Development Rainer K Silbereisen, Richard M Lerner, 2007-08-21 Scientific research and science guided practice based on the promotion of an individual s strengths constitutes a radical shift in a new and growing area of study within the field of human development Its trademark term is positive youth development This approach to human development is based on the idea that in addition to preventing problems science and practice should promote the development of competencies skills and motivation in order to enhance individuals developmental pathways Approaches to Positive Youth Development is based on this concept and brings together authors from across Europe and America who are leaders in their respective fields The main focus of the book beyond a clarification of the paradigmatic foundations concerns the major contexts of adolescents and young adults namely neighbourhoods and leisure locales school and family and the major themes of healthy psychosocial development namely competences and knowledge prosocial behaviour transcending problems of delinquency civic engagement identity agency and spirituality Approaches and Methods in Event Studies Tomas Pernecky, 2016-05-12

The recent proliferation of events as a subject of study in its own right has signalled the emergence of a new field event studies However whilst the management inspired notion of planned events which strives for conceptual slenderness may indeed be useful for event managers the moment we attempt to advance knowledge about events as social cultural and political phenomena we realise the extent to which the field is theoretically impoverished Event studies it is argued must transcend overt business like perspectives in order to grasp events in their complexities This book challenges the reader to reach beyond the established modes of thinking about events by placing them against a backdrop of much wider critical discourse Approaches and Methods in Event Studies emerges as a conceptual and methodological tour de force comprising the works of scholars of diverse backgrounds coming together to address a range of philosophical theoretical and methods related problems The areas covered include the concepts of eventification and eventual approaches to events a mobilities paradigm rhizomatic events critical discourse analysis visual methods reflexive and ethnographic research into events and indigenous acumen Researchers and students engaged in the study of events will draw much inspiration from the contributions and from the volume as a whole

Biblical Interpretation Yung Suk Kim, 2013-01-21 Yung Suk Kim asks important questions in Biblical Interpretation Why do we care about the Bible and biblical interpretation How do we know which interpretation is better He expertly brings to the fore the essential elements of interpretation the reader the text and the reading lens and attempts to explore a set of criteria for solid interpretation While celebrating the diversity of biblical interpretation Kim warns that not all interpretations are valid legitimate or healthy because interpretation involves the complex process of what he calls critical contextual biblical interpretation He suggests that readers engage with the text by asking important

Uprooting and Surviving Roberta Nannucci, 2012-12-06 The publication of this volume is significant in three respects First it represents a major concern of the international mental health movement in its effort to gain deeper understanding of migration and its mental health implications in our increasingly mobile modern societies Second it epitomizes continuous international cooperation of colleagues dedicated to the cause of tackling this important mental health problem Third it stands as another milestone in the growth of the World Federation for Mental Health through its biennial world congresses I sincerely hope that the empirical observations of real life events contained in this volume will stimulate others to add their

own experiences and perspectives on these topics at future congresses It is also hoped that certain models of problem solving reported by the collaborators of this book may find wider application and that the results will be communicated to others It is through such ensuing developments that the World Federation for Mental Health wishes to and can fulfill its roles of advocacy and international communication in promoting international mental health My gratitude goes to Richard Nann and his colleagues for having made this timely contribution available

Assessment Practices with Indigenous Children, Youth, Families, and Communities Shaun Murphy, Trudy Cardinal, Janice Huber, Stefinee Pinnegar, 2023-04-03

Language, Culture, and the Embodied Mind Joseph Shaules, 2019-12-04 There is an odd contradiction at the heart of language and culture learning Language and culture are so to speak two sides of a single coin language reflects the thinking values and worldview of its speakers Despite this there is a persistent split between language and culture in the classroom Foreign language pedagogy is often conceptualized in terms of gaining knowledge and practicing skills while cultural learning goals are often conceptualized in abstract terms such as awareness or criticality This book helps resolve this dilemma Informed by brain and mind sciences its core message is that language and culture learning can both be seen as a single interrelated process the embodiment of dynamic systems of meaning into the intuitive mind This deep learning process is detailed in the form of the Developmental Model of Linguaculture Learning DMLL Grounded in dynamic skill theory the DMLL describes four developmental levels of language and culture learning which represents a subtle yet important shift in language and culture pedagogy Rather than asking how to add culture into language education we should be seeking ways to make language and culture learning deeper more integrated embodied experiential and transformational This book provides a theoretical approach including practical examples for doing so

Intersections in Language Planning and Policy Jean Fornasiero, Sarah M. A. Reed, Rob Amery, Eric Bouvet, Kayoko Enomoto, Hui Ling Xu, 2020-09-28 This volume encompasses the range of issues encountered by language scholars who teach and research in departments of languages and cultures within the higher education system predominantly in Australia but touching other universities worldwide Related studies on language planning methodology or pedagogy have focused on one or more of these

same issues but rarely on their totality Intersections as a metaphor running discreetly through the essays in this volume connects them all to a lived reality The field of languages and cultures as it is practised and reflected upon in Australian universities is essentially an interdisciplinary and interconnecting space one in which linguistic and disciplinary diversities meet and join forces rather than collide or disperse along different pathways The international and local studies featured here focus on language planning new pedagogies and language reclamation and link to meeting points and commonalities They show that language scholars are increasingly finding themselves on common ground as they tackle issues of policy and practice affecting their field whether within their institutions within the tertiary system or within the framework of government policy
