The Anthropology of Music Alan P. Merriam, Valerie

Merriam, 1964-12-01 In this highly praised and seminal work Alan Merriam demonstrates that music is a social behavior one worthy and available to study through the methods of anthropology In it he convincingly argues that ethnomusicology by definition cannot separate the sound analysis of music from its cultural context of people thinking acting and creating The study begins with a review of the various approaches in ethnomusicology He then suggests a useful and simple research model ideas about music lead to behavior related to music and this behavior results in musical sound He explains many aspects and outcomes of this model and the methods and techniques he suggests are useful to anyone doing field work Further chapters provide a cross cultural round up of concepts about music physical and verbal behavior related to music the role of the musician and the learning and composing of music The Anthropology of Music illuminates much of interest to musicologists but to social scientists in general as well

Munch, 2021-04-16 The history of modern design and architecture has seen many attempts to embrace and merge different art forms and to bring art into the framing of everyday life and the organisation of modern society in a process understood as total design or total architecture These attempts were historically based on the romanticist idea of merging all art forms into a uniting and transgressing work of art mostly associated with but certainly not limited to Richard Wagner s theoretical writings and musical dramas This utopian dream of the Gesamtkunstwerk or Total Work of Art was intended both to bring unity to the people and to bring art into the everyday life of their homes as well as into factories cities and even modern media As a result the experiments ranged from music poetry and drama to architecture design visual communication and city planning These ideas of merging art forms into more immersive and transgressive installations or design interventions to change everyday life are widespread today but their complex and often problematic roots are mostly ignored Design and architecture have delivered some of the broadest and most influential experiments with the Gesamtkunstwerk from garden cities for workers and corporate identity design to the German AEG corporation **The Art World and Arts & Decoration**
