Perjury and Pardon, Volume I Jacques Derrida,2022-09-27 An inquiry into the problematic of perjury or lying and forgiveness from one of the most influential philosophers of the twentieth century One only ever asks forgiveness for what is unforgivable From this contradiction begins *Perjury and Pardon* a two year series of seminars given by Jacques Derrida at the cole des hautes tudes en sciences sociales in Paris in the late 1990s In these sessions Derrida focuses on the philosophical ethical juridical and political stakes of the concept of responsibility His primary goal is to develop what he calls a problematic of lying by studying diverse forms of betrayal infidelity denial false testimony perjury unkept promises desecration sacrilege and blasphemy Although forgiveness is a notion inherited from multiple traditions the process of forgiveness eludes those traditions disturbing the categories of knowledge sense history and law that attempt to circumscribe it Derrida insists on the unconditionality of forgiveness and shows how its complex temporality destabilizes all ideas of presence and even of subjecthood For Derrida forgiveness cannot be reduced to repentance punishment retribution or salvation and it is inseparable from and haunted by the notion of perjury Through close readings of Kant Kierkegaard Shakespeare Plato Jank l vitch Baudelaire and Kafka as well as biblical texts Derrida explores diverse notions of the evil or malignancy of lying while developing a complex account of forgiveness across different traditions

The Role of Working Memory and Executive Function in Communication under Adverse Conditions Mary Rudner,Carine Signoret,2016-06-20

Communication is vital for social participation However communication often takes place under suboptimal conditions This makes communication harder and less reliable leading at worst to social isolation In order to promote participation it is necessary to understand the mechanisms underlying communication in different situations Human communication is often speech based either oral or written but may also involve gesture either accompanying speech or in the form of sign language

For communication to be achieved a signal generated by one person has to be perceived by another person attended to comprehended and responded to This process may be hindered by adverse conditions including factors that may be internal to the sender e g incomplete or idiosyncratic language production occur during transmission e g background noise or signal processing or be internal to the receiver e g poor grasp of the language or sensory impairment The extent to which these factors interact to generate adverse conditions may differ across the lifespan Recent work has shown that successful speech communication under adverse conditions is associated with good cognitive capacity including efficient working memory and executive abilities such as updating and inhibition Further frontoparietal networks associated with working memory and executive function have been shown to be activated to a greater degree when it is harder to achieve speech comprehension To date less work has focused on sign language communication under adverse conditions or the role of gestures accompanying speech communication under adverse conditions It has been proposed that the role of working memory in communication under such conditions is to keep fragments of an incomplete signal in mind updating them as appropriate and inhibiting irrelevant information until an adequate match can be achieved with lexical and semantic representations held in long term memory Recent models of working memory highlight an episodic buffer whose role is the multimodal integration of information from the senses and long term memory It is likely that the episodic buffer plays a key role in communication under adverse conditions The aim of this research topic is to draw together multiple perspectives on communication under adverse conditions including empirical and theoretical approaches This will facilitate a scientific exchange among individual scientists and groups studying different aspects of communication under adverse conditions and or the role of cognition in communication As such this topic belongs firmly within the field of Cognitive Hearing Science Exchange of ideas among scientists with different perspectives on these issues will allow researchers to identify and highlight the way in which different internal and external factors interact to make communication in different modalities more or less successful across the lifespan Such exchange is the forerunner of broader dissemination of results which ultimately may make it possible to take measures to reduce adverse conditions thus facilitating communication Such measures might be implemented in relation to the built environment the design of hearing aids and public awareness

educational success Research demonstrates that virtually all young children have the capability to learn and become competent in mathematics Furthermore young children enjoy their early informal experiences with mathematics Unfortunately many children s potential in mathematics is not fully realized especially those children who are economically disadvantaged This is due in part to a lack of opportunities to learn mathematics in early childhood settings or through everyday experiences in the home and in their communities Improvements in early childhood mathematics education can provide young children with the foundation for school success Relying on a comprehensive review of the research Mathematics Learning in Early Childhood lays out the critical areas that should be the focus of young children s early mathematics education explores the extent to which they are currently being incorporated in early childhood settings and identifies the changes needed to improve the quality of mathematics experiences for young children This book serves as a call to action to improve the state of early childhood mathematics It will be especially useful for policy makers and practitioners those who work directly with children and their families in shaping the policies that affect the education of young children

Browning's Lyrics Eleanor Cook, 1974-12-15 Browning s lyrics are favourite choices for anthologies but are rarely examined closely This is the first full length study of the lyrics and includes detailed analyses of such well known poems as Love Among the Ruins Two in the Campagna A Serenade at the Villa A Toccata of Galuppi s By the Fireside and James Lee s Wife Eleanor Cook explores Browning s use of repeated images and themes in the lyrics examines these patterns in other poems and in his letters and analyses their growth and change in all his work She demonstrates how the lyrics may be linked with Browning s other work and shows something of his essential artistic unity His imaginary is found to be more consistent and complex than is usually assumed Students of Browning will find this work stimulating and instructive while lovers of Browning will read it with pure pleasure The reader will return to many of the poems with a richer sense of their continuing vitality In an earlier form this study was awarded the first A S P Woodhouse Prize by the University of Toronto

The Provenance of Deuteronomy 32 Paul Sanders, 2021-11-15 This study offers an extensive survey of previous literature dealing with the provenance of the song in Deuteronomy 32 a renewed discussion of its text and language as well as an analysis of its poetic structure with the help of a new method The author tests the tenability of older theories and proposes a new theory based on systematic research into the intertextual links with other parts of the Hebrew Bible and extra biblical literature of the Ancient Near East Separate sections are dedicated to the song s descriptions of the relationship between YHWH and the gods and to the identity of the hostile people to which the song refers The author concludes that a pre exilic date is extremely likely for the song in its entirety
