

# Communication milestones

## At 12 months children can usually...

- understand about 10 words
- respond to their name
- recognise greetings and gestures, such as 'hi' and 'bye-bye'
- recognise a few familiar people and objects (e.g., mummy, blanket, teddy)
- make eye contact

When you talk to me, WAIT for me to respond before you say more.

- start to use sounds, gestures, and say a few words
- continue to babble
- copy different sounds and noises

## At 18 months children can usually...

- understand up to 50 words and some short phrases
- follow simple instructions (e.g., 'throw the ball')
- point to familiar objects when named
- point to some pictures in familiar books

Get face-to-face with me when we communicate.

- say 5 to 20 single words – some easier to understand than others, but becoming more consistent
- copy lots of words and noises
- name a few body parts
- use objects in pretend play (e.g., hold toy phone to their ear and say 'hello')

## At 2 years children can usually...

- follow simple two part instructions (e.g., 'give me the ball and the car')
- respond to simple wh-questions, such as 'what' and 'where'
- point to several body parts and pictures in books when named
- understand when an object is 'in' and 'on' something

- say more than 50 single words
- put two words together (e.g., 'bye teddy', 'no ball')
- use their tone of voice to ask a question (e.g., 'teddy go?')
- say 'no' when they do not want something
- use most vowel sounds and a variety of consonants (m, n, p, b, k, g, h, w, l, d)
- start to use 'mine' and 'my'

## At 3 years children can usually...

- follow more complex two part instructions (e.g., 'give me the teddy and throw the ball')
- understand simple wh-questions, such as 'what', 'where' and 'who'
- understand the concepts of 'same' and 'different'
- sort items into groups when asked (e.g., toys vs food)
- recognise some basic colours

Figure out what I want to say and put it into words for me...

- say four to five words in a sentence
- use a variety of words for names, actions, locations and descriptions
- ask questions using 'what', 'where' and 'who'
- talk about something in the past, but may use '-ed' a lot (e.g., 'he good there')
- have a conversation, but may not take turns or stay on topic

## At 4 years children can usually...

- answer most questions about daily tasks
- understand most wh-questions, including those about a story they have recently heard
- understand some numbers
- show an awareness that some words start or finish with the same sounds

No need to always read the whole book. Talk about pictures that interest me.

- use words, such as 'and', 'but' and 'because', to make longer sentences
- describe recent events, such as morning routines
- ask lots of questions
- use personal pronouns (e.g., 'he/she, me/you') and negations (e.g., 'don't/can't')
- count to five and name a few colours

## At 5 years children can usually...

- follow three part instructions (e.g., 'put on your shoes, get your backpack and line up outside')
- understand time related words (e.g., 'before', 'after', 'now' and 'later')
- start thinking about the meaning of words when learning
- understand instructions without stopping to listen
- begin to recognise some letters, sounds and numbers

- use well formed sentences to be understood by most people
- take turns in increasingly longer conversations
- tell simple, short stories with a beginning, middle and end
- use past and future verbs correctly (e.g., 'went', 'will go')
- use most speech sounds, but still may have difficulties with 'y', 'v', 't' and 'th'

## **The Development Of Role-taking And Communication Skills In Children:**

**The Development of Role-taking and Communication Skills in Children** John H. Flavell, Patricia T. Botkin, 1968

*The Development of Role-taking and Communication Skills in Children* [by] John H. Flavell, in Collaboration with Patricia T. Botkin [and Others]. John H. Flavell, 1968      Developing Theories of Mind Janet W. Astington, Paul L. Harris, David R.

Olson, 1988 A collection of empirical reports and conceptual analyses written by leading researchers in an exciting new area of the cognitive sciences The book examines a fundamental change that occurs in children's cognition between the ages of two and six      **The Development of Role-taking and Communication Skills in Children. [By] John H. Flavell [and Others], Etc** John Hurley FLAVELL, 1968      **Development of Nonverbal Behavior in Children** R. S. Feldman, 2013-03-14

When I organized a symposium on the development of nonverbal behavior for the 1980 meeting of the American Psychological Association I was faced with an embarrassment of riches Thinking about the many people who were doing important and interesting research in this area it was hard to narrow down the choice to just a few Eventually I put together a panel which at least was representative of this burgeoning area of research In planning this volume two years later I was faced with much the same predicament except to an even larger degree For during that short period the area of children's nonverbal behavior came to grow even larger with more perspectives being brought to bear on the question of the processes involved in the development of children's nonverbal behavior The present volume attempts to capture these advances which have occurred as the field of children's nonverbal behavior has moved from its own infancy into middle childhood The book is organized into five major areas representative of the most important approaches to the study of children's nonverbal behavior 1

Psychobiological and ethological approaches 2 social developmental approaches 3 encoding and decoding skill approaches 4 discrepant verbal nonverbal communication approaches and 5 personality and individual difference approaches The discreteness of these categories should not be overemphasized as there is a good deal of overlap between the various approaches Nonetheless they do represent the major areas of interest in the field of the development of nonverbal behavior in children      **The Child's Discovery of the Mind** Janet W. Astington, 1993 Three year old Emily greets her grandfather at the front door We're having a surprise party for your birthday And it's a secret We may smile at incidents like these but they illustrate the beginning of an important transition in children's lives their development of a theory of mind Emily certainly has some sense of her grandfather's feelings but she clearly doesn't understand much about what he knows and surprises like secrets tricks and lies all depend on understanding and manipulating what others think and know Jean Piaget

investigated children's discovery of the mind in the 1920s and concluded that they had little understanding before the age of six But over the last twenty years researchers have begun to challenge his methods and revise his conclusions In *The Child's Discovery of the Mind* Janet Astington surveys this lively area of research in developmental psychology Sometime between the ages of two and five children begin to have insights into their own mental life and those of others They begin to

understand mental representation that there is a difference between thoughts in the mind and things in the world between thinking about eating a cookie and eating a cookie This breakthrough reflects their emerging capacity to infer other people's thoughts, wants, feelings and perceptions from words and actions They come to understand why people act the way they do and can predict how they will act in the future so that by the age of five they are knowing participants in social interaction Astington highlights how crucial children's discovery of the mind is in their social and intellectual development by including a chapter on autistic children who fail to make this breakthrough Mind is a cultural construct that children discover as they acquire the language and social practices of their culture enabling them to make sense of the world Astington provides a valuable overview of current research and of the consequences of this discovery for intellectual and social development

Social-Cognitive Development in Context Felicisima C. Serafica, 2015-06-19 The relationship between the cognitive and social spheres of human functioning and their context has long been regarded by social and behavioural scientists as a central theoretical issue By the early 1980s a number of empirical studies had further elucidated the nature of this relationship but no attempt had been made to present a coherent picture of the research and developments in this increasingly popular area of study Originally published in 1982 the topics covered in this book filled the gap admirably They present a view of the development of aspects of the self and of self-other relations and how these two lines of development interact within a given context All the contributions attempt to portray the child's developing awareness of the self in relation to the social world but all consider it from different perspectives and in varying degrees of detail This useful collection by a number of well-known contributors should still be of great value to students of developmental and social psychology

**Handbook of Cognitive, Social, and Neuropsychological Aspects of Learning Disabilities** Stephen J. Ceci, 2013-01-11 Recognized as the definitive reference in the field this book addresses a broad range of biologically based disorders that affect children's learning and development Leading authorities review the genetics of each disorder its course and outcome associated developmental cognitive and psychosocial challenges and what clinicians and educators need to know about effective approaches to assessment and intervention Coverage encompasses numerous lower incidence neurodevelopmental disabilities as well as more frequently diagnosed learning and behavior problems with a genetic component

**Research Manual in Child Development** Lorraine Nadelman, 2003-10-03 This unique hands-on lab manual in child development provides great ideas and resources for teaching research courses involving child subjects It includes projects in psychomotor perceptual cognitive and social development Projects are preceded by background essays on the history of that topic related research theoretical issues and controversies Each project has hypotheses to test detailed procedures to follow all stimuli individual and group data sheets empty tables suggested statistics discussion questions and an updated bibliography Special features of this second edition The introductory text portion details research considerations including an introduction to psychological research sections on developmental research children as subjects and general

experimental research procedures The popular Infant Observation project has the student visit homes with babies for a semester and provides practice in observational data collection reliability assessment and report writing The cognitive development section includes two new subfields Theory of Mind and Language Children s Interpretation of the Word Big in addition to classic studies of Piaget s spatial perspective taking and attention and memory The final chapter describes a suggested neuropsychological project The socialized child section includes a new study on sibling relationships as seen by the older or younger sibling in addition to the earlier projects on self esteem sex identity and cooperation competition The final section describes a suggested cross cultural interview project

Hugh Rosen, 1980 Home to the New York Yankees the Bronx Zoo and the Grand Concourse the Bronx was at one time a haven for upwardly mobile second generation immigrants eager to leave the crowded tenements of Manhattan in pursuit of the American dream Once hailed as a wonder borough of beautiful homes parks and universities the Bronx became during the 1960s and 1970s a national symbol of urban deterioration Thriving neighborhoods that had long been home to generations of families dissolved under waves of arson crime and housing abandonment turning blocks of apartment buildings into gutted graffiti covered shells and empty trash filled lots In this revealing history of the Bronx Evelyn Gonzalez describes how the once infamous New York City borough underwent one of the most successful and inspiring community revivals in American history From its earliest beginnings as a loose cluster of commuter villages to its current status as a densely populated home for New York s growing and increasingly more diverse African American and Hispanic populations this book shows how the Bronx interacted with and was affected by the rest of New York City as it grew from a small colony on the tip of Manhattan into a sprawling metropolis This is the story of the clattering of elevated subways and the cacophony of crowded neighborhoods the heady optimism of industrial progress and the despair of economic recession and the vibrancy of ethnic cultures and the resilience of local grassroots coalitions crucial to the borough s rejuvenation In recounting the varied and extreme transformations this remarkable community has undergone Evelyn Gonzalez argues that it was not racial discrimination rampant crime postwar liberalism or big government that was to blame for the urban crisis that assailed the Bronx during the late 1960s Rather the decline was inextricably connected to the same kinds of social initiatives economic transactions political decisions and simple human choices that had once been central to the development and vitality of the borough Although the history of the Bronx is unquestionably a success story crime poverty and substandard housing still afflict the community today Yet the process of building and rebuilding carries on and the revitalization of neighborhoods and a resurgence of economic growth continue to offer hope for the future *Social Development in Youth: Structure and Content*
