are still many lessons to recognize consider and learn from the still recent past Low Level Radiation and Immune System Damage An Atomic Era Legacy explores a relentless trend that will not soon be over with potential repercussions into the 21st century *Low-level Radiation Effects on Health* United States. Congress. House. Committee on Interstate and Foreign Commerce. Subcommittee on Oversight and Investigations,1980 *Review of Federal Studies on Health Effects of Low-level Radiation Exposure and Implementation of Public Law 97-72* United States. Congress. House. Technical Information Center,1978 *A History of Occupational Health and Safety* Michelle Follette Turk,2018-05-15 The United States has a long and unfortunate history of exposing employees the public and the environment to dangerous work But in April 2009 the spotlight was on Las Vegas when the Pulitzer committee awarded its public service prize to the Las Vegas Sun for its coverage of the high fatalities on Las Vegas Strip construction sites The newspaper attributed failures in safety policy to the recent exponential growth in the Las Vegas market In fact since Las Vegas founding in 1905 rapid development has always strained occupational health and safety standards A History of Occupational Health

and Safety examines the work hazards and health and safety programs from the early building of the railroad through the construction of the Hoover Dam chemical manufacturing during World War II nuclear testing and dense megaresort construction on the Las Vegas Strip In doing so this comprehensive chronicle reveals the long and unfortunate history of exposing workers residents tourists and the environment to dangerous work all while exposing the present and future to crises in the region Complex interactions and beliefs among the actors involved are emphasized as well as how the medical community interpreted and responded to the risks posed Few places in the United States contain this mixture of industrial and postindustrial sites the Las Vegas area offers unique opportunities to evaluate American occupational health during the twentieth century and reminds us all about the relevancy of protecting our workers

The Hanford Plaintiffs Trisha T. Pritikin,2020-02-25 For more than four decades beginning in 1944 the Hanford nuclear weapons facility in southeastern Washington State secretly blanketed much of the Pacific Northwest with low dose ionizing radiation the byproduct of plutonium production For those

who lived in the vicinity many of them families of Hanford workers the consequences soon became apparent as rates of illness and death steadily climbed despite repeated assurances from the Atomic Energy Commission that the facility posed no threat Trisha T Pritikin who has battled a lifetime of debilitating illness to become a lawyer and advocate for her fellow downwinders tells the devastating story of those who were harmed in Hanford s wake and seeking answers and justice were subjected to yet more suffering At the center of *The Hanford Plaintiffs* are the oral histories of twenty four people who joined In re Hanford Nuclear Reservation Litigation the class action suit that sought recognition of and recompense for the grievous injury knowingly caused by Hanford Radioactive contamination of American communities was not uncommon during the wartime Manhattan Project nor during the Cold War nuclear buildup that followed Pritikin interweaves the stories of people poisoned by Hanford with a parallel account of civilians downwind of the Nevada atomic test site who suffer from identical radiogenic diseases Against the heartrending details of personal illness and loss and ultimately persistence in the face of a legal system that protects the government on all fronts and at all costs *The Hanford Plaintiffs* draws a damning picture of the failure of the US Congress and the Judiciary to defend the American public and to adequately redress a catastrophic wrong Documenting the legal medical and human cost of one community s struggle for justice this book conveys in clear and urgent terms the damage done to ordinary Americans in the name of business progress and patriotism
