The Deep North:

The Narrow Road to the Deep North Richard Flanagan, 2015-04-14 Winner of the Man Booker Prize Nothing since Cormac McCarthy's *The Road* has shaken me like this *The Washington Post* In *The Narrow Road to the Deep North* Richard Flanagan displays the gifts that have made him one of the most acclaimed writers of contemporary fiction Moving deftly from a Japanese POW camp to present day Australia from the experiences of Dorrigio Evans and his fellow prisoners to that of the Japanese guards this savagely beautiful novel tells a story of the many forms of love and death of war and truth as one man comes of age prospers only to discover all that he has lost *The Deep North* Fanny Howe, 1988 [Ocean](#) Wolf H. Berger, 2009-05-06 The past one hundred years of ocean science have been distinguished by dramatic milestones remarkable discoveries and major revelations This book is a clear and lively survey of many of these amazing findings Beginning with a brief review of the elements that define what the ocean is and how it works from plate tectonics to the thermocline and the life within it Wolf H Berger places current understanding in the context of history Essays treat such topics as beach processes and coral reefs the great ocean currents off the East and West Coasts the productivity of the sea and the geologic revolution that changed all knowledge of the earth in the twentieth century **Initial Reports of the Deep Sea Drilling Project**, 1984 **Metaphors of Confinement** Monika Fludernik, 2019-08-13 *Metaphors of Confinement* The Prison in Fact Fiction and Fantasy offers a historical survey of imaginings of the prison as expressed in carceral metaphors in a range of texts about imprisonment from Antiquity to the present as well as non penal situations described as confining or restrictive These imaginings coalesce into a carceral imaginary that determines the way we think about prisons just as social debates about punishment and criminals feed into the way carceral imaginary develops over time Examining not only English language prose fiction but also poetry and drama from the Middle Ages to postcolonial particularly African literature the book juxtaposes literary and non literary contexts and contrasts fictional and nonfictional representations of imprisonment and discussions about the prison as institution and experiential reality It comments on present day trends of punitivity and foregrounds the ethical dimensions of penal punishment The main argument concerns the continuity of carceral metaphors through the centuries despite historical developments that included major shifts in policy such as the invention of the penitentiary The study looks at selected carceral metaphors often from two complementary perspectives such as the home as prison or the prison as home or the factory as prison and the prison as factory The case studies present particularly relevant genres and texts that employ these metaphors often from a historical perspective that analyses development through different periods [Encyclopedia of Life Writing](#) Margaretta Jolly, 2013-12-04 First published in 2001 This is the first substantial reference work in English on the various forms that constitute life writing As this term suggests the Encyclopedia explores not only autobiography and biography proper but also letters diaries memoirs family histories case histories and other ways in which individual lives have been recorded and structured It includes entries on genres and subgenres national

and regional traditions from around the world and important auto biographical writers as well as articles on related areas such as oral history anthropology testimonies and the representation of life stories in non verbal art forms **Haiku, Other Arts, and Literary Disciplines** Toru Kiuchi,Yoshinobu Hakutani,2022-01-28 Haiku Other Arts and Literary Disciplines investigates the genesis and development of haiku in Japan and determines the relationships between haiku and other arts such as essay writing painting and music as well as the backgrounds of haiku such as literary movements philosophies and religions that underlie haiku composition By analyzing the poets who played major roles in the development of haiku and its related genres these essays illustrate how Japanese haiku poets and American writers such as Emerson and Whitman were inspired by nature especially its beautiful scenes and seasonal changes Western poets had a demonstrated affinity for Japanese haiku which bled over into other art mediums as these chapters discuss The Plays of Edward Bond Tony Coult,2025-05-30 First published in 1977 The Plays of Edward Bond offers help and stimulation to readers and theatre goers who want to know more about Edward Bond s recurrent concerns as a playwright In attempting to counter much of the received critical opinion about Bond s work Tony Coult sets out to show how Bond s attitudes to religion and superstition nature and politics the family and the individual are given brilliant theatrical form in the plays There are too chapters on the plays in performance dealing with language and stagecraft and on the often stormy history of Bond s relationship with the British Theatre This makes for a fresh and unusual approach to a playwright s work and one particularly situated to the closely related rational theatre of Edward bond This is a must read for scholars and researchers of theatre and performance studies and British theatre **Nitrogen in the Marine Environment** Douglas G. Capone,Deborah A. Bronk,Margaret R. Mulholland,Edward J. Carpenter,2008-08-15 Since the first edition of Nitrogen in the Environment published in 1983 it has been recognized as the standard in the field In the time since the book first appeared there has been tremendous growth in the field with unprecedented discoveries over the past decade that have fundamentally changed the view of the marine nitrogen cycle As a result this Second Edition contains twice the amount of information as contained in the first edition This updated edition is now available online offering searchability and instant multi user access to this important information The classic text fully updated to reflect the rapid pace of discovery Provides researchers and students in oceanography chemistry and marine ecology an understanding of the marine nitrogen cycle Available online with easy access and search the information you need when you need it **Early-Middle Pleistocene Transitions** Geological Society of London,2005 The Early Middle Pleistocene transition around 1.2 to 0.5 Ma marks a profound shift in Earth s climate state Low amplitude 41 ka climate cycles dominating the earlier part of the Pleistocene gave way progressively to a 100 ka rhythm of increased amplitude that characterizes our present glacial interglacial world This volume assesses the biotic and physical response to this transition both on land and in the oceans indeed it examines the very nature of Quaternary climate change Milankovitch theory palaeoceanography using isotopes and microfossils marine organic geochemistry tephrochronology the record of loess

and soil deposition terrestrial vegetational change and the migration and evolution of hominins as well as other large and small mammals are all considered These themes combine to explore the very origins of our present biota

Radioactivity and Pollution in the Nordic Seas and Arctic Olaf M. Johannessen, Vladimir A. Volkov, Lasse H. Pettersson, Helge Drange, Yongqi Gao, Vladimir S. Maderich, Ivan A. Neelov, Sven P. Nielsen, Leonid P. Bobylev, Andrey V. Stepanov, Mark J. Zheleznyak, Victor Tishkov, 2011-04-25 Polar Seas Oceanography describes a new tool called the Generic Model System for simulations and assessment of potential radioactive spreading in the Arctic regions through rivers estuaries regional seas and the Arctic and Atlantic basin It considers the present and future potential for spreading of radionuclear pollution from sources such as from the major Russian processing plants through Siberian rivers as well as from European sources such as the UK Sellafield plant The book provides support for decision making involving risk prevention forecasting and readiness for probable crises alerting and detection relief and mitigation and damage assessment The book combines the expertise of professionals from the radionuclear and climate change sciences

Heavy Metals in the Marine Environment Robert W. Furness, 2018-01-18 The aim of this volume is to draw together state of the art reviews of knowledge on levels of heavy metals in marine environments particularly in marine animals the dynamic processes in these systems toxic effects and threats presented by heavy metals in foods of marine origin All heavy metals whether biologically essential or not have the potential to be toxic to organisms at a threshold bioavailability Such threshold concentrations vary between metals between species and with the physicochemical characteristics of the medium some like copper being particularly toxic even though essential in trace amounts Responses of animals to metals in their medium or food depend to a large extent on the ability of species to regulate levels attained in their tissues Higher animals have the capacity to regulate levels of many metals while marine invertebrates can regulate some within certain limits Where animals cannot regulate physiological levels of metals an alternative strategy is to detoxify and store metals in relatively harmless forms Knowledge of the manner in which animals deal with potentially toxic concentrations of heavy metals is of fundamental importance in the assessment of metal pollution by analysis of metal levels in biological samples The interaction of heavy metals with biological materials is a key theme running through this volume Toxic effects may be reflected at the individual population or ecosystem level affecting species composition and production levels or may be of direct dietary significance to man The global cycling of metals through the marine environment is crucially affected by biological processes

Contemporary Australian Literature Nicholas Birns, 2015-12-01 Australia has been seen as a land of both punishment and refuge Australian literature has explored these controlling alternatives and vividly rendered the landscape on which they transpire Twentieth century writers left Australia to see the world now Australia's distance no longer provides sanctuary But today the global perspective has arrived with a vengeance In *Contemporary Australian Literature A World Not Yet Dead* Nicholas Birns tells the story of how novelists poets and critics from Patrick White to Hannah Kent from Alexis Wright to Christos Tsiolkas responded to this condition With

rancour concern and idealism modern Australian literature conveys a tragic sense of the past yet an abiding vision of the way forward Birns paints a vivid picture of a rich Australian literary voice one not lost to the churning of global markets but in fact given new life by it Contrary to the despairing of the critics Australian literary identity continues to flourish And as Birns finds it is not one thing but many In this remarkable bold and fearless book Nicholas Birns contests how literary cultures are read how they are constituted and what they stand for In examining the nature of the barriers between public and private utterance and looking outside the absurdity of the rules of genre Birns has produced a redemptive analysis that leaves hope for revivifying a world not yet dead John Kinsella Ice in the Climate System W. Richard Peltier, 2013-06-29 According to my latest model for the last glacial maximum LGM Grosswald 1988 the Arctic continental margin of Eurasia was glaciated by the Eurasian ice sheet which consisted of three interconnected ice domes the Scandinavian Kara and East Siberian The Kara Sea glacier was largely a marine ice dome grounded on the sea s continental shelf The ice dome discharged its ice in all directions northward into the deep Arctic Basin southward and westward onto the mainland of west central North Siberia the northern Russian Plain and over the Barents shelf into the Norwegian Greenland Sea On the Barents shelf the Kara ice dome merged with the Scandinavian ice dome In the Arctic Basin the discharged ice floated and eventually coalesced with the floating glacier ice of the North American provenance giving rise to the Central Arctic ice shelf Along its southern margin the Kara ice dome impounded the northward flowing rivers causing the formation of large proglacial lakes and their integration into a transcontinental meltwater drainage system Despite the constant increase in corroborating evidence the concept of a Kara ice dome is still considered debatable and the ice dome itself problematic As a result a paleogeographic uncertainty takes place which is aggravated by the fact that a great deal of existing knowledge no matter how broadly accepted is based on ambiguous interpretations of the data most of which are published in Russian and therefore not easily available to western scientists **Encyclopedia Britannica** Hugh Chisholm, 1911 **The Unicorn Woman** Gayl Jones, 2024-08-20 FINALIST FOR THE 2025 PULITZER PRIZE IN FICTION One of our greatest living authors Lauren LeBlanc The Boston Globe Marking a dramatic new direction for Jones a riveting tale set in the Post WWII South narrated by a Black soldier who returns to Jim Crow and searches for a mythical ideal Set in the early 1950s this latest novel from Pulitzer Prize and National Book Award finalist Gayl Jones follows the witty but perplexing army veteran Buddy Ray Guy as he embodies the fate of Black soldiers who return not in glory but into their Jim Crow communities A cook and tractor repairman Buddy was known as Budweiser to his army pals because he s a wise guy But underneath that surface he is a true self educated intellectual and a classic seeker looking for religion looking for meaning looking for love As he moves around the south from his hometown of Lexington Kentucky primarily to his second home of Memphis Tennessee he recalls his love affairs in post war France and encounters with a variety of colorful characters and mythical prototypes circus barkers topiary trimmers landladies who provide shelter and plenty of advice for their all Black clientele proto feminists and bigots The lead among these characters is of course The

Unicorn Woman who exists but mostly lives in Bud's private mythology Jones offers a rich intriguing exploration of Black and Indigenous people in a time and place of frustration disappointment and spiritual hope **1940 E.W. Scripps Cruise to the Gulf of California** Charles A. Anderson, J. Wyatt Durham, Francis P. Shepard, M.L. Natland, and Roger Revelle,

Ocean Dynamics and the Carbon Cycle Richard G. Williams, Michael J. Follows, 2011-07-14 This textbook for advanced undergraduate and graduate students presents a multidisciplinary approach to understanding ocean circulation and how it drives and controls marine biogeochemistry and biological productivity at a global scale Background chapters on ocean physics chemistry and biology provide students with the tools to examine the range of large scale physical and dynamic phenomena that control the ocean carbon cycle and its interaction with the atmosphere Throughout the text observational data is integrated with basic physical theory to address cutting edge research questions in ocean biogeochemistry Simple theoretical models data plots and schematic illustrations summarise key results and connect the physical theory to real observations Advanced mathematics is provided in boxes and appendices where it can be drawn on to assist with the worked examples and homework exercises available online Further reading lists for each chapter and a comprehensive glossary provide students and instructors with a complete learning package **After the Dinosaurs** Donald R. Prothero, 2018-11-01

A fascinating study of the thousands of new animal species that walked in the footsteps of the dinosaurs and the climate changes that brought them forth The fascinating group of animals called dinosaurs became extinct some 65 million years ago except for their feathered descendants In their place evolved an enormous variety of land creatures especially mammals which in their way were every bit as remarkable as their Mesozoic cousins The Age of Mammals the Cenozoic Era has never had its Jurassic Park but it was an amazing time in earth's history populated by a wonderful assortment of bizarre animals The rapid evolution of thousands of species of mammals brought forth many incredible creatures including our own ancestors Their story is part of a larger story of new life emerging from the greenhouse conditions of the Mesozoic warming up dramatically about 55 million years ago and then cooling rapidly so that 33 million years ago the glacial ice returned The earth's vegetation went through equally dramatic changes from tropical jungles in Montana and forests at the poles Life in the sea underwent striking evolution reflecting global climate change including the emergence of such creatures as giant sharks seals sea lions dolphins and whales Engaging and insightful After the Dinosaurs is a book for everyone who has an abiding fascination with the remarkable life of the past **The Ocean Carbon Cycle and Climate** Mick Follows, Temel Oguz, 2012-12-06

Our desire to understand the global carbon cycle and its link to the climate system represents a huge challenge These overarching questions have driven a great deal of scientific endeavour in recent years What are the basic oceanic mechanisms which control the oceanic carbon reservoirs and the partitioning of carbon between ocean and atmosphere How do these mechanisms depend on the state of the climate system and how does the carbon cycle feed back on climate What is the current rate at which fossil fuel carbon dioxide is absorbed by the oceans and how might this change

in the future To begin to answer these questions we must first understand the distribution of carbon in the ocean its partitioning between different ocean reservoirs the solubility and biological pumps of carbon the mechanisms controlling these reservoirs and the relationship of the significant physical and biological processes to the physical environment The recent surveys from the JGOFS and WOCE Joint Global Ocean Flux Study and World Ocean Circulation Experiment programs have given us a first truly global survey of the physical and biogeochemical properties of the ocean These new high quality data provide the opportunity to better quantify the present oceans reservoirs of carbon and the changes due to fossil fuel burning In addition diverse process studies and time series observations have clearly revealed the complexity of interactions between nutrient cycles ecosystems the carbon cycle and the physical environment
