Cotta, 2007-05 It was supposed to be a relaxing vacation. Even though he can't spend time in the warm waters of Belize, policeman Conrad Bishop is happy to spend time with his girlfriend Amber at a private beachfront home in Nantucket. After a tranquil evening walking the beach, Conrad wakes at 3:00 AM, turns on the television, and hears a disturbing news report about a deadly influenza plague, the direct result of a terrorist attack on the United States. Rushing into his bedroom, he finds his girlfriend unconscious and suffering from a high fever. When he tries to take her to the hospital, the town is in a panic. Cars clog the road, and he's forced to return to the beach house. Amber never regains consciousness, and by that evening, she is dead. Grief-stricken, Bishop is suddenly thrust into a world that changes by the minute. Terrorists attack every major city in the United States with car bombs and invade American embassies overseas. With a small group of survivors, Conrad struggles to stay alive. His fight will take him to the very steps of the White House and have him waging a valiant crusade to keep a dying nation alive. African Language Structures Wm. E. Welmers, 2018-07-10 Wm. E. Welmers surveys a wide range of structural characteristics, both phonological and grammatical, of the languages of sub-Saharan Africa. Drawing on thirty years of experience in the analysis and teaching of African languages and on work done on some seventy spoken languages, Welmers has organized the volume by linguistic topic. Thus, there are extensive discussions of tonal systems in languages from all over sub-Saharan Africa, of noun classes and concord in the Bantu and other Niger-Kordofanian languages, and of the varieties of verbal constructions found in representative languages. *African Language Structures* emphasizes the organization of language data rather than the technicalities of theoretical linguistics. The material is presented in such a way that students working on the analysis of other languages can be guided in their procedures. Welmers suggests not only what types of structures may be expected but also how they may be discovered and described. This work is

unique in the depth of its linguistic insight over the entire spectrum of language structure and in the breadth of its language coverage This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1973

When Languages Die : The Extinction of the World's Languages and the Erosion of Human Knowledge K. David Harrison Assistant Professor of Linguistics Swarthmore College, 2007-02-01 It is commonly agreed by linguists and anthropologists that the majority of languages spoken now around the globe will likely disappear within our lifetime The phenomenon known as language death has started to accelerate as the world has grown smaller This extinction of languages and the knowledge therein has no parallel in human history K David Harrison's book is the first to focus on the essential question what is lost when a language dies What forms of knowledge are embedded in a language's structure and vocabulary And how harmful is it to humanity that such knowledge is lost forever Harrison spans the globe from Siberia to North America to the Himalayas and elsewhere to look at the human knowledge that is slowly being lost as the languages that express it fade from sight He uses fascinating anecdotes and portraits of some of these languages last remaining speakers in order to demonstrate that this knowledge about ourselves and the world is inherently precious and once gone will be lost forever This knowledge is not only our cultural heritage oral histories poetry stories etc but very useful knowledge about plants animals the seasons and other aspects of the natural world not to mention our understanding of the capacities of the human mind Harrison's book is a testament not only to the pressing issue of language death but to the remarkable span of human knowledge and ingenuity It will fascinate linguists anthropologists and general readers

The Indexical Point of View Vojislav Bozickovic, 2020-10-22 This book argues that there is a common cognitive mechanism underlying all indexical thoughts in spite of their seeming diversity Indexical thoughts are mental representations such as beliefs and desires They represent items from a thinker's point of view or her cognitive perspective We typically express them by means of sentences containing linguistic expressions such as this F or that F adverbs like here now and today and the personal pronoun I While generally agreeing that representing the world from a thinker's cognitive perspective is a key feature of indexical thoughts philosophers disagree as to whether a thinker's cognitive perspective can be captured and rationalized by semantic content and if so what kind of content this is This book surveys competing views and then advances its own positive account Ultimately it argues that a thinker's cognitive perspective or her indexical point of view is to be explained in terms of the content that is believed and asserted as the only kind of content that there is which thereby serves as the bearer of cognitive significance The Indexical Point of View will be of interest to philosophers of mind and language linguists and cognitive scientists
