Alcohol: No Ordinary Commodity Thomas F. Babor, Sally Casswell, Kathryn Graham, Taisia Huckle, Michael Livingston, Esa Österberg, Jürgen Rehm, Robin Room, Ingeborg Rossow, Bundit Sornpaisarn, 2022-10-31. *Alcohol: No Ordinary Commodity* is a collaborative effort by an international group of addiction scientists to improve the linkages between addiction science and alcohol policy. It presents in a comprehensive, practical and readily accessible form the accumulated scientific knowledge on alcohol research that has a direct relevance to the development of alcohol policy on local, national and international levels. It provides an objective basis on which to build relevant policies globally and informs policy makers who have direct responsibility for public health and social welfare. By locating alcohol policy primarily within the realm of public health, this book draws attention to the growing tendency for governments both national and local to consider alcohol misuse as a major determinant of ill health and to organize societal responses accordingly. The scope of the book is comprehensive and global. The authors describe the conceptual basis for a rational alcohol policy and present new epidemiological data on the global dimensions of alcohol misuse. The core of the book is a critical review of the cumulative scientific evidence in seven general areas of alcohol policy: pricing and taxation; regulating the physical availability of alcohol; modifying the environment in which drinking occurs; drinking driving; countermeasures; marketing restrictions; primary prevention programs in schools and other settings; and treatment and early intervention services. The final chapters discuss the current state of alcohol policy in different parts of the world and describe the need for a new approach to alcohol policy that is evidence based, global and coordinated. A valuable resource for those involved in addiction science and drug policy as well as those in the wider fields of public health, health policy, epidemiology and practising clinicians.

A Cannabis Reader European Monitoring Centre for Drugs and Drug Addiction, 2008. In Volume 1 we can read an autobiographical article on events in the United Kingdom in the late 1960s; recent cannabis developments in the EU's new Member States; the cannabis resin trade linking Morocco to northern Europe; the closure of Pusher Street in the Copenhagen commune of Christiania; and information on how coffee shops developed in the Netherlands. While these articles focus only on smaller pieces of the cannabis puzzle, they provide insights into the many different ways Europe has dealt with cannabis.
