The Kingdom In The Sun 1130 1194:

The Kingdom in the Sun, 1130-1194 John Julius Norwich, 1970 *The Kingdom in the Sun 1130-1194* 2nd Viscount Norwich, 1970 **East and West in the Crusader States** Krijna Nelly Ciggaar, Herman G. B. Teule, 1999 The meeting of East and West in the Crusader States was the theme of a symposium held at Hernen Castle in 1997 It was the continuation of a similar symposium which has been published in the *Orientalia Lovaniensia Analecta* 75 Various communities Arabs Armenians Ethiopians Greeks Syrians and Latins and various religions the Church of Rome the Orthodox Church of Constantinople the Jacobites the Muslims and others play their part in the various Crusader States sometimes in the effort to ecumenism sometimes in the form of confrontations Coins and seals in the Latin Kingdom of Jerusalem betray Eastern and Western influences Daily life is reflected in historical texts and in exempla and miracula The fall of Edessa is described in the Lament of Edessa by Nerses Snorhali which is here for the first time translated into English Even icon painting in Egypt reflects crusader influence **Dynasties Intertwined** Matt King, 2022-06-15 *Dynasties Intertwined* traces the turbulent relationship between the Zirids of Ifriqiya and the Normans of Sicily during the eleventh and twelfth centuries In doing so it reveals the complex web of economic political cultural and military connections that linked the two dynasties to each other and to other polities across the medieval Mediterranean Furthermore despite the contemporary interfaith holy wars happening around the Zirids and Normans their relationship was never governed by an overarching ideology like jihad or crusade Instead both dynasties pursued policies that they thought would expand their power and wealth either through collaboration or conflict The relationship between the Zirids and Normans ultimately came to a violent end in the 1140s when a devastating drought crippled Ifriqiya The Normans seized this opportunity to conquer lands across the Ifriqiyian coast bringing an end to the Zirid dynasty and forming the Norman kingdom of Africa which persisted until the Almohad conquest of Mahdia in 1160 Previous scholarship on medieval North Africa during the reign of the Zirids has depicted the region as one of instability and political anarchy that rendered local lords powerless in the face of foreign conquest Matt King shows that to the contrary the Zirids and other local lords in Ifriqiya were integral parts of the far reaching political and economic networks across the Mediterranean Despite the eventual collapse of the Zirid dynasty at the hands of the Normans *Dynasties Intertwined* makes clear that its emirs were active and consequential Mediterranean players for much of the eleventh and twelfth centuries with political agency independent of their Christian neighbors across the Strait of Sicily *Queenship in the Mediterranean* E. Woodacre, 2013-12-18 This groundbreaking collection explores the key roles that Mediterranean queens played as wives as mothers and above all as political actors Ranging from Byzantine empresses to regnants and consorts in the Italian peninsula they offer a bracing new perspective on queenship in the medieval and Early Modern eras *The Routledge Companion to Medieval English Literature* Raluca Radulescu, Sif Rikhardsdottir, 2022-12-30 The Routledge Companion to Medieval English Literature offers a new inclusive and comprehensive context to the study of medieval

Kings as Judges Deborah Boucoyannis, 2021-07-15 How did representative institutions become the central organs of governance in Western Europe What enabled this distinctive form of political organization and collective action that has proved so durable and influential The answer has typically been sought either in the realm of ideas in the Western tradition of individual rights or in material change especially the complex interaction of war taxes and economic growth Common to these strands is the belief that representation resulted from weak ruling powers needing to concede rights to powerful social groups Boucoyannis argues instead that representative institutions were a product of state strength specifically the capacity to deliver justice across social groups Enduring and inclusive representative parliaments formed when rulers could exercise power over the most powerful actors in the land and compel them to serve and especially to tax them The language of rights deemed distinctive to the West emerged in response to more effectively imposed collective obligations especially on those with most power
