The Belief in Immortality and the Worship of the Dead (Complete) Sir James George Frazer, 2006-01-01 The subject of these lectures is a branch of natural theology By natural theology I understand that reasoned knowledge of a God or gods which man may be supposed whether rightly or wrongly capable of attaining to by the exercise of his natural faculties alone Thus defined the subject may be treated in at least three different ways namely dogmatically philosophically and historically We may simply state the dogmas of natural theology which appear to us to be true that is the dogmatic method Or secondly we may examine the validity of the grounds on which these dogmas have been or may be maintained that is the philosophic method Or thirdly we may content ourselves with describing the various views which have been held on the subject and tracing their origin and evolution in history that is the historical method The first of these three methods assumes the truth of natural theology the second discusses it and the third neither assumes nor discusses but simply ignores it the historian as such is not concerned with the truth or falsehood of the beliefs he describes his business is merely to record them and to track them as far as possible to their sources Now that the subject of natural theology is ripe for a purely dogmatic treatment will hardly I think be maintained by any one to whatever school of thought he may belong accordingly that method of treatment need not occupy us further Far otherwise is it with the philosophic method which undertakes to enquire into the truth or falsehood of the belief in a God no method could be more appropriate at a time like the present when the opinions of educated and thoughtful men on that profound topic are so unsettled diverse and conflicting A philosophical treatment of the subject might comprise a discussion of such questions as whether a natural knowledge of God is possible to man and if possible by what means and through what faculties it is attainable what are the grounds for believing in the existence of a God and if this belief is justified what may be supposed to be his essential nature and attributes and what his relations to the world in

general and to man in particular Now I desire to confess at once that an adequate discussion of these and kindred questions would far exceed both my capacity and my knowledge for he who would do justice to so arduous an enquiry should not only be endowed with a comprehensive and penetrating genius but should possess a wide and accurate acquaintance with the best accredited results of philosophic speculation and scientific research To such qualifications I can lay no claim and accordingly I must regard myself as unfitted for a purely philosophic treatment of natural theology To speak plainly the question of the existence of a God is too deep for me I dare neither affirm nor deny it I can only humbly confess my ignorance Accordingly if Lord Gifford had required of his lecturers either a dogmatic or a philosophical treatment of natural theology I could not have undertaken to deliver the lectures

Reading Lacan Jane Gallop, 2018-08-06 The influence of the French psychoanalyst Jacques Lacan has extended into nearly every field of the humanities and social sciences from literature and film studies to anthropology and social work yet Lacan's major text *Ecrits* continues to perplex and even baffle its readers In *Reading Lacan* Jane Gallop offers a novel approach to Lacan's work based on his own theories of language Lacan locates truth in the letter rather than in the spirit in the ways statements are expressed rather than in their intended meaning Gallop here grapples with six of Lacan's essays from *Ecrits* *The Seminar* *On the Purloined Letter* *The Mirror Stage* *The Freudian Thing* *The Agency of the Letter in the Unconscious* *The Signification of the Phallus* and *The Subversion of the Subject* While other commentators have chosen not to confront Lacan's notoriously problematic style in their discussions of his ideas Gallop addresses herself directly to the problem and the practice of reading Lacan She takes her direction from Lacan's view of subjectivity and offers a deeply personal feminist reading of *Ecrits* Concentrating on the relation of desire and interpretation she opens up the rich implications of Lacan's thought for psychoanalytic theory for the act of reading and for knowledge itself Forceful and revealing yet utterly candid about its own areas of uncertainty Gallop's book will be indispensable to readers of Lacan and to scholars and students who have felt his impact
