

The Deaf Child

Edith Fitzgerald

The Deaf Child:

The Deaf Child in the Family and at School Patricia Elizab Spencer, Carol J. Erting, Marc Marschark, 1999-11 A tribute to a much respected figure in Deaf education this book also reflects the state of current understanding of the complex interacting domains in which Deaf children develop For educators developmentalists and specialists in Deafness **Raising and Educating a Deaf Child** Marc Marschark, 2017-11-01 Now in its third edition Raising and Educating a Deaf Child is a comprehensive evidence based guide to the choices controversies and decisions faced by parents and teachers of deaf children today The Young Deaf Child David Luterman, Ellen Kurtzer-White, Richard C. Seewald, 1999 **Keys to Raising a Deaf Child** Virginia Frazier-Maiwald, Virginia F. Frazier-Maiwald, Lenore M. Williams, 1999 Two educators who are also parents of deaf children offer positive advice and encouragement on helping children adapt to deafness They show how problems related to deafness can be overcome so that the child interacts as a social and intellectual equal with children who can hear The authors recommend what is called bimodal communication that is having the child parents and other non deaf family members learn American Sign Language as a first step in normal communication Though admitting that this approach is controversial they are personally convinced that bimodal use of signed and spoken English allows the deaf child s communication ability to grow and vocabulary to blossom The book also offers much good general advice on parenting stressing that deaf and hearing children are more alike than they are different *Raising and Educating a Deaf Child* National Technical Institute for the Deaf Rochester Institute of Technology Marc Marschark Director and Professor, 1997-04-17 Over 90% of all deaf children are born to hearing parents For most of these mothers and fathers their own child is the first deaf person they have ever met Raising a child who can hear is a challenging and difficult task but raising a deaf child can seem like an overwhelming responsibility especially with the mass of conflicting information and advice offered by professionals and well meaning friends and family members In Raising and Educating a Deaf Child Marc Marschark offers parents and teachers a readable and comprehensive summary including everything a parent would want to know about growing up deaf Parents of a deaf child like the parents of any child want to know the answers to some apparently straightforward questions such as What kind of school will provide my child with the best education What language experience is best for my child sign or speech Will my child be able to get a good job Marschark addresses these questions and more with topics ranging from what it means to be deaf and the uniqueness of Deaf culture to the medical causes of early hearing loss from technological aids for the deaf such as TTYs and cochlear implants to the educational and social opportunities available to deaf children He describes the many ways that the environment of home and school can influence a deaf child s chances for success in both academic and social circles Above all he emphasizes the need for early detection of hearing loss and the importance of being able to communicate with deaf children from a very early age recommending that all parents of deaf children learn sign language and use it often This is not a how to book or one with all

the right answers for raising a deaf child This is a guide through the many conflicting suggestions and programs for raising deaf children as well as the likely implications of taking one direction or the other A leading researcher himself Marschark makes sense of the most current educational and scientific literature including his own recent research and talks to deaf children their parents and deaf adults about what is important to them The result is a readable and enlightening survey of what we know about the language social and intellectual development of deaf children and what educational and practical issues face them and their families Parents of deaf children can and should make their own decisions based on what is right for their family and for their child Armed with Raising and Educating a Deaf Child parents will have access to the best information available allowing them to make informed decisions for their child **The Deaf Child** James Kerr Love,1911

The Deaf Child in a Hearing Family Arthur Boothroyd,Janice Gatty,2011-11-01 **The Deaf Child** Edith Whetnall,Dennis Butler Fry,Denis Butler Fry,1971 The Deaf Child and His Family Susan Gregory,1976 **Deafness and Child Development** Kathryn P. Meadow,2023-11-10 Oftentimes a child s deafness can be as disconcerting to the uniformed adult as it is debilitating to the deaf child Yet parents students and teachers who try to inform themselves find doing so difficult the issues are emotional and too often have been the subject of clashes among professional and lay people In this comprehensive study Meadow provides a rational informed and balanced approach Individual chapters survey the central work done on the linguistic cognitive social and psychological effects of profound deafness in children and offer practical discussions with abundant concrete examples The result is a book that provides a context for understanding research in childhood deafness and ways to apply its findings Of particular interest to professionals who work with deaf children the concluding chapter analyzes unresolved matters of policy These include oral only versus oral visual communication recommended forms for visual communication residential versus day school education the benefits and liabilities of mainstreaming the treatment of minority multiply handicapped and gifted deaf children and the role of deaf adults in the socialization of deaf children This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1980 **How Deaf Children Learn** Marc Marschark,Peter C. Hauser,2011-12-01 How can parents and teachers most effectively support the language development and academic success of deaf and hard of hearing children Will using sign language interfere with learning spoken language Should deaf children be placed in classrooms with hearing children Are traditional methods of teaching subjects such as reading and math to hearing children appropriate for deaf learners As many parents and teachers will attest questions like these have no easy answers and it can be difficult for caring adults to separate science from politics and fact from opinion in order to make informed decisions about how to help deaf children learn In this invaluable guide renowned authorities Marc Marschark and

Peter Hauser highlight important new advances in scientific and educational research that can help parents and teachers of students with significant hearing loss The authors stress that deaf children have strengths and needs that are sometimes very different from those who can hear Consequently if deaf students are to have full academic access and optimal educational outcomes it is essential that parents and teachers learn to recognize these differences and adjust their teaching methods to them Marschark and Hauser explain how the fruits of research conducted over the last several years can markedly improve educational practices at home and in the classroom and they offer innovative strategies that parents and teachers can use to promote learning in their children The result is a lively accessible volume that sheds light on what it means to be a deaf learner and that provides a wealth of advice on how we can best support their language development social skills and academic success

What the Mother of a Deaf Child Ought to Know John Dutton Wright,1915 **They Grow in Silence** Eugene D. Mindel,McCay Vernon,1971 Discusses the vocational psychological and communication problems of deaf children emphasizing the overlapping rehabilitative roles of parents and professional audiologists *Deaf Children* Lynn S. Liben,2013-09-24 *Deaf Children Developmental Perspectives* aims to identify new areas of research evaluation and application related to deafness The book discusses the development of deaf children the methodological issues in research with deaf children and the structural properties of American sign language The text also describes the acquisition of signed and spoken language speculations concerning deafness and learning to read future prospects in language and communication for the congenitally deaf The role of vision in language acquisition by deaf children research and clinical issues on impulse control in deaf children and the effects of deafness on childhood development are also considered The book further tackles the education implications of research and theory with the deaf developmental perspectives on the experiential deficiencies of deaf children and the development of the deaf individual and the deaf community Scholars interested in more general issues within disciplines such as sociology developmental psychology linguistics psycholinguistics experimental psychology communication clinical psychology psychiatry and education will find the text invaluable *They Grow in Silence* Eugene Mindel,McCay Vernon,National Association of the Deaf,1977 **You and Your Deaf Child** John W. Adams,1997 Discusses parenting skills and problem solving techniques for parents of deaf and hearing impaired children

Educational and Developmental Aspects of Deafness Donald F. Moores,1990 *Educational and Developmental Aspects of Deafness* details the ongoing revolution in the education of deaf children More than 20 researchers contributed their discoveries in anthropology education linguistics psychology sociology and other major disciplines with special concentration upon the education of deaf children Divided into two parts on education at home and in school this incisive book documents breakthroughs such as the public s interest in sign language the increasing availability of interpreters the growing perception of deafness as a social condition not a pathology and other positive trends It is unique as the first purely research based text and reference point for further study of the education of deaf children **People of the Eye** Rachel Locker

McKee,2001 Deaf people in New Zealand are often little known outside their own culture People of the Eye brings their world to life in personal histories translated into English with a series of photographs of the deaf community The storytellers are both old and young and they reflect both the diversity and commonality of deaf experience the painful lives of a generation brought up forbidden to use sign language contrasted with the confidence of young people using New Zealand Sign Language as they attend school and assert deaf pride The differences between children growing up in deaf families and those who struggle with identity as deaf children in hearing families are illuminating These are stories of joy and sadness confusion and resolution and regret and optimism *Straight Language for the Deaf* Edith Fitzgerald,1949 **The Deaf Child in the Public Schools** Lee Katz,Steve L. Mathis,Edward C. Merrill,1978
