**THE ROAD TO DRESDEN** A. L. Provost, 2013-05-28. Book Summary. On June 22, 1941, Adolf Hitler launched Operation Barbarossa, the ambitious plan to invade and conquer Russia. A year later, the Germans were in desperate need of new tanks, airplanes, U-boats, and heavy artillery to replace massive losses to the surging Russian army. With the value of German currency rapidly declining on the world financial market, the Nazis sought to use the fortune in diamonds confiscated from German and Polish Jews as collateral for huge loans from Swiss banks that would enable Germany to prolong the war for several years. However, first the diamonds had to be collected, appraised, and shipped to banks in Zurich. American and British agents vowed this never would happen. At any cost.

**The Social Life of Materials** Adam Drazin, Susanne Küchler, 2020-06-08. Materials play a central role in society. Beyond the physical and chemical properties of materials, their cultural properties have often been overlooked in anthropological studies. Finished products have been perceived as social, yet the materials which comprise them are considered raw or natural. *The Social Life of Materials* proposes a new perspective in this interdisciplinary field. Diverting attention from the consumption of objects, the book looks towards the properties of materials and how these exist through many transformations in a variety of cultural contexts. Human societies have always worked with materials. However, the customs and traditions surrounding this differ according to the place, the time, and the material itself. Whether or not the material is man-made, materials are defined by social intervention. Today, these constitute one of the most exciting areas of global scientific research and innovation, harboring the potential to act as key vehicles of change in the world. But this materials revolution has complex social implications. Smart materials are designed to anticipate our actions and needs, yet we are increasingly unable to apprehend the composite materials which comprise new products. Bringing together ethnographic studies of cultures from around the world, this collection explores the significance of materials by moving beyond questions of what may be created from them. Instead, the

text argues that the materials themselves represent a shifting ground around which relationships identities and powers are constantly formed and dissolved in the act of making and remaking      *Wolf v.
