# The History Of Creation And Origin Of The Species A Scientific Theological Viewpoint

**Wendell R. Bird**

## **The History Of Creation And Origin Of The Species A Scientific Theological Viewpoint:**

History of Creation and Origin of the Species Reuben Luther Katter, 1984-01-01      *Understanding Scientific Theories of Origins* Robert C. Bishop, Larry L. Funck, Raymond J. Lewis, Stephen O. Moshier, John H. Walton, 2018-12-04 From five authors with over two decades of experience teaching origins together in the classroom this is the first textbook to offer a full fledged discussion of the scientific narrative of origins from the Big Bang through humankind from biblical and theological perspectives This work gives the reader a detailed picture of mainstream scientific theories of origins along with how they fit into the story of God's creative and redemptive action      **Subject Guide to Books in Print**, 1993      **Story of Creation as Told by Theology and by Science** Thomas Suter Ackland, 2020-09-28 The History of the Creation with which the Bible commences is not a mere incidental appendage to God's Revelation but constitutes the foundation on which the whole of that Revelation is based Setting forth as it does the relation in which man stands to God as his Maker and to the world which God formed for his abode it forms a necessary introduction to all that God has seen fit to reveal to us with reference to His dispensations of Providence and of Grace It is however not uncommonly asserted that this history cannot be reconciled with a vast number of facts which modern science has revealed to us and with theories based on observed facts and recommended by the unquestioned ability of the men by whom they have been brought forward At first sight there does seem to be some ground for this assertion Geology for instance makes us acquainted with strata of rock of various kinds arranged in exact order and of an aggregate thickness of many miles which are filled with the remains of a wonderful series of plants and animals these remains not being promiscuously collected but arranged in an unvarying order It seems impossible that all these plants and animals could have lived and died and been imbedded in the rocks in this exact succession in six of our ordinary days Astronomy directs our attention to changes now going on in the starry heavens which occupy ages in their development and points to traces in the constitution of our own world which seem to indicate that it was formed by analogous means Physiology reveals to us the fact that the different varieties of plants and animals now in existence are not separated from each other by well defined lines of demarcation but shade into each other by almost imperceptible gradations and geological researches show that while the existing species of animals are the representatives of those which lived and died at a period in which we can find no traces of man they are not identical with them but that either the old species must have died out and been replaced by a fresh creation or a considerable change must have taken place in the course of ages These facts are held to be incompatible with the account of creation given by Moses and hence it is inferred that a record which appears to be so widely at variance with admitted facts cannot be entitled to the authority which is claimed for it as a fundamental portion of a Revelation made by the Creator Himself This difficulty is sometimes met by the assertion that the Bible was not given to us to teach us Science but to convey to us certain information which was essential to our moral welfare and which we could not obtain by any other means that these discrepancies do not in any way interfere with that

portion of those truths which is involved in the History of Creation but that however the narrative may be viewed as far as regards its details the facts that God is the Creator of all things visible and invisible that He is a Being of infinite Wisdom Power and Love and that He has placed man in a peculiar relation to Himself remain unaffected On this ground it is often urged that we may pass over scientific inaccuracies as matters of no great importance *Creation/evolution* ,1994

*Theology of Creation* Peter Damian Fehlner OFM Conv.,2023-10-19 Theology of Creation volume seven of the Collected Essays of Peter Damian Fehlner presents Fehlner s writings on creation spanning forty years of reflection Emphasizing the dogmatic Fehlner presents an accessible yet rigorous analysis of the key assumptions missteps ambiguities and plain equivocations that have given rise to so much controversy since the appearance of Darwin s 1859 On the Origin of Species Basing himself firmly on theological and metaphysical foundations that must be maintained and clarified in order to provide a coherent and faithfully Catholic account of the origins and purposes of the created order Fehlner clarifies the concept of creation addresses the distinction between scientific theological and metaphysical taxonomies and points to the Marian mode of the Incarnation as the key for disentangling valid from invalid or ambiguous conceptions of creation and evolution Throughout these essays Fehlner strives to present scientific claims in a clear and concise manner while adhering closely to the method and metaphysical insights of Augustine Bonaventure John Duns Scotus and Maximilian Kolbe These essays present a fascinating window into the evolution of the thinking of an outstanding theologian and metaphysician wrestling with profoundly impactful questions both within and beyond the borders of the church *Paperbound Books in Print* ,1992

Three Views on Creation and Evolution Zondervan,2010-06-01 For Christians the issues raised by the different views on creation and evolution are challenging Can a young earth be reconciled with a universe that appears to be billions of years old Does scientific evidence point to a God who designed the universe and life in all its complexity Three Views on Creation and Evolution deals with these and similar concerns as it looks at three dominant schools of Christian thought Proponents of young earth creationism old earth creationism and theistic evolution each present their different views tell why the controversy is important and describe the interplay between their understandings of science and theology Each view is critiqued by various scholars and the entire discussion is summarized by Phillip E Johnson and Richard H Bube The Counterpoints series provides a forum for comparison and critique of different views on issues important to Christians Counterpoints books address two categories Church Life and Bible and Theology Complete your library with other books in the Counterpoints series **Proceedings, American Philosophical Society (vol. 127, No. 6, 1983) ,    The Origin of Species Revisited: Philosophy of science, philosophy of religion, history, education, and constitutional issues** Wendell R. Bird,1991 Presents an in depth comparison of Darwin s theory of evolution versus the theory of creation and the theory of abrupt appearance
