The Debate On Money In Europe:

The Debate on Money in Europe Alberto Giovannini, 1995 Contiene Background Fixed exchange rates and their evolution The arguments for Monetary Union and for the European Central Bank The delors report and the transition to Monetary Union Beyond transition **A Europe Made of Money** Emmanuel Mourlon-Druol, 2012-07-11 A Europe Made of Money is a new history of the making of the European Monetary System EMS based on extensive archive research Emmanuel Mourlon Druol highlights two long term processes in the monetary and economic negotiations in the decade leading up to the founding of the EMS in 1979 The first is a transnational learning process involving a powerful networked European monetary elite that shaped a habit of cooperation among technocrats The second stresses the importance of the European Council which held regular meetings between heads of government beginning in 1974 giving EEC legitimacy to monetary initiatives that had previously involved semisecret and bilateral negotiations The interaction of these two features changed the EMS from a fairly trivial piece of administrative business to a tremendously important political agreement The inception of the EMS was greeted as one of the landmark achievements of regional cooperation a major leap forward in the creation of a unified Europe Yet Mourlon Druol's account stresses that the EMS is much more than a success story of financial cooperation The technical suggestions made by its architects reveal how state elites conceptualized the larger project of integration And their monetary policy became a marker for the conception of European identity The unveiling of the EMS Mourlon Druol concludes represented the convergence of material interests and symbolic identity based concerns **Money and Power in Europe** Matthias Kaelberer, 2001-06-07 Traces the history of European monetary negotiations from the 1960s to the 1990s

The Debates and Proceedings in the Congress of the United States Joseph Gales, 1834 **The Debates and Proceedings in the Congress of the United States** United States. Congress, 1849 Images of Europe Francesco Mangiapane, Tiziana Migliore, 2021-05-20 This book deals with the fundamental semantics of images of Europe which consist of valences mirror beliefs and affectivities This is why it relaunches the importance of the European discourse in its symbolic dimension As such it explores the many images of Europe or rather the many images through which European discourse is actually constituted in daily life in search of their enunciative responsibility in today's world for determining the current State of the Union The identity of the European continent is based on a millenary tension between universalism and particularism images of Europe have in fact been alternately inspired over the centuries by a model of homogeneity Roman and Carolingian imperial disposition on the one hand and by a model of fragmentation a Europe of city states municipalities regions and small fatherlands on the other In the European Union a political and economic organism this issue has recently been amplified to the point that it has reentered public debate and political parties that are only recognizable for being Europeanists or anti Europeanists are now ubiquitous In this regard one major bone of contention is how to portray the quintessential aspects of the European territory which are either interpreted as thresholds to be overcome in the name of a

model of United Europe integral totality or are instead regarded as insurmountable obstacles for a Europe that is irreparably and perhaps according to anti Europeanists fortunately fragmented partitive totality Further this is to be done without excluding the possibility of contradictory and complementary solutions to these binary visions In this context the book analyzes various texts in order to obtain a more precise picture of the clash reveal its semiotic forms and by doing so identify a way out of the crisis

The Debate on NATO Enlargement United States. Congress. Senate. Committee on Foreign Relations,1998 *The Single Currency and European Citizenship* Giovanni Moro,2013-02-28 Established in 2002 the Euro is now the currency of 17 countries used by over 335 million people daily Although the single currency is much discussed in terms of macroeconomics and global finances policymakers rarely address its impact on European citizenship in social cultural political and everyday life economics terms This hidden side of the single currency is the focus of the essays which use various approaches from economic history and political sociology to citizenship and legitimacy to reveal the connections between the Euro and European citizenship This timely contribution by renowned experts provides a greater understanding of the Euro at a time when it is not clear whether it should be celebrated or commemorated and looks into aspects of the single currency that are the base of the social trust that supports it and that is at stake in the present crisis It will be an essential tool to anyone studying the political social and economic development of the E U
