On Borders Paulina Ochoa Espejo,2020-06-18 When are borders justified Who has a right to control them Where should they be drawn Today people think of borders as an island s shores Just as beaches delimit a castaway s realm so borders define the edges of a territory occupied by a unified people to whom the land legitimately belongs Hence a territory is legitimate only if it belongs to a people unified by a civic identity Sadly this Desert Island Model of territorial politics forces us to choose If we want territories then we can either have democratic legitimacy or inclusion of different civic identities but not both The resulting politics creates mass xenophobia migrant bashing hoarding of natural resources and border walls To escape all this On Borders presents an alternative model Drawing on an intellectual tradition concerned with how land and climate shape institutions it argues that we should not see territories as pieces of property owned by identity groups Instead we should see them as watersheds as interconnected systems where institutions people the biota and the land together create overlapping civic duties and relations what the book calls place specific duties This Watershed Model argues that borders are justified when they allow us to fulfill those duties that border control rights spring from internationally agreed conventions not from internal legitimacy that borders should be governed cooperatively by the neighboring states and the states system and that border redrawing should be done with environmental conservation in mind The book explores how this model undoes the exclusionary politics of desert islands

Earth and World Kelly Oliver, 2015-05-05 Critically engaging the work of Immanuel Kant Hannah Arendt Martin Heidegger and Jacques Derrida together with her own observations on contemporary politics environmental degradation and the pursuit of a just and sustainable world Kelly Oliver lays the groundwork for a politics and ethics that embraces otherness without exploiting difference Rooted firmly in human beings relationship to the planet and to each other Oliver shows peace is possible only if we maintain our ties to earth and world Oliver begins with Immanuel Kant and his vision of politics grounded on earth as a finite surface shared by humans She then incorporates Hannah Arendt's belief in plural worlds constituted through human relationships Martin Heidegger's warning that alienation from the Earth endangers not only politics but also the very essence of being human and Jacques Derrida's meditations on the singular worlds individuals human and otherwise create and how they inform the reality we inhabit Each of these theorists Oliver argues resists the easy idealism of world citizenship and globalism yet they all think about the earth against the globe to advance a grounded ethics They contribute to a philosophy that avoids globalization's totalizing and homogenizing impulses and instead help build a framework for living within and among the world's rich biodiversity

Chapter 1 What They Found

The exciting and interesting beginning of Sky Islands a gripping book gets the reader interested Scientist Professor Elm who is known for his strange habits and insatiable curiosity is the first person to find out about a secret that lies far above the earth One clear night Professor Elm looks at the sky through his big old telescope which he has carefully adjusted over the years and he sees something amazing Shadows flash and dance in the sky for no clear reason It s not like these shadows are from clouds or birds flying by they re clear big and look like islands floating in the sky Professor Elm is thrilled about this finding He knows that what he is seeing could be one of the most important finds ever His heart beats faster when he thinks about these flying islands Do they have plants and animals that people have never seen before Are they full of diamonds or old secrets His thoughts are full of possibilities and he chooses to look into these islands to find out what they are hiding Professor Elm chooses to put together a group of explorers because he knows that a quest this big needs more than just his own knowledge Each team member would need certain skills to stay alive and find their way around these uncharted parts of the sky He thinks about Lily a young very smart guide who can read maps and compasses better than anyone else Lily is a great choice for this trip because she has always been interested in new things and exploring the unknown Then there s Captain Hawk a skilled pilot who has been flying in bad weather for a long time Captain Hawk is known for being able to keep calm and think straight when things get tough His knowledge would be very helpful as they

flew their Starling through uncharted territory and any possibly dangerous weather that might be around these mysterious sky islands Professor Elm tells his group what he plans to do and what he has found Lily and Captain Hawk are both excited and amazed by the idea of finding new worlds right above them They quickly decide to join the trip because they are interested and love the thrill of the unknown As a group they start getting ready for the trip by going over their gear looking at star charts and making a plan for how they will get there On the day of leaving there is a clear mix of worry and excitement Their strong and reliable Starling has everything they need for their trip like food safety gear navigational tools and of course Professor Elm s reliable telescope As the team gets on everyone feels both the unbridled excitement of the trip ahead and the weight of what they don t know The group sees the ground disappear under them as the Starling takes off and soars higher and higher into the sky The sky is so big that it goes on forever The air up here is cool and crisp and it feels great to be free Professor Elm sets up his telescope in the cockpit because he can t wait to see the flying islands for the first time The team is keeping an eye out for any sign of the strange shapes that Professor Elm saw through his telescope This makes the trip to the sky islands both exciting and nerve wracking After traveling for hours Lily s sharp eyes pick out something far away It s one of the sky islands and it looks just like Professor Elm said it would a big green flying mass that can be seen from far away You can feel the excitement in the Starling as they get closer and get ready to land and explore the unknown This is just the start of a wonderful journey that will undoubtedly be full of obstacles new experiences and learning The team knows that on each island they visit they will find secrets that will change how they see the world above and below ground This is the beginning of a trip that neither of them will soon forget It will be full of the thrill of discovery and the bond of friendship that will grow stronger as they face new challenges together

Chapter 2 The First Climb

In the exciting adventure Sky Islands Professor Elm Lily a young guide and Captain Hawk an experienced pilot set out on their first trip to the mysterious floating islands with a group of skilled explorers Their plane the Starling isn t a regular jet it s full of cool sensors and tools that were made just for studying these fantastic sky islands Strong binoculars environmental sensors for checking the air and weather and safe harnesses are all in the kit so you can explore the floating scenery There is a mix of tense expectation and excitement during the first climb The Starling s engines start to roar and the ground slowly gives way under them Above them a big blue sky opens up As they fly higher they break through a layer of fluffy clouds The clouds then part showing what will surely be their first stop a beautiful island with woods that floats eerily in the sky This island doesn t make any sense at all with its wide views and lush green forests that look like they re floating in the air with no clear support The team needs a moment to gather their thoughts because they are seeing something very interesting and strange Captain Hawk carefully brings the Starling closer as he gets ready to land on a clear flat part of the island When the crew gets off the ship after a smooth landing they are amazed by how much life is around them There are sounds of birds singing and leaves moving in the fresh air Moss is soft on the ground and there are brightly colored flowers all over it that look like they are

glowing from the inside Above the tall trees block the sun so that the forest floor has warm shaded patterns made by it The searchers are shocked by the strange plants they find they have never seen anything like them on the ground The leaves of some of the plants are shiny and the flowers of others give off soft shimmering light As they go deeper into the bush they come across some strange and interesting animals Small furry animals run across the forest floor interested in the newcomers Birds with bright feathers sing beautiful songs The group walks slowly so as not to upset the natural balance of this floating paradise Professor Elm who is very interested in science gathers and paints strange plants and animals Lily carefully plans their route with her compass and map to make sure they don't get lost and see as much as possible To make sure they can leave safely when the time comes Captain Hawk keeps an eye on the weather and the Starling The friends find a small creek in the woods The water is so clean it's like glass They put the cool tasty water in their bottles and are thankful that nature provided for them The sound of water running adds to the peaceful atmosphere of the island making it seem like it is in a different world As they look around they find what looks like the remains of an ancient civilization stone buildings that have been eaten by the trees and are now covered in moss and vines These artifacts show that these sky islands used to be home to people who were able to live in this higher environment giving the history of these islands a mysterious feel This first island adds to the mystery of the sky islands and also gives you a lot of different feelings The islands float but how Were they never inhabited or did prehistoric peoples formerly live there What happened to them The explorers are inquisitive and each new discovery increases their hunger for information The explorers return to the Starling at the conclusion of the day their minds racing with everything they've learned They go leaving the floating island behind but they carry memories and information that will aid them in their future journeys This first trip into the unknown has been a major success piquing interest and setting the door for further research into the fascinating sky islands
