The Koreans Who They Are What They Want Where Their Future Lies:

The Koreans Michael Breen, 2014-05-20 The rise of South Korea is one of the most unexpected and inspirational developments of the latter part of our century A few decades ago the Koreans were an impoverished agricultural people In one generation they came out of the fields and into Silicon Valley In 1997 this powerhouse of a nation reeled and almost collapsed as a result of a weak financial system and heavily indebted conglomerates The world is now watching to see whether the Koreans will be able to reform and continue their stunning growth Although Korea has only recently found itself a part of the global stage it is a country with a rich and complex past Early history shows that Koreans had a huge influence on ancient Japan and their historic achievements include being the first culture to use metal movable type for printing books However much of their history is less positive it is marred with political violence poverty and war aspects that would sooner be forgotten by the Koreans who are trying to focus on their promising future The fact that Korean history has eluded much of the world is unfortunate but as Korea becomes more of a global player understanding and appreciation for this unique nation has become indispensable In *The Koreans* Michael Breen provides an in depth portrait of the country and its people An early overview of the nature and values of the Korean people provides the background for a more detailed examination of the complex history of the country in particular its division into the Communist north and pro Western south In this absorbing and enlightening account of the Koreans Michael Breen provides compelling insight into the history and character of this fascinating nation

Modern Korea: All That Matters Andrew Salmon, 2014-08-29 In no nation on earth has history accelerated with such speed as in Korea A medieval dynasty at the end of the 19th century it underwent a traumatic

colonization then in its hour of liberation was divided by the great powers at the end of World War II Devastated by a fratricidal war the peninsula has remained divided ever since South Korea is the greatest national success story of the 20th century From the ashes of war it transformed itself against the odds and against much advice into an industrial powerhouse and thriving democracy Now a high tech wonderland it is undergoing social and cultural transformations that add further layers to its dynamic DNA North Korea is an economic social and political disaster successful only at totalitarianism Having transmogrified from a blood and iron communist dictatorship into a bizarre neo fascist monarchy it is a black hole at the heart of Asia Engulfed by paranoia the regime presides over a malnourished populace a 1 1 million man army and a nuclear arsenal From nuclear missiles to Samsung smartphones from assassins to salarymen from Kim Il sung to Psy this is the extraordinary story of the flashpoint peninsula that dominates talk in boardrooms and newsrooms Korea the author argues provides two stark benchmarks for national development Epic success and catastrophic failure And its final chapter has yet to be written

Tourism and Political Change Richard Butler, Wantanee Suntikul, 2010-04-12 Tourism is a vital tool for political and economic change Calls for boycotts by tourists of countries reflect the huge impact that tourist activity and the tourism industry has on political change

North Korea Paul French, 2007-07-15 This reissue of Paul French's acclaimed introduction to North Korea provides an up to the minute overview of the politics economics and history of the DPRK with added chapters dealing with recent events A new foreword examines why North Korea remains an issue in world politics and argues that an understanding of the country is more important now than ever A new in depth postscript offers analysis of recent years why Pyongyang felt compelled to test a bomb and revert to blatant nuclear diplomacy and how the crisis can be resolved peacefully

Escaping North Korea Mike Kim, 2010-05-16 The first of its kind this book provides a unique inside look into the hidden world of ordinary North Koreans Mike Kim who worked with refugees on the Chinese border for four years recounts their experiences of enduring famine sex trafficking and torture as well as the inspirational stories of those who overcame tremendous adversity to escape the repressive regime of their homeland and make new lives One of the few Americans granted entry into the secretive Hermit Kingdom Kim came to know the isolated country and its people intimately His North Korean friends entrusted their secrets to him as they revealed the government's brainwashing tactics and confessed their true thoughts about the repressive regime that so rigidly controls their lives Civilians and soldiers alike spoke of what North Koreans think of Americans and war with America Children remembered the suffering they endured through the famine Women and girls recalled their horrific experiences at the hands of sex traffickers Former political prisoners shared their memories of beatings torture and executions in the gulags With the permission of these courageous individuals Kim now shares their stories and recounts his dramatic experiences leading North Koreans to asylum through the six thousand mile modern day underground railway through Asia His unflinching narrative exposes the truth about North Korea stripping away the last veils that still shroud this brutal dictatorship

Voices of Foreign Brides Choong Soon

Kim,2011-10-16 Since the early 1990s there has been a critical shortage of marriageable women in farming and fishing villages in Korea This shortage which has become a major social problem resulted from a mass exodus of Korean women to cities and industrial zones Korea s efforts to give rural bachelors a chance to marry have succeeded in providing 120 146 brides from 123 countries However the Korean government has proven to be ill prepared to deal with the problems that foreign brides have encountered family squabbles prejudice discrimination divorce suicide and many adversities The UN Commission on the Elimination of Racial Discrimination warned Korea to stop mistreatment of foreign brides and their children those of so called mixed blood on account of human rights violations This book comprehensively covers Korean multiculturalism with a focus on the foreign brides In a two pronged ethnographic approach it offers a historical account of Korean immigration and naturalization while also relating that past to the contemporary situation As more and more people cross national boundaries this detailed description of Korean multiculturalism serves as a valuable case study for an increasingly globalized world Kim tells the stories of these voiceless women in a compassionate manner

The Partition Motif in Contemporary Conflicts Smita Tewari Jassal,Eyal Ben-Ari,2007-01-12 Papers presented at the Conference on Memory and the Partition Motif in Contemporary Conflicts held in July 2005

The Search for a Unified Korea Eui-Gak Hwang,2010-03-11 North Korea s brinkmanship diplomacy has continued to disturb the world with its seemingly reckless missile testing as the country s leader Kim Jong Il is rumored to be terminally ill with pancreatic cancer North Korea appears to be in a state of serious internal crisis not only because its dictatorial system albeit skillful and ruthless leadership is inherently unstable if not skillful and ruthless leadership but also because the main pillar of Kim Jong Il s legitimacy is rapidly eroding due to both mass starvations and the exodus of grassroots and mass exodus of the North Korean people into nearby regions The main objective of this book is to explore the probability of North Korea s implosion and second to search for a feasible way for Korean reunification as a possible consequence of a big bang event on the peninsula The geopolitics of the Korean Peninsula is historically very complicated as Korea is bordered and surrounded by four big powers namely China Russia Japan and the United States Each country has its own varying degrees of political economic and military stakes with respect to the Korean Peninsula Thus the Land of the Morning Calm has remained divided since 1945 mainly as a result of the domain war among these super powers As the North nears a turning point however there is a new possibility for the two Koreas to reunite if the international environments work in their favor and if both countries are well prepared to assume reunification

The New Asian Hemisphere Kishore Mahbubani, 2010-11-12 For centuries the Asians Chinese Indians Muslims and others have been bystanders in world history Now they are ready to become co drivers Asians have finally understood absorbed and implemented Western best practices in many areas from free market economics to modern science and technology from meritocracy to rule of law They have also become innovative in their own way creating new patterns of cooperation not seen in the West Will the West resist the rise of Asia The good news is that Asia wants to replicate not dominate the West For a happy outcome to emerge the West must gracefully give up its domination of global institutions from the IMF to the World Bank from the G7 to the UN Security Council History teaches that tensions and conflicts are more likely when new powers emerge This too may happen But they can be avoided if the world accepts the key principles for a new global partnership spelled out in *The New Asian Hemisphere*

Race to the Top Tomas Larsson, 2001-11-25 As people all over the world become more culturally and economically connected a backlash towards globalization is developing From Seattle to Genoa protesters travel to every meeting of international economic institutions to denounce global markets What's the real story of globalization Is it a race to the bottom as the critics of capitalism insist Or a race to the top as Tomas Larsson suggests Instead of debates among theoreticians and activists it's time for some on the ground reporting about the effects of globalization Larsson a Swedish journalist spent ten years reporting from Bangkok In this book he takes us to the slums of Rio a bicycle factory in Korea a brothel in a back corner of Thailand and more In all the places he finds that the changes of the past ten years have given people tremendous opportunities His perspective on globalization differs from those of Pat Buchanan William Greider or the Seattle protesters And it's more vivid than econometric articles because it's on the spot reporting from all over the developing world Tomas Larsson looks past the dry statistics and arid debates to examine real people around the world He finds that thanks to the spread of global markets hundreds of millions of previously poor people have left poverty and misery behind them and taken their place among the global middle class This is a book full of good news more relevant than ever as the world's finance ministers cower behind

chainlink fences afraid to defend the economic system that is spreading wealth more broadly than ever **To The Last Round** Andrew Salmon, 2010-04-25 NEW PAPERBACK EDITION Salmon's vivid use of recollections and dramatic quotes brings alive an unjustly forgotten conflict Time Out With even World War II now just on the edges of living memory and with British forces now engaged in a lengthy brutal and attritional old fashioned war in Afghanistan historical attention is starting to turn to the Korean War of the early 1950s And remarkably the most notorious and celebrated battle in that conflict from a British point of view has never previously been written about at length Andrew Salmon's book which has garnered excellent reviews and sold out two hardback printings already has filled that gap This is the story of the Battle of the Imjin River when the British 29th Infantry Brigade and above all the Glorious Glosters of the Gloster Regiment fought an epic last stand against the largest communist offensive of the war It lasted three days of bitter hand to hand combat By the end of it one battalion of the Glosters some 750 men had been reduced to just 50 survivors Andrew Salmon's definitive history which gained excellent reviews in hardback and sold very steadily is very much in the Antony Beevor mould accessible pacy narrative and painting a moving and exciting picture through the extensive use of eyewitness accounts of veterans of whom he has tracked down and interviewed dozens Andrew Salmon is a Seoul based journalist who writes for The Times The Washington Times and Forbes magazine He first became fascinated by the battle in 2001 when he met British veterans returning to the Imjin River to mark the 50th anniversary Rogue Regime Jasper Becker, 2005-05-01 What happens when a dictator wins absolute power and isolates a nation from the outside world In a nightmare of political theory stretched to madness and come to life North Korea's Kim Jong Il made himself into a living god surrounded by lies and flattery and beyond criticism As over two million of his subjects starved to death Kim Jong Il roamed between palaces staffed by beautiful girls and stocked with expensive international delicacies Outside the steel mills shut down the trains stopped running the power went out and the hospitals ran out of medicine When the population threatened to revolt Kim imposed a reign of terror deceived the United Nations and plundered the country's dwindling resources to become a nuclear power Now this tiny bankrupt nation is using her nuclear capability to blackmail the United States Veteran correspondent Jasper Becker takes us inside one of the most secretive countries in the world exposing the internal chaos blind faith rampant corruption and terrifying cruelty of its rulers Becker details the vain efforts to change North Korea by actors inside and outside the country and the dangers this highly volatile country continues to pose This unique land ruled by one family's megalomania and paranoia seems destined to survive and linger on a menace to its own people and to the rest of the world But should the nations of the world allow this regime to survive That's the question with which this book concludes
