The Diaspora Introduction To Africana Studies:

The Diaspora Margaret Dwight Barrett, Phillip Carey, 2003 *Introduction to Africana Studies* Marc Prou, 2011-06-01

Introduction to African American Studies Talmadge Anderson, James Benjamin Stewart, 2007 There is an ongoing debate as to whether African American Studies is a discipline or multidisciplinary or interdisciplinary field Some scholars assert that African American Studies use a well defined common approach in examining history politics and the family in the same way as scholars in the disciplines of economics sociology and political science Other scholars consider African American Studies multidisciplinary a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses be they anthropological psychological historical etc to study the African world experience In this model the boundaries between traditional disciplines are accepted and researches in African American Studies simply conduct discipline based an analysis of particular topics Finally another group of scholars insists that African American Studies is interdisciplinary an enterprise that generates distinctive analyses by combining perspectives from d **An Introduction to Black Studies** Eric R. Jackson, 2023-01-31 For years the American public education system has neglected to fully examine and discuss the rich history of people of African descent who have played a pivotal role in the transformation of the United States The establishment of Black studies departments and programs represented a major victory for higher education and a vindication of Black scholars such as W E B Du Bois and Nathan Huggins This emerging field sought to address omissions from numerous disciplines as well as myriad distortions stereotypes and myths In *An Introduction to Black Studies* Eric R Jackson demonstrates the continuing need for Black studies also known as African American studies in university curricula Jackson connects the growth and impact of Black studies to the broader context of social justice movements emphasizing the historical and contemporary demand for the discipline This book features seventeen chapters that focus on the primary eight disciplines of Black studies history sociology psychology religion feminism education political science and the arts Each chapter includes a biographical vignette of an important figure in African American history such as Frederick Douglass Louis Armstrong and Madam C J Walker as well as student learning objectives that provide a starting point for educators This valuable work speaks to the strength and rigor of the field its importance to the formal educational process and its relevance to the United States and the world Africana Critical Theory Reiland Rabaka, 2009-01-16 Building on and going far beyond W E B Du Bois and the Problems of the Twenty First Century and Du Bois s Dialectics Reiland Rabaka s Africana Critical Theory innovatively identifies and analyzes continental and diasporan African contributions to classical and contemporary critical theory This book represents a climatic critical theoretical clincher that cogently demonstrates how Du Bois s rarely discussed dialectical thought interdisciplinarity intellectual history making radical political activism and world historical multiple liberation movement leadership helped to inaugurate a distinct Africana tradition of critical theory With chapters on W E B Du Bois C L R James Negritude Aime Cesaire and Leopold Senghor Frantz Fanon and Amilcar Cabral Africana Critical

Theory endeavors to accessibly offer contemporary critical theorists an intellectual archaeology of the Africana tradition of critical theory and a much needed dialectical deconstruction and reconstruction of black radical politics. These six seminal figures' collective thought and texts clearly cuts across several disciplines and therefore closes the chasm between Africana Studies and critical theory, constantly demanding that intellectuals not simply think deep thoughts, develop new theories and theoretically support radical politics, but be and constantly become political activists, social organizers and cultural workers that is folk. The Italian critical theorist Antonio Gramsci referred to as organic intellectuals. In this sense then the series of studies gathered in *Africana Critical Theory* contribute not only to African Studies, African American Studies, Caribbean Studies, Cultural Studies, Gender Studies and Postcolonial Studies but also to contemporary critical theoretical discourse across an amazingly wide range of traditional disciplines and radical political activism outside of and in many instances absolutely against Europe's ivory towers and the absurdities of the American academy.

Contains original essays by expert contributors in the field of African American Studies. Creates a groundbreaking re appraisal of the history and future of the field. Includes a series of reflections from those who established African American Studies as a bona fide academic discipline. and invited reconsiderations of theoretical assumptions about the unfolding of cross cultural and multi ethnic societies about power relations frontiers and boundaries about cultural transmission communication and translation The present collection of essays by renowned writers and scholars addresses these issues and helps to ground the ongoing debate about the African diaspora in a more solid theoretical framework Part I is dedicated to a general discussion of the concept of African diaspora its origins and historical development Part II examines the complex cultural dimensions of African diasporas in relation to significant sites and figures including the modes and modalities of creative expression from the perspective of both artists writers and their audiences finally Part III focusses on the resources collections and archives and iconographies that are available today As most authors argue the African diaspora should not be seen merely as a historical phenomenon but also as an idea or ideology and an object of representation By exploring this new ground the essays assembled here provide important new insights for scholars in American and African American Studies Cultural Studies Ethnic Studies and African Studies The collection is rounded off by an annotated listing of black autobiographies [Catalogue Number.
