platform of the future Used successfully by many nations during the Great War aircraft technology and capability experienced its most rapid evolutionary period during World War II Entering the war with just basic airborne imagery capabilities by V E and V J days air power pioneers greatly improved imagery collection and developed sophisticated airborne signals intelligence collection capabilities The United States and other nations put these capabilities to use as the Cold War immediately followed Flying near the periphery of and sometimes directly over the Soviet Union airborne reconnaissance provided the intelligence necessary to stay one step ahead of the Soviets throughout the Cold War

saw coming **Inventions of The Great War** A. Russell Bond, 2015-07-09 The great World War was more than two thirds over when America entered the struggle and yet in a sense this country was in the war from its very beginning Three great inventions controlled the character of the fighting and made it different from any other the world has ever seen These three inventions were American The submarine was our invention it carried the war into the sea The airplane was an American invention it carried the war into the sky We invented the machine gun it drove the war into the ground It is not my purpose to boast of American genius but rather to show that we entered the war with heavy responsibilities The inventions we had given to the world had been developed marvelously in other lands Furthermore they were in the hands of a determined and unscrupulous foe and we found before us the task of overcoming the very machines that we had created Yankee ingenuity was faced with a real test The only way of overcoming the airplane was to build more and better machines than the enemy possessed This we tried to do but first we had to be taught by our allies the latest refinements of this machine and the war was over before we had more than started our aerial program The machine gun and its accessory barbed wire also an American invention were overcome by the tank and we may find what little comfort we can in the fact that its invention was inspired by the sight of an American farm tractor But the tank was a British creation and was undoubtedly the most important invention of the war On the sea we were faced with a most baffling problem The U boat could not be coped with by the building of swarms of submarines The essential here was a means of locating the enemy and destroying him even while he lurked under the surface Two American inventions the hydrophone and the depth bomb made the lot of the U boat decidedly unenviable and they hastened if they did not actually end German frightfulness on the sea But these were by no means the only inventions of the war Great Britain showed wonderful ingenuity and resourcefulness in many directions France did marvels with the airplane and showed great cleverness in her development of the tank and there was a host of minor inventions to her credit while Italy showed marked skill in the creation of large airplanes and small seacraft *The Illustrated War News*, 1915 *Fighting the Great War at Sea* Norman Friedman, 2014-10-22 Winner of the John Lyman Book Award for Naval and Maritime Science and Technology A compelling and convincing historical analysis of World War I Navy News While the overriding image of the First World War is of the bloody stalemate on the western front the overall shape of the war arose out of its maritime character It was essentially a struggle about access to worldwide resources most clearly seen in Germany's desperate attempts to counter the American industrial threat which ultimately drew the United States into the war This radical new book concentrates on the way in which each side tried to use or deny the sea to the other and in so doing describes rapid wartime changes not only in ship and weapons technology but also in the way naval warfare was envisaged and fought Melding strategic technical and tactical aspects Friedman approaches the First World War from a fresh perspective and demonstrates how its perceived lessons dominated the way navies prepared for the Second World War Friedman is a master of the evolution of naval strategy tactics and technology a rewarding read that will leave many wanting

to return again and again just to see what they might have missed the first time Australian Naval Institute Dr Friedman s research credentials are impeccable and the huge amount of factual detail he has unearthed will be sure to delight many there is nothing comparable in either depth or scope out there and for this reason if no other this book is likely to become a standard work on the naval aspects of the Great War Naval War College Review My Personal War Within Ted Bagley,2011-05-03 Ted Bagley A vice President at a large Pharmaceutical company on the West Coast was born in Birmingham Alabama to Ted and Eddie Mae Bagley both deceased His Brother William Bagley recently retired resides in Indianapolis with his wife Larnell and daughter Jennifer After graduating from High School Ted joined Uncle Sams Army where he served in the Old Guard a ceremonial unit in Ft Myer Virginia After serving for several years in that prestigious unit he was sent to Viet Nam at the height of the conflict At the end of his military career Ted continued his degree at Ohio State and later graduated from Franklin Business Law School in Columbus Ohio After College he joined the General Electric Companys world renowned Executive leadership Program where he served in many capacities of the Human Resources field After working his way to the executive ranks Ted left GE to Join the Russell Corporation based in Atlanta Georgia After several years with Russell he joined Dell Computer in Nashville Tennessee Ted Currently is an executive with Amgen Pharmaceuticals in Thousand Oaks California His hobbies are bike riding reading skating and minor car repair He has a wife Debra and 4 children Marcus Chantal Christopher and Jared His passions are public speaking counseling working with young people and exercising He currently has one piece of his work in Publication The books title is My Personal War within A Woman's War Record, 1861-1865 Septima Maria Collis,2020-09-28 I have no hesitation in calling what I am about to write a war record for my life was twice in jeopardy as will be seen later on and I served faithfully as a volunteer though without compensation during the entire war of the Rebellion It is true I was not in the ranks but I was at the front and perhaps had a more continuous experience of army life during those four terribly eventful years than any other woman of the North Born in Charleston S C my sympathies were naturally with the South but on December 9 1861 I became a Union woman by marrying a Northern soldier in Philadelphia The romance which resulted in this desertion to the enemy would perhaps interest the reader yet I do not propose to tell it for I am sure the very realistic life which it enabled me to experience for three winters in camp at army head quarters will interest him more My first commander was Gen Nathaniel P Banks to whom I reported on December 11 1861 at Frederick Md where my bridegroom was then a captain of an independent company which he named and equipped as Zouaves d Afrique The army being in winter quarters a general disposition prevailed among officers and men to make the season pass merrily Though the war had by this time assumed serious proportions and the battle of Bull Run had been fought yet there were many who still believed that the counsels of peace and forbearance would prevail and that the conflict would be of short duration and this I remember was the daily theme of discussion Frederick had become a garrisoned town every train bringing troops and supplies army wagons and their four mule teams had possession of the

streets while the sidewalks and shop windows were monopolized by the volunteer officers in their bright buttons and gold lace who permitted themselves to be disturbed only by the appearance of a pretty face or by the steady tread of the patrol with their white gloves and polished rifles My apartments in Frederick consisted of two very modest third story rooms sparsely furnished with the use of a kitchen at a cheap rent for we neither of us had any money yet we indulged in the luxury of the best cook in the army no other than Nunzio Finelli one of our zouaves who was afterwards the steward of the Union League of Philadelphia and a renowned restaurateur in the same city Finelli was then a very young man with a face as handsome as the famous Neapolitan boy in the picture and a voice as sweet and sympathetic as Brignoli's A most obliging disposition and a fondness for operatic music made him therefore a great acquisition to our little household and many an omelette soufflé was first beaten into snowflakes while the dulcet and plaintive notes of Ah che la morte or Spirito gentil reaching the street detained the spellbound passers by and sometimes when his friend and compatriot Constantino Calarisi another zouave joined him in the kitchen we were treated to a duet which even Patti would have applauded for they were both very remarkable singers Poor Finelli a few months later a bullet at the battle of Cedar Mountain terribly disfigured him and when I next saw him the shape of his injured nose reminded me of the inhabitants of the Ghetto

German Secret Weapons of the Second World War Ian V. Hogg, 2020-01-24 A comprehensive highly detailed study that displays a stunning wealth of technical knowledge a brisk and understandable narrative HistoryNet The phrase German secret weapons immediately conjures up images of the V 1 and V 2 missiles that bombarded London in 1944 But what of the V 3 and V 4 What of Schmetterling the Rochling shell the Kurt bomb the Hs293 These and many other devices were all part of the German secret armory but are relatively unknown except to a handful of specialists What of the German nuclear bomb And the question of chemical warfare The sheer magnitude of the secret weapon projects of the Third Reich is revealed in this comprehensive study written by one of the world's great experts on weaponry The book explores the various fields in which the Germans concentrated their weapon development and discusses the multiplicity of ideas the difficulties and in several cases how these ideas were subsequently exploited by the victors Although much of the German wartime development was not completed before the war's end it nevertheless provided a foundation for a great deal of the munitions development that has since taken place Comparisons with Allied projects are also drawn This book explodes some of the myths surrounding Hitler's secret weapons to reveal a truth all the stranger for being fact Includes photographs and line drawings

Inventions of the Great War Alexander Russell Bond,1919 *Imperial War Museum Book of the War at Sea*

1914-18 Julian Thompson, 2011-07-22 Based on gripping first hand testimony from the archives of the Imperial War Museum this book reveals what it was really like to serve in the Royal Navy during the First World War It was a period of huge change for the first time the British navy went into battle with untried weapon systems dreadnoughts submarines aircraft and airships Julian Thompson blends insightful narrative with never before published stories to show what these men faced and overcame Officers and men from admirals down to the youngest sailors faced the same dangers at sea in often terrible weather conditions with the ever present prospect of being blown to pieces or choking to death trapped in a compartment or turret as they plunged to the bottom of the sea In their own words they share their experiences from long patrols and pitched battles in the cold rough water of the North Sea to the perils of warfare in the Dardanelles from the cat and mouse search for Vice Admiral Graf von Spee in the Pacific to the dangerous raids on Ostend and Zeebrugge We see what it was like to spend weeks in the cramped smelly submarines of the period or to attack U boats from unreliable airships **The Secret**
