The Delusion Of Cure:

Comic Cure for Delusional Democracy Gene Fendt, 2014-07-16 This book shows how the discussion of Plato's Republic is a comic mimetic cure for civic and psychic delusion. Plato creates such pharmaka or noble lies for reasons enunciated by Socrates within the discussion but this indicates Plato must think his readers are in the position of needing the catharses such fictions produce. Socrates' interlocutors must be like us. Since cities are like souls and souls come to be as they are through mimesis of desires, dreams, actions, and thought patterns in the city, we should expect that political theorizing often suffers from madness as well. It does. Gene Fendt shows how contemporary political and psychological theory still suffers from the same delusion. Socrates' interlocutors reveal in their discussion a dream of autarchia called possessive individualism. Plato has good reason to think that only a mimetic rather than a rational and philosophical cure can work. Against many standard readings, *Comic Cure for Delusional Democracy* shows that the Republic itself is a defense of poetry that Kallipolis cannot be the best city and is not Socrates' ideal that there are six forms of regime, not five, and that the true philosopher should not be unhappy to go back down into Plato's cave.

By H. W. Chase. Sigmund Freud (1856-1939) was an Austrian neurologist and the father of psychoanalysis, a clinical method for treating psychopathology through dialogue between a patient and a psychoanalyst. In creating psychoanalysis, Freud developed therapeutic techniques such as the use of free association and discovered transference, establishing its central role in the analytic process. Freud's redefinition of sexuality to include its infantile forms led him to formulate the Oedipus complex as the central tenet of psychoanalytical theory. His analysis of dreams as wish fulfillments provided him with models for the clinical analysis of symptom formation and the mechanisms of repression, as well as for elaboration of his theory of the unconscious. Freud postulated the existence of libido, an energy with which mental processes and structures are invested and which generates erotic attachments, and a death drive, the source of
