The Holocaust in South-Eastern Europe: Historiography, Archives Resources and Remembrance Adina Babeş - Fruchter, Ana Bărbulescu, 2021-06-01 For many decades the Holocaust in South Eastern Europe lacked the required introspection research and study and most

importantly access to archives and documentation Only in recent years and with the significant help of an emerging generation of local scholars the Holocaust from this region became the focus of many studies In 2018 under the European Holocaust Research Infrastructure umbrella the Elie Wiesel National Institute for the Study of the Holocaust in Romania organized a workshop dedicated to Holocaust research education and remembrance in South Eastern Europe The present volume is a natural continuation of the above mentioned workshop with the aim of introducing the current state of Holocaust research in the region to different categories of scholars in the field of Holocaust studies to students and why not to the general public Our scope not an exhaustive one is to present a historical contextualization using archival resources to display the variety of recordings of discrimination destruction and rescue efforts and to introduce the remembrance initiatives and processes developed in the region in the aftermath of the Holocaust

Genocide William D. Rubinstein, 2014-07-10

Genocide is a topic beset by ambiguities over meaning and double standards In this stimulating and gripping history William Rubinstein sets out to clarify the meaning of the term genocide and its historical evolution and provides a working definition that informs the rest of the book He makes the important argument that each instance of genocide is best understood within a particular historical framework and provides an original chronology of these distinct frameworks In the final part of the book he critically examines a number of alleged past and recent genocides from native Americans slavery the Irish famine homosexuals and gypsies in the Nazi concentration camps Yugoslavia Rwanda through to the claims of pro lifers and anti abortionists

Worlding the Brain , 2023-09-29 Moving beyond the neurohype of recent decades this book introduces the concept of worlding as a new way to understand the inherent entanglement of brains minds with their worldly environments cultural practices and social contexts Case studies ranging from film literature music and dance to pedagogy historical trauma and present day discourses of mindfulness investigate how brains are worlded in an active interplay of biological cognitive and socio discursive factors Combining scholarly work with personal accounts of neurodiversity and essays by artists reflecting on their practical engagement with cognition Worlding the Brain makes a case for the distinctive role of the humanities and arts in the study of brains and cognition and explores novel forms interdisciplinarity
