around the Internet to find a snippet of code to do something you need could lead to either decent code or utter garbage that you'd surely regret using later. No writing high quality JavaScript these days is a whole lot easier with the advent of top notch libraries that save you time and effort and one that stands out from most others is Dojo. Dojo is a library like few others written by some of the best JavaScript coders around today providing nearly everything you'll need to write modern rich Internet applications all in one place. From Ajax to widgets to client side persistence and language extensions and many points in between Dojo has it all. In Practical Dojo Projects you'll learn all about what Dojo has to offer. You'll see it in action in the form of five fully functional applications which include A contact manager for storing info for all the important people in your life. A code cabinet a place to store index and get code snippets from. A stock tracker to keep track of your stock portfolio. A message forum for open discussions on topics you define. Even a fun little game. By the time you've finished reading you'll have a firm grasp on what Dojo is all about and you'll have the preparation you need to begin to use it yourself in your own projects. See you inside.
