The Dialectics of Seeing Susan Buck-Morss, 1991-07-01 Walter Benjamin's magnum opus was a book he did not live to write In *The Dialectics of Seeing* Susan Buck Morss offers an inventive reconstruction of the Passagen Werk or Arcades Project as it might have taken form Working with Benjamin's vast files of citations and commentary which contain a myriad of historical details from the dawn of consumer culture Buck Morss makes visible the conceptual structure that gives these fragments philosophical coherence She uses images throughout the book to demonstrate that Benjamin took the debris of mass culture seriously as the source of philosophical truth The Paris Arcades that so fascinated Benjamin as they did the Surrealists whose materialist metaphysics he admired were the prototype the 19th century ur form of the modern shopping mall Benjamin's dialectics of seeing demonstrate how to read these consumer dream houses and so many other material objects of the time from air balloons to women's fashions from Baudelaire's poetry to Grandville's cartoons as anticipations of social utopia and simultaneously as clues for a radical political critique Buck Morss plots Benjamin's intellectual orientation on axes running east and west north and south Moscow Paris Berlin Naples and shows how such thinking in coordinates can explain his understanding of dialectics at a standstill She argues for the continuing relevance of Benjamin's insights but then allows a set of afterimages to have the last word

controllers strike and other evidence on pay and labor relations in government unions Finally Adie examines the experiences of Canada and Great Britain with privatization of government companies He then offers a comprehensive and controversial reform plan for the U S Postal Service with no further monopoly privileges or taxpayer subsidies He argues that private companies should be free to compete with the Postal Service and it in turn should be free to compete in all phases of the communications business Without privatization and deregulation the Postal Service is doomed to continuing inefficiency rising costs worsening labor relations and an increasing loss of customers to more innovative and efficient service providers Competition would give the Postal Service a chance to enter the 21st ce Dinosaurs Spencer G.
