Lopez,1979     **Money in the Western Legal Tradition** David Fox,Wolfgang Ernst,2016-01-28

Monetary law is essential to the functioning of private transactions and international dealings by the state nearly every legal transaction has a monetary aspect Money in the Western Legal Tradition presents the first comprehensive analysis of Western monetary law covering the civil law and Anglo American common law legal systems from the High Middle Ages up to the middle of the 20th century Weaving a detailed tapestry of the changing concepts of money and private transactions throughout the ages the contributors investigate the special contribution made by legal scholars and practitioners to our understanding of money and the laws that govern it Divided in five parts the book begins with the coin currency of the Middle Ages moving through the invention of nominalism in the early modern period to cashless payment and the rise of the banking system and paper money then charting the progression to fiat money in the modern era Each part commences with an overview of the monetary environment for the historical period written by an economic historian or numismatist These are followed by chapters describing the legal doctrines of each period in civil and common law Each section contains examples of contemporary litigation or statute law which engages with the distinctive issues affecting the monetary law of the period This interdisciplinary approach reveals the distinctive conception of money prevalent in each period which either facilitated or hampered the implementation of economic policy and the operation of private transactions     *The Oxford Handbook of Banking and Financial History* Youssef Cassis,Richard S. Grossman,Catherine R. Schenk,2016-06-23 The financial crisis of 2008 aroused widespread interest in banking and financial history among policy makers academics journalists and even bankers in addition to the wider public References in the press to the term Great Depression spiked after the failure of Lehman Brothers in November 2008 with similar surges in references to economic history at various times during the financial turbulence In an attempt to better understand the magnitude of the shock there was a demand for historical parallels How severe was the financial crash Was it in fact the most severe financial crisis since the Great Depression Were its causes unique or part of a well known historical pattern And have financial crises always led to severe depressions Historical reflection on the recent financial crises and the long term development of the financial system go hand in hand This volume provides the material for such a reflection by presenting the state of the art in banking and financial history Nineteen highly regarded experts present chapters on the economic and financial side of banking and financial activities primarily though not solely in advanced economies in a long term comparative perspective In addition to paying attention to general issues not least those related to theoretical and methodological aspects of the discipline the volume approaches the banking and financial world from four distinct but interrelated angles financial institutions financial markets financial

and market institutions are created and transformed in Saudi Arabia and Yemen two countries that typify labor and oil exporters in the developing worlds In a world where the international economy dramatically affects domestic developments the question of where institutions come from becomes at once more urgent and more complex In both Saudi Arabia and Yemen fundamental state and market institutions forged during a period of isolation at the end of World War I were destroyed and reshaped not once but three times in response to exogenous shocks Comparing boom bust cycles Chaudhry exposes the alternating social and organizational origins of institutions arguing that both broad changes in the international economy and specific forms of international integration shape institutional outcomes Labor and oil exporters thus experience identical economic cycles but generate radically different state market and financial institutions in response to different resource flows Chaudhry supplemented years of field work in Saudi Arabia and Yemen with extensive analysis of previously unavailable materials in the Saudi national archives

Islam in the Modern World Denis MacEoin, Ahmed Al-Shahi, 2013-07-24 In recent years events in the

Islamic world have captured the attention of the West to an unprecedented degree. However, much of the media coverage of events like the Islamic revolution in Iran has merely reinforced current prejudices and misconceptions about Islam. This collection of essays by specialists in a variety of disciplines gives an impressionistic overview of contemporary Islam. Different areas of Islamic life are singled out for special attention; these include the problem of relations between Islam and the West, the role of the Sufi orders and the revival of religious fundamentalism, Islam and the feminine, Islamic economics and Islamic architecture. Geographically, the essays cover a wide area ranging over Sudan, Turkey, Iran, Egypt, and Saudi Arabia. Each discussion should appeal to the layman and specialist alike and collectively they bring together a comprehensive range of material not often covered in one volume. Above all, they cut across the stereotypes of Islam found in the popular media to reveal facets of a complex living tradition often unsuspected in the West. First published in 1983.

**Trust in Troubled Times** Brett Sheehan, 2003. This timely book traces the development of banking and paper money in republican Tianjin in order to explore the creation of social trust in financial institutions. Framing the study around Bian Baimei, a conscientious branch manager of the Bank of China, Brett Sheehan analyzes the actions of bankers, officials, and local elites as they tried to overcome political and financial crises and instill trust in the banking system. After early failures in promoting trust, government authority as a regulator of the financial system gradually increased, peaking in 1935 when the state unified the money supply for the first time in several hundred years. Concurrently, when local elites proved unable to develop successful strategies to make people trust the system, their influence declined. The need for trust in increasingly complex financial arrangements redefined state-society relations, simultaneously enhancing state power and creating new constraints on the actions of both elites and governments. *Trust in Troubled Times* is a valuable new perspective on the economic, social, and political history of modern China.

*Communities, Politics, and Reformation in Early Modern Europe* Thomas Brady, 2021-10-25. The studies united in this volume explore themes of community, politics, religion, gender, and social conflict and accommodation during the first decades of the Reformation movement. Other chapters investigate historiographical themes, especially the interpretation of early modern German history. Two longer chapters address European themes: the historical sociology of early modern societies in terms of legal definitions of status and modern conceptions of economic class and the difference between central and western European development in a global context. Taken together, the studies explore the transition zone between medieval and modern history in both microhistorical, especially urban and regional, and broadly comparative contexts. Some of the studies are supplementary to the author's books on the sixteenth-century Protestant Reformation at Strasbourg in southern Germany and in the Holy Roman Empire.
