The Holistic Inspirations Of Physics The Underground History Of Electromagnetic Theory:

The Holistic Inspirations of Physics Val Dusek, 1999 While many books have claimed parallels between modern physics and Eastern philosophy none have dealt with the historical influences of both Chinese traditional thought and non mechanistic holistic western thought on the philosophies of the scientists who developed electromagnetic field theory In *The Holistic Inspirations of Physics* R Valentine Dusek asks to what extent is classical field theory a product of organic and holistic philosophies and frameworks Electromagnetic theory has been greatly influenced by holistic worldviews Dusek posits and he highlights three alternative scientific systems that made the development of electromagnetic theory possible medieval Chinese science Western Renaissance occultism and the German romantic traditions He situates these alternative approaches in their social context and background and traces their connection with components of accepted physical science in relation to a number of social movements and philosophical theories Readers will learn of specific contributions made by these alternative traditions such as the Chinese inventing the compass and discovering the earth s magnetic field and magnetic declination Western alchemical ideas of active forces and occult influences contributed to Newton s theory of gravitation force as action at a distance rather as a result of purely mechanical collisions and contact action Dusek also describes the extent to which women s culture supplied often without credit the philosophical background ideas that were absorbed into mainstream field theory

Holism Christian McMillan, Roderick Main, David Henderson, 2019-12-06 *Holism Possibilities and Problems* brings together leading contributors in a ground breaking discussion of holism The terms holism and holistic arouse strong emotional responses in contemporary culture whether this be negative or positive and the essays in this interdisciplinary collection probe each in its own way the possibilities and problems inherent in thinking holistically Christian McMillan Roderick Main and David Henderson bring together established academics and emerging scholars across subject areas and disciplinary approaches to reveal the multiplicity and complexity of issues involved in holism Divided into four parts the chapters determine key strands of thinking explicitly or implicitly underpinning contemporary holistic thought including what ethical conclusions might most reasonably be drawn from such thought Accessible and diverse this extensive volume contains chapters from the perspective of history ecology psychotherapy poetry mythology and an especially strong representation of continental philosophy and Jungian depth psychology Due to its multi disciplinary nature the book represents an unparalleled discussion of the meanings and implications of holism Written by an innovative and international calibre of contributors this pioneering collection will be essential reading for practitioners in depth psychology and scholars of Jungian studies as well as academics and students of philosophy religious studies spirituality history and the history of ideas The book is a rich resource for the enhancement of critical reflection among all those with an interest in holism

David Bohm: Causality and Chance, Letters to Three Women Chris Talbot, 2017-04-17 The letters transcribed in this book were written by physicist David Bohm to three close female acquaintances in the period 1950 to 1956 They provide a

background to his causal interpretation of quantum mechanics and the Marxist philosophy that inspired his scientific work in quantum theory probability and statistical mechanics In his letters Bohm reveals the ideas that led to his ground breaking book Causality and Chance in Modern Physics The political arguments as well as the acute personal problems contained in these letters help to give a rounded human picture of this leading scientist and twentieth century thinker

Transdisciplinary Thinking and Acting Mathias Schüz, 2025-03-22 Complex problems can only be overcome with complex solutions This dictum by Albert Einstein also applies to current world problems such as climate change species extinction the littering of our planet and the growing gap between rich and poor They overwhelm individual scientific disciplines Therefore they can only be solved through transdisciplinarity i.e. beyond the individual disciplines in interaction with empirical knowledge of different provenance and philosophical reflection This first volume of the book series Transdisciplinary Management of Social and Ecological Crises explains how transdisciplinarity is to be understood in general what approaches exist and how they contribute to solving the various world problems In this context the book addresses among other things the replacement of man's claim to dominion over nature the overcoming of culturally determined boundaries in human communities and integrative and agile management methods in business politics art and society It deals with a sustainable circular economy new forms of politics in the interest of all instead of a few learning from artists healthy and environmentally sound nutrition and spiritual mindfulness in dealing with oneself and other ways of life Thus the book is aimed at a broad audience from different disciplines interested in the perspective of and interaction with other disciplines to solve global problems Chapter Methodology of Transdisciplinarity Levels of Reality Logic of the Included Middle and Complexity is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com **Untying the Gordian Knot** Timothy E. Eastman, 2020-12-10 In *Untying the Gordian Knot Process Reality and Context* Timothy E. Eastman proposes a new creative synthesis the Logoi framework which is radically inclusive and incorporates both actuality and potentiality to show how the fundamental notions of process logic and relations woven with triads of input output context and quantum logical distinctions can resolve a baker's dozen of age old philosophic problems Further Eastman leverages a century of advances in quantum physics and the Relational Realism interpretation pioneered by Michael Epperson and Elias Zafiris and augmented by the independent research of Ruth Kastner and Hans Primas to resolve long standing issues in understanding quantum physics Adding to this Eastman makes use of advances in information and complex systems semiotics and process philosophy to show how multiple levels of context combined with relations including potential relations both local and local global can provide a grounding for causation emergence and physical law Finally the Logoi framework goes beyond standard ways of knowing that of context independence science and context focus arts humanities to demonstrate the inevitable role of ultimate context meaning spiritual dimension as part of a transformative ecological vision which is urgently needed in these times of human and environmental crises Epigenetics and Public Policy Shea K.

Robison,2018-04-19 When science changes how does public policy respond Epigenetics the study of internal and environmental factors that affect how genes are turned on or off and how cells read those genes is a rapidly emerging science akin to genetics that introduces a number of novel and unexpected biological explanations of human origins and development It also poses fundamental challenges to many of the assumptions of the prevailing science of genetics This book comprehensively considers the political implications of the emerging science of epigenetics in specific policy domains addressing the intersections of epigenetics with cancer obesity the environment and the law Shea K Robison carefully navigates the messy history of genetics and epigenetics in order to explore what changes in public policy might come in the age of a new scientific frontier Readers will understand how new findings in epigenetic research and increased acceptance of epigenetic science may lead to paradigm shifts in cancer prevention and treatment significantly different policy solutions for combating obesity and revised statutes of limitations and laws regarding civil and corporate liability and wrongful life
