Essentials of Econophysics Modelling Frantisek Slanina, 2014 This book is a course in methods and models rooted in physics and used in modelling economic and social phenomena It covers the discipline of econophysics which creates an interface between physics and economics Besides the main theme it touches on the theory of complex networks and simulations of social phenomena in general After a brief historical introduction the book starts with a list of basic empirical data and proceeds to thorough investigation of mathematical and computer models Many of the models are based on hypotheses of the behaviour of simplified agents These comprise strategic thinking imitation herding and the gem of econophysics the so called minority game At the same time many other models view the economic processes as interactions of inanimate particles Here the methods of physics are especially useful Examples of systems modelled in such a way include books of stock market orders and redistribution of wealth among individuals Network effects are investigated in the interaction of economic agents The book also describes how to model phenomena like cooperation and emergence of consensus The book will be of benefit to graduate students and researchers in both Physics and Economics

Piracy and Maritime Terrorism Silvia Ciotti Galletti, 2012 For much of history pirates and buccaneers constituted one of the most serious threats to maritime activities all over the world More recently apart from adventure stories and swashbuckling films maritime piracy was largely thought of as a thing of the past This began to change in 1994 when an article in the Far Eastern Economic Review drew public attention to the renaissance of a phenomenon piracy was back and it was becoming increasingly violent involving huge ships in international waters This book is based on the proceedings of the NATO Advanced Research Workshop held in 2009 in Lisbon Portugal Its main purpose was to promote dialogue on the phenomenon of maritime piracy between international policymakers law enforcement officers port authorities and other professionals and to provide a response to the need for research and analysis at an international level on maritime piracy and its connection to terrorism The book does not simply report on the proceedings of the workshop but also includes some new topics not covered by the ARW and is organized in three sections new methodological approaches to maritime threats new threats and new challenges in piracy and maritime terrorism and lastly some selected case studies different threats different solutions The book offers qualified ideas opinions and talking points to the international practitioner community will foster debate and help law enforcement agencies and policymakers to face the new world wide

maritime threats of piracy and terrorism **China's Pan-Pearl River Delta** Anthony G. O. Yeh, Jiang Xu, 2010-06-01 Cities and regions in Asia are facing problems that cannot be adequately managed by traditional urban planning Competition and local protectionism have often hindered infrastructural development and regional integration In southern China an area embracing one fifth of China and one third of its population the economies and societies of nine provinces together with Hong Kong and Macao face many barriers to regional collaboration Fiscal regulatory conflicts land and housing reform and bottlenecks in immigration and transport have stymied efforts to develop infrastructure that could spur economic growth and greater prosperity for the entire region This book examines regional integration and its barriers in southern China in a comparative framework using perspectives on development and globalization from Europe and North America With its contributions from leading researchers and practitioners in the field the book will appeal to students academics and policymakers interested in urban and regional planning geography sociology public administration and development studies Anthony G O Yeh is chair professor and head of the Department of Urban Planning and Design and director of the Centre of Urban Studies and Urban Planning the University of Hong Kong Jiang Xui is assistant professor in the Department of Geography and Resource Management the Chinese University of Hong Kong A timely and much needed volume on a region of growing importance Supported by helpful maps and charts this collection discusses the theory challenges and practice of development in an area comprising nearly a third of China's population The comparative framework drawing on experiences from Europe and the United States is particularly valuable Linda McCarthy co author of *Urbanization An Introduction to Urban Geography* *The Flood Year 1927* Susan Scott Parrish, 2018-12-04 A richly nuanced cultural history of the Great Mississippi flood The Great Mississippi Flood of 1927 was the most destructive river flood in U S history drowning crops and displacing more than half a million people across seven states It was also the first environmental disaster to be experienced virtually on a mass scale The Flood Year 1927 draws from newspapers radio broadcasts political cartoons vaudeville blues songs poetry and fiction to show how this event provoked an intense and lasting cultural response Americans at first seemed united in what Herbert Hoover called a great relief machine but deep rifts soon arose Southerners pointing to faulty federal levee design decried the attack of Yankee water The condition of African American evacuees prompted comparisons to slavery from pundits like W E B Du Bois and Ida B Wells And environmentalists like Gifford Pinchot called the flood the most colossal blunder in civilized history Susan Scott Parrish examines how these and other key figures from entertainers Will Rogers Miller Lyles and Bessie Smith to authors Sterling Brown William Faulkner and Richard Wright shaped public awareness and collective memory of the event The crises of this period that usually dominate historical accounts are war and financial collapse but *The Flood Year 1927* allows us to assess how mediated environmental disasters became central to modern consciousness Engineering , 1893 **Contrasting School Culture and Education** V. Sucharita, 2023-05-31 This book presents a comparative ethnographic understanding of government and low fee private schools in India within the

context of ever increasing privatization and commercialization of education and the growing presence of non state actors Drawing on rich empirical data the book provides an ethnographic account of a government and a low fee private school in Hyderabad India and explores life in these two distinct spaces through the lens of culture While private schools catering to the poorer sections have been proliferating little is known about how these low fee private schools operate how choices and negotiations unfold the classroom discourses subjective meanings of different stakeholders and the kind of education provided in these schools vis vis the government schools The book focuses on the educational experiences schooling choices processes and voices of the children and teachers at these schools to reflect on how school culture influences the quality of education Based on intensive fieldwork and qualitative data the book provides contextual insights into what exactly happens inside the schools and classrooms of two contrasting schooling provisions in India and helps understand the world views of different stakeholders as they negotiate their daily lives The book will be of interest to students researchers and teachers of education sociology of education childhood studies urban education and teacher education It will also be useful for education policymakers educationists education professionals and those working on private schooling in India
