The Fall of an American Rome Quentin R. Skrabec Jr., 2014-03-01 This is the story of the de industrialization of America written by a Business professor with a background in steel company management who grew up in the city of Pittsburgh and loved its manufacturing environment The book is based on the facts and aims to avoid any partisan political viewpoint which is not as difficult as it may seem since both U S political parties support free trade economics The story does not single out the union the workers management politicians or American voters and consumers since there is plenty of blame to share Even the economic policy of the country since 1945 which clearly must carry a large portion of the blame was accepted for all the right reasons Free trade was to promote world peace and democracy No one foresaw the ancillary effects of the 1970s on the United States Yet this approach has brought destruction upon our cities workers managers and country The author s perspective is one of a love for American manufacturing and those once robust cities such as Detroit Toledo Pittsburgh Akron and so many others that drove forward the American economy

Bad Old Days Alan J. Levine, 2017-07-28 For many especially those on the political left the 1950s are the bad old days The widely accepted list of what was allegedly wrong with that decade includes the Cold War McCarthyism racial segregation self satisfied prosperity and empty materialism The failings are coupled with ignoring poverty and other social problems complacency conformity the suppression of women and puritanical attitudes toward sex In all the conventional wisdom sees the decade as bland and boring with commonly accepted people paralyzed with fear of war Communism or McCarthyism or all three Alan J Levine shows that the commonly accepted picture of the 1950s is flawed It distorts a critical period of American history That distortion seems to be dictated by an ideological agenda including an emotional obsession with a sentimentalized version of the 1960s that in turn requires maintaining a particular misleading view of the post World War II era that preceded it Levine argues that a critical view of the 1950s is embedded in an unwillingness to realistically evaluate the evolution of American society since the 1960s Many and not only liberals and those further to the left desperately desire to avoid seeing or admitting just how badly many things

have gone in the United States since the 1960s *Bad Old Days* shows that the conventional view of the 1950s stands in opposition to the reality of the decade Far from being the dismal prelude to a glorious period of progress the postwar period of the late 1940s and 1950s was an era of unprecedented progress and prosperity This era was then derailed by catastrophic political and economic misjudgments and a drastic shift in the national ethos that contributed nothing or less than nothing to a better world
