The Kingdoms Of Life From A Theosophical Viewpoint:

The Theosophical Path Katherine Augusta Westcott Tingley,1920 **A Theosophist's Point of View** James Albert Clark,1901 The Dialectic of God: the Theosophical Views of Tagore and Gandhi Satya Sinha,2015-05-05 This is the first book which compares the philosophical views of Tagore and Gandhi who were the most important thinkers of Modern India They have not conceived God in traditional way but rather in humanistic way which relates to present day thinking mind Neither have left any systematic presentation of their ideas about God It has been deciphered from their poetry writings speeches discourses and letters Present day concept of God has evolved from rudimentary ideas of God Even in the present scientific age we come across different ideas about God in different men The layman the man on the street with little or no education has an idea of God much different from the idea of God which a cultured and educated holds Almost all the Indian contemporary thinkers have been influenced by the basic scriptures of the Hindus Tagore and Gandhi have also been influenced by them Tagore and Gandhi both had contacts with the Muslims and the Christian missionaries who had come to India Of these the Christian missionaries made scathing attacks on the Hindu religion and practices Both Tagore and Gandhi visited Europe and came into contact with the Unitarian Christianity It is possible that their thinking about God might have been influenced by such contacts A Textbook Of Theosophy C. W. Leadbeater,2013-12-10 Theosophy is not only a basis of religion it is also a philosophy of life As such its main teachings are reincarnation and the law of Karma Karma is the outcome of the collective life a law of ethical causation In the past incarnation the ego had acquired certain faculties set in motion certain causes The effect of these causes and of causes set in motion in previous incarnations and not yet exhausted are its Karma and determine the conditions into which the ego is reborn Thus inequalities of natural gifts e g genius of temperament and of character are explained The law of progress is the law of involution and evolution the returning of the Divine Spark into a unity with Spirit through various reincarnations which are viewed as a process of purification Sin poverty and misery are the fruits of ignorance and are gradually removed as the spirit in us becomes freed from earthly dross There is no heaven nor Hell Death is the passage from this state of life to another There is an evolution behind and before with absolute certainty of final attainment for every human soul i e to be one with the Absolute As man advances in this process his spirit becomes stronger and can develop latent powers not shown in ordinary mortals This textbook is your portal to a new sight of life and religion **World and Life Views, Emerging From Religion, Philosophy and Perception of Nature** Prof. Dr. Max Bernhard Weinstein,2024-07-01 Originally published in German in 1910 as Welt und Lebensanschauungen Hervorgegangen aus Religion Philosophie und Naturerkenntnis this philosophical opus of Dr Max Bernhard Weinstein has been painstakingly translated into English with exquisite attention paid to insuring that the pagination and illustrations remain identical to that of the original *Theosophy* ,1920 **Theosophical Outlook** ,1921 Exploring Our Dimensional Being Frederick R. Kipp,2017-02-23 Throughout our lives most of us have been conditioned to view the essence

of our human being and the greater realm of creation itself as somehow mysterious and unknowable In many ways it seems as if we have relegated our lives to dense matter as the central focus of our identity Exploring the possible inner or metaphysical realities can provide an orientation and detail necessary for greater understanding of ourselves and the dimensional spheres of life that connect us My life's work has included studying the underlying structures that support all physical manifestation as well as the beings that live within and work to sustain them I believe that all inner and outer life forms and entities are dimensionally connected We are continuously interacting with them unconsciously through various levels of our being the collective consciousness of humanity our planet and the celestial bodies in the universe My experience has been that the lack of awareness of our own greater being is what hinders our ability to comprehend the universe multidimensionally In my view before entering our present dense physical forms as humans we have progressed through many developmental cycles as did our Earth solar system and universe This book documents what I have learned about the universal creative process and dimensional human evolution from our source beginnings to the present I have tried to integrate the various accounts of the scientific mythological religious and metaphysical versions of cosmology cosmogenesis and cosmogony Exploring the inner realms of possible connections between humanity Earth and the cosmos has been a complex undertaking and journey into uncharted territory My research life experiences and clairvoyant perspectives regarding the dimensionality of all life are the basis for the writing of this book

Theosophy Rudolf Steiner, 1994-12 Keats stands as a prophetic precursor behind much in today's radical attempts at cultural and self transformation But this side of him has been forgotten or at least was never taken very seriously He is remembered if at all mostly as a Romantic poet whose value and standing was magnified by his early death Eclipsed by the lushly sensuous affection of his poems the real meaning of his life and the greatness of his achievement in poetics how one makes sense out of experience has been ignored Now Andr s Rodr guez redresses the balance by granting to Keats Letters their huge intellectual and spiritual labor In these Letters one of the most inspiring spiritual documents of the West we see the poet forming and transforming a passionate life of great joys and sorrows into a self of imagination and power Book of the Heart grasps the core of Keats' poetical practice of life uncovering the path of knowledge that the Letters reveal United with Keats in an imaginative union that is as moving as it is true Rodr guez presents Keats as a hero of the heart whose deep life experience oriented him in a unique way toward the world of love suffering death and creativity
