The Human Revolution Behavioural And Biological Perspectives On The Origins Of Modern Humans:

The Human Revolution Paul Mellars, Chris Stringer, 1989 This major interdisciplinary work developed from an international conference held at Cambridge University in 1987 Fifty five of the world's leading authorities from the fields of anthropology archaeology human evolution and genetics met for the first time to discuss all aspects of the biological and behavioural origins of modern human populations The volume brings together their papers revised and updated in the light of discussion at the conference itself The book features the results of new work by geneticists working on mitochondrial DNA globin polymorphisms and a Y chromosome DNA phylogeny and there are general reviews of the genetic evidence for the evolution of modern humans Other topics covered include palaeoecological models of human origins sophisticated modeling of population expansions and replacements changes in technology subsistence and social patterns and the origins of human language and other unique aspects of human behaviour This is the only book which integrates the remarkable new genetic evidence with the more conventional approaches of archaeologists and anthropologists No other work provides such an exhaustive and wide ranging account of modern human origins on a world wide scale Rethinking the Human Revolution Paul Mellars, 2007 Arising from a conference Rethinking the Human Revolution reconsiders all of the central issues in modern human behavioural cognitive biological and demographic origins in the light of new information and new theoretical perspectives which have emerged over the past twenty years of intensive research in this field The 34 papers cover topics ranging from the DNA and skeletal evidence for modern human origins in Africa through the archaeological evidence for the emergence of distinctively modern patterns of human behaviour and cognition to the various lines of evidence for the geographical dispersal patterns of biologically and behaviourally modern populations from their African origins throughout Asia Australasia and Europe over the past 60 000 years Origins of Anatomically Modern Humans Doris V. Nitecki, Matthew H. Nitecki, 2013-11-11 This volume is based on the Field Museum of Natural History Spring Systematics Symposium held in Chicago on May 11 1991 The financial support of Ray and Jean Auel and of the Field Museum is gratefully acknowledged When we teach or write we present only those elements that support our arguments We avoid all weak points of our debate and all the uncertainties of our models Thus we offer hypotheses as facts Multiauthored books like ours which simultaneously advocate and question diverse views avoid the pitfalls and lessen the impact of indoctrination In this volume we analyze the anthropological and biological disagreements and the positions taken on the origins of modern humans point out difficulties with the interpretations and suggest that the concept of the human origin can be explained only when we first attempt to define *Homo sapiens sapiens* One of the major controversies in physical anthropology concerns the geographic origin of anatomically modern humans It is undisputed due to the extensive research of the Leakeys and their colleagues that the family Hominidae originated in Africa but the geographic origin of *Homo sapiens sapiens* is less concretely accepted Two schools of thought exist on this topic The Origins of Modern Humans Fred H. Smith, James C. Ahern, 2013-07-09 This

update to the award winning *The Origins of Modern Humans A World Survey of the Fossil Evidence* covers the most accepted common theories concerning the emergence of modern *Homo sapiens* adding fresh insight from top young scholars on the key new discoveries of the past 25 years *The Origins of Modern Humans Biology Reconsidered* allows field leaders to discuss and assess the assemblage of hominid fossil material in each region of the world during the Pleistocene epoch It features new fossil and molecular evidence such as the evolutionary inferences drawn from assessments of modern humans and large segments of the Neandertal genome It also addresses the impact of digital imagery and the more sophisticated morphometrics that have entered the analytical fray since 1984 Beginning with a thoughtful introduction by the authors on modern human origins the book offers such insightful chapter contributions as Africa The Cradle of Modern People Crossroads of the Old World Late Hominin Evolution in Western Asia A River Runs through It Modern Human Origins in East Asia Perspectives on the Origins of Modern Australians Modern Human Origins in Central Europe The Makers of the Early Upper Paleolithic in Western Eurasia Neandertal Craniofacial Growth and Development and Its Relevance for Modern Human Origins Energetics and the Origin of Modern Humans Understanding Human Cranial Variation in Light of Modern Human Origins The Relevance of Archaic Genomes to Modern Human Origins The Process of Modern Human Origins The Evolutionary and Demographic Changes Giving Rise to Modern Humans The Paleobiology of Modern Human Emergence Elegant and thought provoking *The Origins of Modern Humans Biology Reconsidered* is an ideal read for students grad students and professionals in human evolution and paleoanthropology

The Origins of Human Behaviour Robert Foley, 2003-09-02 This volume explores the diverse ways in which the evolution of human behaviour can be investigated and confronts the most challenging aspects of the subject

[The Origin of Modern Humans and the Impact of Chronometric Dating](#) Martin Jim Aitken, Chris B. Stringer, Paul A. Mellars, 2014-07-14 This volume of papers delivered to The Royal Society in February of 1992 explores the debate over the single center hypothesis of human origins versus multi regional evolution Over the last five years there has been growing support for a recent Out of Africa origin of modern humans based on fresh interpretations of the palaeoanthropological and archaeological evidence new applications of physical dating techniques to important sites and a greatly increased genetic data base on recent human variation and its geographical patterning But there has also been a parallel growth of doubts about interpretations of the new evidence from some workers This book provides a review of recent progress and allows some of these doubts to be aired and discussed In addition to the editors the contributors are O Bar Yosef A M Bowcock P Brown H J Deacon L L Cavalli Sforza J D Clark R Gr n J J Hublin A A Lin G H Miller J L Mountain H P Schwarcz N J Shackleton F H Smith and M Stoneking Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase

access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Oxford Handbook of African Archaeology Peter Mitchell, Paul Lane, 2013-07-04 This Handbook provides a comprehensive synthesis of African archaeology covering the entirety of the continent's past from the beginnings of human evolution to the archaeological legacy of European colonialism. It includes a mixture of key methodological and theoretical issues and debates and situates the subject's contemporary practice.

Creativity and Philosophy Berys Gaut, Matthew Kieran, 2018-02-21 Creativity matters. We want people to be more creative and admire those who are. Yet creativity is deeply puzzling. Just what is it to be creative? Why is it valuable? Who or what can be creative and how? Creativity and Philosophy is an outstanding collection of specially commissioned chapters by leading philosophers who explore these problems and many more. It provides a comprehensive and creative picture of creativity including the following themes: creativity as a virtue; imagination; epistemic virtue; moral virtue; and personal vice; creativity with and without value; the definition of creativity; creative failures; and suffering; creativity in nature; divine creativity; and human agency; naturalistic explanations of creativity; and the extended mind; creativity in philosophy, mathematics, and logic; and the role of heuristics; creativity in art, morality, and politics; individual and group creativity. A major feature of the collection is that it explores creativity not only from the perspective of art and aesthetics but also from a variety of philosophical disciplines including epistemology, philosophy of mind, philosophical psychology, philosophy of science, political philosophy, and ethics. The volume is essential reading for anyone fascinated by creativity, whether their interests lie in philosophy, music, art, and visual studies, literature, psychology, neuroscience, management, or education, or they are simply intent on learning more about this vital human trait.

From Big Bang to Big Mystery Brendan M. Purcell, 2012 Everyone knows about the mystery of the Big Bang, what started it. This book is about the other creation mystery: where did human beings, in particular, come from? It traces the material part of our origins from the Big Bang through evolution, including the almost 7 million year hominid sequence up to the first humans in Africa over 150,000 years ago. That data doesn't seem to explain what paleontologists and archaeologists call the Big Bang of Human Consciousness. In his fascinating, accessible, and thorough study, renowned priest and academic Brendan Purcell shows the complementarity that scientists, theologians, and philosophers bring to a deeper understanding of the mystery of human existence and human consciousness.

Encyclopedia of Quaternary Science Cary Mock, 2013-03-25 The second revised edition of the Encyclopedia of Quaternary Science Four Volume Set provides both students and professionals with an up-to-date reference work on this important and highly varied area of research. There are lots of new articles, and many of the articles that appeared in the first edition have been updated to reflect advances in knowledge since 2006 when the original articles were written. The second edition will contain about 375 articles written by leading experts around the world. This major reference work is richly illustrated with more than 3,000 illustrations, most of them in colour. Research in the Quaternary sciences has advanced greatly in the last 10 years, especially since topics like

global climate change geologic hazards and soil erosion were put high on the political agenda This second edition builds upon its award winning predecessor to provide the reader assured quality along with essential updated coverage Contains 357 broad ranging articles 4310 pages written at a level that allows undergraduate students to understand the material while providing active researchers with a ready reference resource for information in the field Facilitates teaching and learning The first edition was regarded by many as the most significant single overview of Quaternary science ever yet Editor in Chief Scott Elias has managed to surpass that in this second edition by securing even more expert reviews whilst retaining his renowned editorial consistency that enables readers to navigate seamlessly from one unfamiliar topic to the next
