Nature could resolve human contradictions and that nature itself confirmed the American destiny Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals Novak illuminates the range of ideas projected onto the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz H Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau and Friedrich Wilhelm von Schelling Now with a new preface this spectacular volume captures a vast cultural panorama It beautifully demonstrates how the idea of nature served not only as a vehicle for artistic creation but as its ideal form An impressive achievement Barbara Rose The New York Times Book Review An admirable blend of ambition elan and hard research Not just an art book it bears on some of the deepest fantasies of American culture as a whole Robert Hughes Time Magazine [The Landscape of Frederic Edwin Church](#) David C. Huntington,1985 **Architects of an American Landscape** Hugh Howard,2022-01-25 A dual portrait of America's first great architect Henry Hobson Richardson and her finest landscape designer Frederick Law Olmsted and their immense impact on America As the nation recovered from a cataclysmic war two titans of design profoundly influenced how Americans came to interact with the built and natural world around them through their pioneering work in architecture and landscape design Frederick Law Olmsted is widely revered as America's first and finest parkmaker and environmentalist the force behind Manhattan's Central Park Brooklyn's Prospect Park Biltmore's parkland in Asheville dozens of parks across the country and the preservation of Yosemite and Niagara Falls Yet his close friend and sometime collaborator Henry Hobson Richardson has been almost entirely forgotten today despite his outsized influence on American architecture from Boston's iconic Trinity Church to Chicago's Marshall Field Wholesale Store to the Shingle Style and the wildly popular open plan he conceived for family homes Individually they created much beloved buildings and public spaces Together they married natural landscapes with built structures in train stations and public libraries that helped drive the shift in American life from congested cities to developing suburbs across the country The small reserved Olmsted and the passionate Falstaffian Richardson could not have been more different in character but their sensibilities were closely aligned In chronicling their intersecting lives and work in the context of the nation's post war renewal Hugh Howard reveals how these two men created original all American idioms in architecture and landscape that influence how we enjoy our public and private spaces to this day **The Anatomy of Nature** Rebecca Bedell,2024-05-14 An illuminating account of the interplay between science religion and nature in nineteenth century landscape painting Geology was in vogue in nineteenth century America People crowded lecture halls to hear geologists speak and parlor mineral cabinets signaled social respectability and intellectual engagement This was also the heyday of the Hudson River School and many prominent landscape painters avidly studied geology Thomas Cole Asher Durand Frederic Church John F Kensett William Stanley Haseltine Thomas Moran and other artists read scientific texts participated in geological surveys and carried rock hammers into the field to collect fossils and mineral specimens As they crafted their paintings these artists drew on their geological knowledge to shape new

vocabularies of landscape elements resonant with moral spiritual and intellectual ideas Rebecca Bedell contributes to current debates about the relationship among art science and religion by exploring this phenomenon She shows that at a time when many geologists sought to disentangle their science from religion American artists generally sidestepped the era's more materialist science particularly Darwinism They favored a conservative Christianized geology that promoted scientific study as a way to understand God Their art was both shaped by and sought to preserve this threatened version of the science And through their art they advanced consequential social developments including westward expansion scenic tourism the emergence of a therapeutic culture and the creation of a coherent and cohesive national identity This major study of the Hudson River School offers an unprecedented account of the role of geology in nineteenth century landscape painting It yields fresh insights into some of the most influential works of American art and enriches our understanding of the relationship between art and nature and between science and religion in the nineteenth century It will draw a broad audience of art historians Americanists historians of science and readers interested in the American natural landscape

Frederic Edwin Church and the North American Landscape, 1845-60 Franklin Kelly, 19?? The Languages of Landscape, 1997 *Within the Landscape* Phillip Earenfight, Nancy Siegel, 2005 During the nineteenth century American artists writers and philosophers collaborated in the formation of a culture devoted to the country's natural splendors and the meanings these might harbor for its citizens Arguably the earliest and most influential of such pictorial and literary mergings took place in the Hudson River School the subject of the essays gathered in this volume from the Trout Gallery of Dickinson College The artists and writers discussed in this anthology range from Thomas Cole the founder of the Hudson River School to Stanford Gifford and Washington Irving After an introduction to American landscape the essays treat notions of divine presence in nature the spread of imagery through prints and the transformation of the Catskills into a resort and a refuge Offering innovative scholarship in accessible language *Within the Landscape* lends itself to use as a textbook in courses on nineteenth century American art and culture *Fashioning the Canadian Landscape* J.I. Little, 2018-01-01 In his book *Fashioning the Canadian Landscape* J I Little examines how Canada much like the United States came to be identified with its natural landscape Little argues that in contrast to America Canada's image was strongly influenced by the picturesque convention favoured by British travel writers
