

The background of the entire image is a photograph of a library. It features tall, dark wooden bookshelves filled with books. In the foreground, there are three white marble busts of men, likely philosophers, placed on a lower shelf or table. The lighting is warm, creating a scholarly atmosphere.

A Short History of Modern Philosophy Roger Scruton, 2004-08-02 Discover for yourself the pleasures of philosophy Written both for the seasoned student of philosophy as well as the general reader the renowned writer Roger Scruton provides a survey of modern philosophy Always engaging Scruton takes us on a fascinating tour of the subject from founding father Descartes to the most important and famous philosopher of the twentieth century Ludwig Wittgenstein He

identifies all the principal figures as well as outlines of the main intellectual preoccupations that have informed western philosophy Painting a portrait of modern philosophy that is vivid and animated Scruton introduces us to some of the greatest philosophical problems invented in this period and pursued ever since Including material on recent debates A Short History of Modern Philosophy is already established as the classic introduction Read it and find out why **Course of the History of Modern Philosophy** Victor Cousin,1869 Course of the History of Modern Philosophy Victor Cousin,Orlando Williams Wight,2022-01-20 Reprint of the original first published in 1866 **History of Modern Philosophy** Richard Falckenberg,2014-08-22 In no other department is a thorough knowledge of history so important as in philosophy Like historical science in general philosophy is on the one hand in touch with exact inquiry while on the other it has a certain relationship with art With the former it has in common its methodical procedure and its cognitive aim with the latter its intuitive character and the endeavor to compass the whole of reality with a glance Metaphysical principles are less easily verified from experience than physical hypotheses but also less easily refuted Systems of philosophy therefore are not so dependent on our progressive knowledge of facts as the theories of natural science and change less quickly notwithstanding their mutual conflicts and in spite of the talk about discarded standpoints they possess in a measure the permanence of classical works of art they retain for all time a certain relative validity The thought of Plato of Aristotle and of the heroes of modern philosophy is ever proving anew its fructifying power Nowhere do we find such instructive errors as in the sphere of philosophy nowhere is the new so essentially a completion and development of the old even though it deem itself the whole and assume a hostile attitude toward its predecessors nowhere is the inquiry so much more important than the final result nowhere the categories true and false so inadequate The spirit of the time and the spirit of the people the individuality of the thinker disposition will fancy all these exert a far stronger influence on the development of philosophy both by way of promotion and by way of hindrance than in any other department of thought If a system gives classical expression to the thought of an epoch a nation or a great personality if it seeks to attack the world riddle from a new direction or brings us nearer its solution by important original conceptions by a subtler or a simpler comprehension of the problem by a wider outlook or a deeper insight it has accomplished more than it could have done by bringing forward a number of indisputably correct principles The variations in philosophy which on the assumption of the unity of truth are a rock of offense to many minds may be explained on the one hand by the combination of complex variety and limitation in the motives which govern philosophical thought for it is the whole man that philosophizes not his understanding merely and on the other by the inexhaustible extent of the field of philosophy Back of the logical labor of proof and inference stand as inciting guiding and hindering agents psychical and historical forces which are themselves in large measure alogical though stronger than all logic while just before stretches away the immeasurable domain of reality at once inviting and resisting conquest The grave contradictions so numerous in both the subjective and the objective fields make unanimity impossible concerning ultimate

problems in fact they render it difficult for the individual thinker to combine his convictions into a self consistent system

Course of the history of modern philosophy, tr. by O.W. Wight Claude Henri Victor Cousin, 1852 **Introduction to the History of Modern Philosophy (Classic Reprint)** Arthur Stone Dewing, 2018-01-05 Excerpt from Introduction to the History of Modern Philosophy There are at the present time accessible to the English reader many excellent and comprehensive histories of philosophy And the only reason for treating the subject again has arisen from the hope that a more simple treatment would prove useful to those readers unfamiliar with the technicalities of recent philosophical systems For various reasons the historical side serves as perhaps the only broad and permanently valuable approach to the whole field of philosophy while it is a firm conviction with many that some slight acquaintance with the development of philosophical problems is indispensable to their appreciation This work is intended as an introduction to the subject and is not the expression of a critical or reconstructive attitude it makes no attempt to trace the logico genetic development of modern thought nor does it pretend to consider every aspect of historical development About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *A History of Philosophy: History of modern philosophy* Friedrich Ueberweg, 1874 *The Rise of Modern Philosophy* Tom Sorell, 1993 Modern philosophy in the West is said to have begun with Bacon and Descartes Their methodological and metaphysical writings in conjunction with the discoveries that marked the seventeenth century scientific revolution are supposed to have interred both Aristotelian and scholastic science and the philosophy that supported it But did the new or modern philosophy effect a complete break with what preceded it Were Bacon and Descartes untainted by scholastic influences The theme of this book is that the new and traditional philosophies have more in common than the orthodox account suggests In two survey articles and thirteen essays on individual philosophers the contributors show that the rise of modern philosophy was much more complicated and much more interesting than is usually thought They consider not only metaphysics and the sciences but also claims of Machiavelli Hobbes and Spinoza to have invented modern ethics and politics These two aspects of modernity in philosophy are connected for the first time The book offers a broad view of the early modern philosophers covering not only the much studied major figures but also relatively neglected writers Mersenne Gassendi White and Sergeant History of Philosophy: History of modern philosophy. With additions by the translator, an appendix on English and American philosophy by Noah Porter, and an appendix on Italian philosophy by Vincenzo Botta Friedrich Ueberweg, 1876
