

THE KINGDON FIELD GUIDE TO
**AFRICAN
MAMMALS**

SECOND EDITION

JONATHAN KINGDON

The Kingdon Field Guide To African Mammals

David Baud

The Kingdon Field Guide To African Mammals:

Field Guide to African Mammals Jonathan Kingdon, 2015-04-23 Jonathan Kingdon one of the world's foremost authorities on African mammals has both written and illustrated this landmark field guide. The unique combination of his extensive field experience and artistic talent has produced a stunning work that sets new standards. The concise text provides full information on identification, distribution, ecology, relationships, and conservation status, with introductory profiles that summarise the characteristics of each mammal group. All known species of African land mammal are covered, with coverage of several of the more complex groups of small mammals simplified by reference to genera. Classification has been fully updated, and this new edition includes many newly recognised species. With over 780 colour illustrations, numerous line drawings, and more than 520 maps, this book will be an essential companion to anyone visiting Africa or with an interest in the mammals of the continent.

Competition note: There are regional mammal books covering southern Africa, for example, but none that covers the whole continent in a portable format. The smaller format and more concise **Kingdon Pocket Guide to African Mammals** may be more appealing to a more general safari market but is much less comprehensive and more out of date.

The Kingdon Pocket Guide to African Mammals Jonathan Kingdon, 2020-09-17 The essential mammal guide to take on safari, covering every African land mammal. Originally published in 2004, the **Kingdon Pocket Guide to African Mammals** quickly became the field guide of choice to take on African safaris. Its compact format makes it ideal for use in the field, while its coverage is the most comprehensive currently possible in this format. Adapted from the **Kingdon Field Guide to African Mammals**, the greatly condensed text focuses on essential information such as identification and distribution, while the author's superb illustrations have been rearranged into an easy-to-use plate format and placed opposite the text. Complex and more obscure groups, like the bats and certain rodent families, are summarised by genera. Over 500 maps plot the distribution of all larger species, and for smaller mammals, the maps show distribution by genus. This is a completely revised second edition of this popular guide. The information and taxonomy have been updated to follow the newly published second edition of the **Kingdon Field Guide to African Mammals** 2015, and this new edition of the pocket guide contains several new species and illustrations. The maps have been completely replaced, and there are now 200 more maps than in the original edition.

The Kingdon Field Guide to African Mammals Jonathan Kingdon, 2019-12-12 This is the definitive field guide to African Mammals, fully revised and updated following the publication of the groundbreaking **Mammals of Africa** 2013. Jonathan Kingdon, one of the world's foremost authorities on African mammals, has both written and illustrated this landmark field guide. The unique combination of his extensive field experience and artistic talent has produced a stunning work that sets new standards. The concise text provides full information on identification, distribution, ecology, relationships, and conservation status, with introductory profiles that summarise the characteristics of each mammal group. All known species of African land mammal are covered, with coverage of several of the more complex groups of small mammals simplified by reference to

genera Classification has been fully updated and this new edition includes many newly recognised species With over 780 colour illustrations numerous line drawings and more than 520 maps this book will be an essential companion to anyone visiting Africa or with an interest in the mammals of the continent

The Kingdon Field Guide to African Mammals Jonathan Kingdon, 2015 The definitive guide to African mammals now fully revised and updated The Kingdon Field Guide to African Mammals is the essential companion for anyone going on safari or interested in African mammals no other field guide covers the whole continent in a portable format Now fully revised and updated it covers all known species of African land mammals and features 780 stunning color illustrations Detailed species accounts describe key identification features distribution habitat food behavior adaptations and conservation status Coverage of several of the more complex groups of small mammals is simplified by reference to genera and there are introductory profiles of each mammal group and more than 500 maps This new edition includes many newly recognized species and classification has been fully updated Written and illustrated by a world authority The Kingdon Field Guide to African Mammals is a must have guide for travelers and armchair naturalists alike Covers more than 1 100 species Features 780 color illustrations Describes key identification features distribution habitat food behavior adaptations and status Includes many newly recognized species and classification has been fully updated

The Kingdon Pocket Guide to African Mammals Jonathan Kingdon, 2020-02-25 The fully updated second edition of the leading field guide for African safaris providing unmatched coverage of all the continent's land mammals in a handy portable volume Originally published in 2004 The Kingdon Pocket Guide to African Mammals quickly became the field guide of choice to take on safari in Africa providing the most authoritative and comprehensive coverage available in a handy portable volume Now this popular practical and beautifully illustrated guide has been thoroughly revised and updated to make it even better than before Adapted from the revised second edition of the acclaimed and much larger Kingdon Field Guide to African Mammals this second edition of the pocket guide features updated species information and taxonomy and includes several new species It presents more than 780 superb color illustrations including several new ones and 520 distribution maps 200 more than in the previous edition The concise text greatly condensed from the larger field guide focuses on essential information for field identification and distribution while the illustrations are conveniently located on facing pages Now more than ever The Kingdon Pocket Guide to African Mammals is a must have companion for anyone interested in African wildlife from the tourist on safari to the experienced naturalist Covers all of Africa's land mammals with some smaller groups treated generically Includes more than 780 color illustrations and 520 distribution maps Features concise text focusing on essential information for field identification with the illustrations placed opposite the text for quick easy reference

Mammals of Africa: Volume II Jonathan Kingdon, 2014-11-20 Mammals of Africa MoA is a series of six volumes which describes in detail every currently recognized species of African land mammal This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion

of the morphology distribution biology and evolution including reference to fossil and molecular data of Africa's mammals. With more than 1 160 species and 16 18 orders Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume follows the same format with detailed profiles of every species and higher taxa. The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold. Every species also includes a detailed distribution map. Edited by Jonathan Kingdon, David Happold, Tom Butynski, Mike Hoffmann, Meredith Happold and Jan Kalina and written by more than 350 authors all experts in their fields, *Mammals of Africa* is as comprehensive a compendium of current knowledge as is possible. Extensive references alert readers to more detailed information. Volume II is edited by Thomas Butynski, Jonathan Kingdon and Jan Kalina and contains profiles of 93 species of primates; this includes the great apes, Old World monkeys, lorises and galagos.

WINNER OF THE 2014 DARTMOUTH MEDAL
AWARDED BY THE AMERICAN LIBRARY ASSOCIATION

Mammals of Africa represents a high water mark not just in mammalogy but in scientific publishing overall. Magnificent. Tim Flannery, Macquarie University, Sydney.

Mammals of Africa (MoA) is a series of six volumes which describes in detail every currently recognized species of African land mammal. This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion of the morphology, distribution, biology and evolution, including reference to fossil and molecular data of Africa's mammals. With 1 160 species and 16 orders, Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume

follows the same format with detailed profiles of every species and higher taxa The series includes some 660 colour illustrations by Jonathan Kingdon and his many drawings highlight details of morphology and behaviour of the species concerned Diagrams schematic details and line drawings of skulls and jaws are by Jonathan Kingdon and Meredith Happold Every species also includes a detailed distribution map Extensive references alert readers to more detailed information

Mammals of Africa: Volume I Jonathan Kingdon, 2014-11-20 Mammals of Africa MoA is a series of six volumes which describes in detail every currently recognized species of African land mammal This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion of the morphology distribution biology and evolution including reference to fossil and molecular data of Africa's mammals With more than 1 160 species and 16 18 orders Africa has the greatest diversity and abundance of mammals in the world The reasons for this and the mechanisms behind their evolution are given special attention in the series Each volume follows the same format with detailed profiles of every species and higher taxa The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold Every species also includes a detailed distribution map Edited by Jonathan Kingdon David Happold Tom Butynski Mike Hoffmann Meredith Happold and Jan Kalina and written by more than 350 authors all experts in their fields Mammals of Africa is as comprehensive a compendium of current knowledge as is possible Extensive references alert readers to more detailed information This first volume in the series comprises eight introductory chapters covering topics such as evolution geography and geology biotic zones classification behaviour and morphology The rest of the book is devoted to the Afrotheria a grouping that comprises six orders and 49 species these are the hyraxes elephants manatees otter shrews golden moles sengis elephant shrews and Aardvark

Mammals of Africa: Volume V Jonathan Kingdon, 2014-11-20 Mammals of Africa MoA is a series of six volumes which describes in detail every currently recognized species of African land mammal This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion of the morphology distribution biology and evolution including reference to fossil and molecular data of Africa's mammals With more than 1 160 species and 16 18 orders Africa has the greatest diversity and abundance of mammals in the world The reasons for this and the mechanisms behind their evolution are given special attention in the series Each volume follows the same format with detailed profiles of every species and higher taxa The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold Every species also includes a detailed distribution map Edited by Jonathan Kingdon David Happold Tom Butynski Mike Hoffmann Meredith Happold and Jan Kalina and written by more than 350 authors all experts in their fields Mammals of Africa is as comprehensive a compendium of current

knowledge as is possible Extensive references alert readers to more detailed information Volume V edited by Jonathan Kingdon and Michael Hoffmann comprises 83 species of carnivores and includes jackals wolves dogs foxes weasels polecats striped weasels Zorilla otters Ratel fur seals monk seals Palm Civet cats genets linsangs African Civet hyaenas Aardwolf and mongooses The volume is completed with profiles of four pangolins four zebras and two rhinoceroses **International Wildlife Encyclopedia** Maurice Burton, Robert Burton, 2002 This twenty two volume set presents the appearance and behavior of thousands of species of animals along with species population and prospects for survival in a arranged alphabetically and easy to read format Mammals of Africa: Volume I: Introductory Chapters and Afrotheria Jonathan Kingdon, 2024-05-23 **Mammals of Africa: Volume VI: Hippopotamuses, Pigs, Deer, Giraffe and Bovids** Jonathan Kingdon, 2024-05-23 Mammals of Africa: Volume III Jonathan Kingdon, 2014-11-20 Mammals of Africa MoA is a series of six volumes which describes in detail every currently recognized species of African land mammal This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion of the morphology distribution biology and evolution including reference to fossil and molecular data of Africa s mammals With more than 1 160 species and 16 18 orders Africa has the greatest diversity and abundance of mammals in the world The reasons for this and the mechanisms behind their evolution are given special attention in the series Each volume follows the same format with detailed profiles of every species and higher taxa The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold Every species also includes a detailed distribution map Edited by Jonathan Kingdon David Happold Tom Butynski Mike Hoffmann Meredith Happold and Jan Kalina and written by more than 350 authors all experts in their fields Mammals of Africa is as comprehensive a compendium of current knowledge as is possible Extensive references alert readers to more detailed information Volume III edited by David Happold has profiles of 395 species of rodents comprising the squirrels dormice jerboas blind mole rats African root rats pouched rats and mice Swamp Mouse climbing mice fat mice White tailed Rat rock mice voles Maned Rat spiny mice brush furred mice gerbils jirds taterils African Forest Mouse rats and mice vleis rats whistling rats anomalures springhares gundis African mole rats porcupines Noki Dassie Rat cane rats and Coypu The volume concludes with 13 species of hares and rabbits **Mammals of Africa: Volume III: Rodents, Hares and Rabbits** Jonathan Kingdon, 2024-05-23 **Mammals of Africa: Volume IV** Jonathan Kingdon, 2014-11-20 Mammals of Africa MoA is a series of six volumes which describes in detail every currently recognized species of African land mammal This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion of the morphology distribution biology and evolution including reference to fossil and molecular data of Africa s mammals With more than 1 160 species and 16 18 orders Africa has the greatest diversity and abundance of mammals in the world The reasons for this and

the mechanisms behind their evolution are given special attention in the series Each volume follows the same format with detailed profiles of every species and higher taxa The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold Every species also includes a detailed distribution map Edited by Jonathan Kingdon David Happold Tom Butynski Mike Hoffmann Meredith Happold and Jan Kalina and written by more than 350 authors all experts in their fields Mammals of Africa is as comprehensive a compendium of current knowledge as is possible Extensive references alert readers to more detailed information Volume IV edited by Meredith Happold and David Happold contains profiles of 156 species of insectivores comprising the hedgehogs and shrews The rest of the volume is devoted to the 224 species of African bats The latter are divided into nine families namely fruit bats horseshoe bats leaf nosed bats false vampire bats mouse tailed bats sheath tailed bats slit faced bats free tailed bats and vesper bats **Mammals of Africa:**

Volume IV: Hedgehogs, Shrews and Bats Jonathan Kingdon, 2024-05-23 **Gliding Mammals of the World** Stephen Jackson, Peter Schouten, 2012-08-09 The world's gliding mammals are an extraordinary group of animals that have the ability to glide from tree to tree with seemingly effortless grace There are more than 60 species of gliding mammals including the flying squirrels from Asia Europe and North America the scaly tailed flying squirrels from central Africa and the gliding possums of Australia and New Guinea But the most spectacular of all are the colugos or so called flying lemurs that occur throughout South East Asia and the Philippines Animals that glide from tree to tree descend at an angle of less than 45 degrees to the horizontal while those that parachute descend at an angle greater than 45 degrees Gliding is achieved by deflecting air flowing past well developed gliding membranes or patagia which form an effective airfoil that allows the animal to travel the greatest possible horizontal distance with the least loss in height The flying squirrels and scaly tailed flying squirrels even have special cartilaginous spurs that extend either from the wrist or elbow respectively to help support the gliding membrane Gliding Mammals of the World provides for the first time a synthesis of all that is known about the biology of these intriguing mammals It includes a brief description of each species together with a distribution map and a beautiful full colour painting An introduction outlines the origins and biogeography of each group of gliding mammals and examines the incredible adaptations that allow them to launch themselves and glide from tree to tree **The Biology of Small**

Mammals Joseph F. Merritt, 2010-03-09 Animals of this size face different physiological and ecological challenges than larger mammals *African Biodiversity* Bernhard A. Huber, Bradley J. Sinclair, Karl-Heinz Lampe, 2007-04-29 In May 2004 the Alexander Koenig Zoological Research Museum hosted the Fifth International Symposium on Tropical Biology This series was established at the ZFMK in the early 1980s and has variably focused on systematics and ecology of tropical organisms with an emphasis on Africa Previous volumes are those edited by Schuchmann 1985 Peters and Hutterer 1990 Ulrich 1997 and Rheinwald 2000 The symposium in 2004 was organized by the Entomology Department under the direction of Michael

Schmitt The intention was to focus on Africa rather than on a particular taxon and to highlight biodiversity at all levels ranging from molecules to ecosystems This focus was timely partly because of the currently running BIOTA Africa programmes BIOdiversity Monitoring Transect Analysis in Africa BIOTA is an interdisciplinary research project focusing on sustainable use and conservation of biodiversity in Africa <http://www.biotafrica.de> Session titles were Biogeography and Speciation Processes Phylogenetic Patterns and Systematics Diversity Declines and Conservation and Applied Biodiversity Informatics Each session was opened by an invited speaker and all together 77 lectures and 59 posters were presented There were over 200 participants and it was gratifying to us to meet colleagues from 26 nations including Russia Ukraine Japan USA and ten African countries We thank all participants for their valuable contributions

The Kingdon Field Guide To African Mammals Book Review: Unveiling the Power of Words

In a global driven by information and connectivity, the power of words has become more evident than ever. They have the capacity to inspire, provoke, and ignite change. Such is the essence of the book **The Kingdon Field Guide To African Mammals**, a literary masterpiece that delves deep into the significance of words and their impact on our lives. Written by a renowned author, this captivating work takes readers on a transformative journey, unraveling the secrets and potential behind every word. In this review, we will explore the book's key themes, examine its writing style, and analyze its overall impact on readers.
